Exam AI-900 Lab Questions | AI-900 Valid Test Braindumps
Business Applications AI-900 certification exam with our braindumps, just send us your failed score report. After we confirm your AI-900 score report and we can give full refund of the AI-900 Exam to you in time. Meanwhile, if you also need to take other related exams you also can choose another exam instead of the failed exam.

There are many certificates for you to get but which kind of certificate is most authorized, efficient and useful? We recommend you the AI-900 certificate because it can prove that you are competent in some area and boost outstanding abilities. If you buy our AI-900 Study Materials you will pass the test smoothly and easily. On one hand, you can study the most professional and specialized knowledge in this field. On the other hand, you can gain the AI-900 certification.

100% Pass 2026 Fantastic Microsoft AI-900: Exam Microsoft Azure AI Fundamentals Lab Questions

The quality of the AI-900 exam product is very important. A high-quality AI-900 exam study material can save your time spent on the study and can also enhance your confidence. Here, our Microsoft AI-900 exam vce dumps will be the right study material for you. AI-900 Training Pdf cannot only help you pass your exam, but also widen your horizons. Then passing the AI-900 exam test is a certain thing. Equipped with the skills of AI-900 certification, you will have more opportunity in your career.

Microsoft Azure AI Fundamentals Sample Questions (Q239-Q244):

NEW QUESTION # 239
To complete the sentence, select the appropriate option in the answer area.

Answer:

Explanation:

NEW QUESTION # 240
Match the tasks to the appropriate machine learning models.
To answer, drag the appropriate model from the column on the left to its scenario on the right. Each model may be used once, more than once, or not at all.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 241
Select the answer that correctly completes the sentence.

Answer:

Explanation:
Explanation:
This question is drawn from the Microsoft Azure AI Fundamentals (AI-900) syllabus section "Describe features of natural language processing (NLP) workloads on Azure." According to the Microsoft Learn materials, Natural Language Processing (NLP) is a branch of artificial intelligence that allows computers to analyze, understand, and generate human language. NLP enables machines to work with text or speech data in a way that extracts meaning, sentiment, and intent.
Microsoft defines NLP as enabling scenarios such as language detection, text classification, key phrase extraction, sentiment analysis, and named entity recognition. The example given-classifying emails as
"work-related" or "personal"-is a text classification task, which falls under NLP capabilities. The AI model processes the textual content of emails, identifies linguistic patterns, and categorizes them based on the detected topic or context.
Let's analyze the other options:
* Predict the number of future car rentals # This is a forecasting task, handled by machine learning regression models, not NLP.
* Predict which website visitors will make a transaction # This is a classification or prediction problem in machine learning, not NLP, since it deals with behavioral or numerical data rather than language.
* Stop a process in a factory when extremely high temperatures are registered # This is an IoT or anomaly detection scenario, focusing on sensor data, not language understanding.
Therefore, only classifying email messages as work-related or personal correctly represents an NLP use case.
It illustrates how NLP can analyze written text and make intelligent categorizations-a key capability covered in AI-900's natural language workloads section.

NEW QUESTION # 242
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Reference:
https://docs.microsoft.com/en-gb/azure/cognitive-services/qnamaker/concepts/data-sources-and-content
https://docs.microsoft.com/en-us/azure/cognitive-services/luis/choose-natural-language-processing-service QnA maker
conversational AI service and has nothing to do with SQL database You can easily create a user support bot solution on Microsoft
Azure using a combination of two core technologies:
- QnA Maker. This cognitive service enables you to create and publish a knowledge base with built-in natural language processing
capabilities.
- Azure Bot Service. This service provides a framework for developing, publishing, and managing bots on Azure.
https://docs.microsoft.com/en-us/learn/modules/build-faq-chatbot-qna-maker-azure-bot-service/2-get-started-qna-bot LUIS is
used to understand user intent from utterances.
Creating a language understanding application with Language Understanding consists of two main tasks. First you must define
entities, intents, and utterances with which to train the language model - referred to as authoring the model. Then you must publish
the model so that client applications can use it for intent and entity prediction based on user input.
https://docs.microsoft.com/en-us/azure/cognitive-services/luis/choose-natural-language-processing-service

NEW QUESTION # 243
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 244
......

our AI-900 exam guide has not equivocal content that may confuse exam candidates. All question points of our AI-900 study quiz
can dispel your doubts clearly. Get our AI-900 certification actual exam and just make sure that you fully understand it and study
every single question in it by heart. And we believe you will get benefited from it enormously beyond your expectations with the help
our AI-900 Learning Materials.
