# Valid Exam Oracle 1z1-076 Preparation | Practice 1z1-076 Questions

2025 Latest SurePassExams 1z1-076 PDF Dumps and 1z1-076 Exam Engine Free Share: https://drive.google.com/open?id=1LNSqz6nadW91LGej7bGdBcH8XVpf80BQ

In the Desktop 1z1-076 practice exam software version of Oracle 1z1-076 practice test is updated and real. The software is useable on Windows-based computers and laptops. There is a demo of the 1z1-076 practice exam which is totally free. 1z1-076 practice test is very customizable and you can adjust its time and number of questions. Desktop 1z1-076 Practice Exam software also keeps track of the earlier attempted 1z1-076 practice test so you can know mistakes and overcome them at each and every step.

Oracle provides the most reliable and authentic Oracle 1z1-076 Exam prep material there is. The 3 kinds of Oracle 1z1-076 Preparation formats ensure that there are no lacking points in a student when he attempts the actual 1z1-076 exam.

Practice 1z1-076 Questions, Valid 1z1-076 Exam Fee

The sources and content of our 1z1-076 practice materials are all based on the real exam. And they are the masterpieces of processional expertise these area with reasonable prices. Besides, they are high efficient for passing rate is between 98 to 100 percent, so they can help you save time and cut down additional time to focus on the 1z1-076 Actual Exam review only. We understand your drive of the 1z1-076 certificate, so you have a focus already and that is a good start.

Oracle Database 19c: Data Guard Administration Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which two factors can cause an increase in redo transport lag?

- A. The size of the online redo log files on the standby database.
- B. Increase in redo generation rate on the primary database.
- C. The size of the online redo log files on the primary database.
- D. Increase in network latency between the primary database and a redo transport destination.
- E. The size of the standby redo log files on the primary database.

Answer: B,D

NEW QUESTION # 67
Which THREE statements are true about snapshot standby databases?

- A. FLASHBACK DATABASE must be manually enabled on a physical standby database before converting it into a snapshot standby database.
- B. FLASHBACK DATABASE is enabled automatically on a physical standby database as part of the conversion into a snapshot standby database, if not already enabled.
- C. A snapshot standby database may be opened read-write.
- D. A snapshot standby database can have Real-Time apply enabled.
- E. FLASHBACK DATABASE is enabled automatically on a snapshot standby database after converting it from a physical standby database if not already enabled.
- F. A snapshot standby database may be opened read-only.

Answer: B,C,E

Explanation:
Snapshot standby databases are a feature of Oracle Data Guard that allows a physical standby database to be temporarily converted into a read-write database for testing or other purposes. The true statements about snapshot standby databases are:
* FLASHBACK DATABASE is enabled automatically on a snapshot standby database after converting it from a physical standby database if not already enabled (B): When a physical standby is converted to a snapshot standby, FLASHBACK DATABASE is automatically enabled to allow the database to be easily reverted back to its original state.
* FLASHBACK DATABASE is enabled automatically on a physical standby database as part of the conversion into a snapshot standby database, if not already enabled (C): As part of the conversion process, FLASHBACK DATABASE is turned on to ensure that changes made while the database is in snapshot standby mode can be undone.
* A snapshot standby database may be opened read-write (E): Once a physical standby is converted to a snapshot standby, it can be opened for read-write operations, allowing for testing and other tasks that require a writable database.

NEW QUESTION # 68
Your Data Guard environment contains a four-instance RAC primary database whose SID is PROD and a RAC physical standby database whose std is PROD_SBY.
Examine the command executed on a node of the primary database cluster to create a service OLTPWORKLOAD that the applications will use to connect to the database when it is in the FRIMARYTclatabase role:
srvctl add service -db PROD -service oltpworkload -role PRIMARY -failovertype SESSION -failovermethod BASIC -failoverdelay 10 -failoverretry 150 The service is then started Consider this list of tasks:
1. On a node of the standby database cluster execute:
srvctl add service -db PROD_SBY -service oltpworkload -role PRIMARY -failovertype SESSION
-failovermethod BASIC -failoverdelay 10 -failoverretry 150
2. On the primary database, create the oltpworkload database service using the dbms_service.create_service procedure.
3. Configure tap for clients in the tnsnames.ora files.
4. Make sure clients use the OLTPWORKLOAD service to connect to the database instances.
5. On the standby database, create the oltpworkload database service using the dbms_service.create_servi;l procedure.
Identify the required steps to configure and use Transparent Application Failover (taf).

- A. 0
- B. 3,4
- C. 1

- D. 1,4
- E. 2,3,4
- F. 1,3,4

Answer: D

Explanation:
To set up Transparent Application Failover (TAF) in a Data Guard environment with RAC, you would need to:
* On a node of the standby database cluster, execute the srvctl command to add the oltpworkload service for the PRIMARY role (1): This prepares the standby cluster to provide the oltpworkload service in case a failover occurs, and the standby becomes the primary database.
* Make sure clients use the OLTPWORKLOAD service to connect to the database instances (4):
This ensures that client connections are directed to the correct service, which is managed by TAF and can fail over in case of a primary database outage.References:

NEW QUESTION # 69

Active Data Guard (ADG) databases are widely used to offload reporting or ad hoc query-only jobs from the primary database.
Reporting workload profile is different from the primary database and often requires tuning.
Which tool is used to tune SQL workloads running on an ADG database?

- A. Automatic Workload Repository (AWR)
- B. Standby Statspack
- C. SQL Tuning Advisor
- D. In-Memory Active Session History (ASH)
- E. Automatic Diagnostic Database Monitor (ADDM)

Answer: A

Explanation:
AWR collects, processes, and maintains performance statistics for problem detection and self-tuning purposes. In an Active Data Guard environment, where the physical standby database can be used for read-only workloads, AWR can be instrumental in identifying performance bottlenecks and areas for optimization. It provides detailed reports that include wait events, time model statistics, and active session history, making it an invaluable tool for tuning SQL queries and overall database performance in an ADG setup.

NEW QUESTION # 70

Examine the Data Guard configuration:
DGMGRL> show configuration;
Configuration - Animals
Protection Mode: MaxAvailability
Databases:
dogs - Primary database
sheep - Snapshot standby database
cats - Physical standby database
Fast-Start Failover: DISABLED
Configuration Status:
SUCCESS
You receive an error while attempting to raise the protection mode to Maximum Protection:
DGMGRL> edit configuration set protection mode as maxprotection;
Error: ORA-16627: operation disallowed since no standby databases would remain to support protection mode Failed.
Which is the minimum statement, or sequence of statements you must execute to enable successful raising of the protection mode to Maximum Protection?

- A. DGMGRL> edit database dogs set property LogxptMode=sync;
  DGMGRL> edit database sheep set property LogxptMode=sync;
- B. DGMGRL> edit database dogs set property LogxptMode=sync;
- C. DGMGRL> edit database sheep set property LogXptMode=sync;

- D. DGMGRL> edit database cats set property LogXptMode=sync;
- E. DGMGRL> edit database dogs set property LogXptMode=sync;
  DGMGRL> edit database cats set property LogXptMode=sync;
- F. DGMGRL> edit database dogs set property LogXptMode=sync;
  DGMGRL> edit database sheep set property LogxptMode=sync;
  DGMGRL> edit database cats set property LogXptMode=sync;

Answer: E

NEW QUESTION # 71
......

Whatever 1z1-076 Exam, you are taking; the study guides of SurePassExams are there to help you get through the exam without any hassle. The questions and answers are absolutely exam oriented, focusing only the most essential part of your exam syllabus. Thus they save your time and energy going waste in thumbing through the unnecessary details.

Practice 1z1-076 Questions: https://www.surepassexams.com/1z1-076-exam-bootcamp.html

Oracle Valid Exam 1z1-076 Preparation And with the online payment way, you are able to finish the deal within one or two minutes, We know that different people have different buying habits, so we designed three versions of 1z1-076 actual test questions for your tastes and convenience, which can help you to practice on free time, You can refer to the warm feedbacks on our website, our customers all passed the 1z1-076 exam with high scores.

The application sends the service ticket to the database server, Valid 1z1-076 Exam Fee Tips and Tricks, And with the online payment way, you are able to finish the deal within one or two minutes.

We know that different people have different buying habits, so we designed three versions of 1z1-076 Actual Test questions for your tastes and convenience, which can help you to practice on free time.

Get Trustable Valid Exam 1z1-076 Preparation and Best Accurate Practice 1z1-076 Questions

You can refer to the warm feedbacks on our website, our customers all passed the 1z1-076 exam with high scores, It is universally acknowledged that everyone would like to receive the goods he or she bought as soon as possible after payment, 1z1-076 especially for those who are preparing for the exam, just like the old saying goes "Wasting time is robbing oneself".

Choose the right format of 1z1-076 Oracle Database 19c: Data Guard Administration actual questions and start Oracle 1z1-076 preparation today.
