

# ISO-IEC-42001-Lead-Auditor Pass Guarantee, Study ISO-IEC-42001-Lead-Auditor Test

2026 Latest Pass4Test ISO-IEC-42001-Lead-Auditor PDF Dumps and ISO-IEC-42001-Lead-Auditor Exam Engine Free Share:  
[https://drive.google.com/open?id=18FLeKQW3HbbxYcbK51\\_C7cVYfs2Ap8QP](https://drive.google.com/open?id=18FLeKQW3HbbxYcbK51_C7cVYfs2Ap8QP)

Candidates who become PECB ISO-IEC-42001-Lead-Auditor certified demonstrate their worth in the PECB field. ISO-IEC-42001-Lead-Auditor certification is proof of their competence and skills. This is a highly sought after credential and it makes career advancement easier for the candidate. To become PECB ISO-IEC-42001-Lead-Auditor Certified, you must pass the ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam (ISO-IEC-42001-Lead-Auditor) Exam. For this task, you need actual and updated ISO-IEC-42001-Lead-Auditor Questions.

The product we provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the ISO-IEC-42001-Lead-Auditor study materials by the method which is convenient for you. They check the update every day, and we can guarantee that you can get a free update service from the date of purchase. Once you have any questions and doubts about the ISO-IEC-42001-Lead-Auditor Exam Questions we will provide you with our customer service before or after the sale, you can contact us if you have question or doubt about our exam materials and the professional personnel can help you solve your issue about using ISO-IEC-42001-Lead-Auditor study materials.

>> ISO-IEC-42001-Lead-Auditor Pass Guarantee <<

## High Pass-Rate ISO-IEC-42001-Lead-Auditor - ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam Pass Guarantee

Nowadays, using electronic ISO-IEC-42001-Lead-Auditor exam materials to prepare for the exam has become more and more popular, so now, you really should not be restricted to paper materials any more, our electronic PECB ISO-IEC-42001-Lead-Auditor preparation dumps will surprise you with their effectiveness and usefulness. I can assure you that you will pass the exam as well as getting the related ISO-IEC-42001-Lead-Auditor Certification under the guidance of our ISO-IEC-42001-Lead-Auditor training materials as easy as pie.

## PECB ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam Sample Questions (Q176-Q181):

### NEW QUESTION # 176

Scenario 1 (continued):

To ensure the integrity of the AI system, Future Horizon Academy has implemented measures to ensure that training data remain isolated from data that could lead to harmful or undesirable outcomes. The institution adds significant data elements as metadata, transforms the data into a format usable by the AI system, and uses data from one or more trusted sources.

Committed to standardization and continual improvement, Future Horizon Academy decided to implement an artificial intelligence management system (AIMS) based on ISO/IEC 42001 that would help the institution increase operational efficiency, resulting in improved processes.

After having the AIMS in place for a year, the institution decided to apply for a certification audit to get certified against ISO/IEC 42001. Prior to the certification audit, the institution conducted an internal audit and management review to ensure that the AIMS aligns with the institution's own requirements and that the system is being maintained effectively.

Question:

Based on functionality, what type of AI system did Future Horizon Academy establish?

- A. General AI
- B. Reactive machines
- **C. Limited memory**
- D. Theory of mind

**Answer: C**

Explanation:

The AI system described uses training data and prior experience (historical data) to make decisions, which matches Limited Memory systems. ISO/IEC 22989:2022 (supportive reference) categorizes Limited Memory AI as those that rely on past data and metadata to improve decision making, and ISO/IEC 42001 refers to AI functionality understanding under Clause 4.2 when considering context and system type.

Reference: ISO/IEC 22989:2022 Section 5.2.3; ISO/IEC 42001:2023 Clause 4.2.

#### **NEW QUESTION # 177**

In which step are the audit findings, including nonconformities, documented and reviewed?

- A. Conducting the audit
- B. Initiating the audit
- **C. Audit reporting**
- D. Closing meeting

**Answer: C**

Explanation:

The Audit Reporting step involves the formal documentation of audit findings, including:

- \* Nonconformities
- \* Observations
- \* Opportunities for improvement
- \* Conformity conclusions

According to ISO 19011:2018 - Clause 6.6.1, and reflected in ISO/IEC 42001:2023 - Clause 9.2.2, the audit report must be reviewed and finalized after the audit activities are complete and include verified evidence of all findings.

The PECB Lead Auditor Guide - Domain 6 emphasizes that the audit report is the final output of the audit process and includes all findings that were identified and reviewed during the audit lifecycle.

Reference: ISO 19011:2018 - Clause 6.6.1 (Preparing and distributing the audit report) ISO/IEC 42001:2023 - Clause 9.2.2 (Internal audit) PECB Lead Auditor Guide - Domain 6: "Audit Reporting and Closing Activities"

#### **NEW QUESTION # 178**

An auditor is reviewing an AI system used for hiring processes at a tech company and discovers that the system disproportionately rejects candidates from certain ethnic backgrounds. The auditor previously consulted for this company on diversity strategies. Which management system auditing principle (as per ISO 19011) is at risk of being compromised in this scenario?

- **A. Independence**
- B. Confidentiality
- C. Fair Presentation
- D. Due Professional Care

**Answer: A**

Explanation:

The principle at risk here is Independence. According to ISO 19011:2018 - Clause 4(c), auditors must be independent of the activity being audited and free from bias or conflicts of interest.

Having previously consulted for the company on diversity strategies, the auditor has a prior engagement that may affect impartiality, particularly since the audit involves evaluating bias and fairness in hiring practices - the same area previously advised on.

The PECB Lead Auditor Guide - Domain 3 reinforces that independence is crucial for objective evidence gathering and unbiased conclusions, especially in audits involving ethical or reputational concerns.

Reference: ISO 19011:2018 - Clause 4 (Principles of auditing), specifically Principle: "Independence" PECB Lead Auditor Guide - Domain 3: "Ethical Principles and Auditor Conduct"

## NEW QUESTION # 179

Scenario 9:

Scenario 9: Securisai, located in Tallinn, Estonia, specializes in the development of automated cybersecurity solutions that utilize AI systems. The company recently implemented an artificial intelligence management system AIMS in accordance with ISO/IEC 42001. In doing so, the company aimed to manage its AI-driven systems' capabilities to detect and mitigate cyber threats more efficiently and ethically. As part of its commitment to upholding the highest standards of AI use and management, Securisai underwent a certification audit to demonstrate compliance with ISO/IEC 42001.

The audit process comprised two main stages: the initial or stage 1 audit focused on reviewing Securisai's documentation, policies, and procedures related to its AIMS. This review laid the groundwork for the stage 2 audit, which involved a comprehensive, on-site evaluation of the actual implementation and effectiveness of the AIMS within Securisai's operations. The goal was to observe the AIMS in operation, ensuring that it not only existed on paper but was effectively integrated into the company's daily activities and cybersecurity strategies.

After the audit, Roger, Securisai's internal auditor, addressed the action plans devised to rectify nonconformities identified during the certification audit. He developed a long term strategy, highlighting key AIMS processes for triennial audits. Roger's internal audits play a key role in advancing Securisai's goals by employing a systematic and disciplined method to assess and boost the efficiency of risk management, governance processes, and strategic decision-making. Roger reported his findings directly to Securisai's top management.

Following the successful rectification of nonconformities, Securisai was officially certified against ISO/IEC 42001.

Recently, the company decided to transfer its ISO/IEC 42001 certification registration from one certification body to another despite being initially bound by a long-term agreement with the current certification body.

This decision was motivated by the desire to partner with a certification body that offers deeper insights and expertise in the rapidly evolving field of artificial intelligence in cybersecurity.

To ensure a smooth transition and uphold its certification status, Securisai is diligently compiling the required documentation for submission to the new certification body. This includes a formal request, the most recent audit report underscoring its adherence to ISO/IEC 42001, the latest corrective action plan that highlights its continuous efforts toward improvement, and a copy of its current valid certification registration.

A year following Securisai's initial certification audit, a subsequent audit was carried out by the certification body on its AIMS. The purpose of this audit was to assess compliance with ISO/IEC 42001 and verify the ongoing improvement of the AIMS. The audit team concluded that Securisai's AIMS consistently meets the requirements set by ISO/IEC 42001.

Question:

Roger followed up on action plans resulting from external audits. Is this acceptable?

- A. No, it is the responsibility of the external auditor to follow up on action plans resulting from external audits
- **B. Yes, the internal auditor should follow up on action plans submitted during internal and external audits**
- C. No, the internal auditor should follow up on action plans submitted in response to nonconformities resulting only from internal audits

**Answer: B**

Explanation:

It is acceptable and even advisable for internal auditors to monitor both internal and external audit findings to ensure the system's ongoing effectiveness.

\* ISO/IEC 42001:2023 Clause 9.2.2 states: "Internal audits shall ensure the AIMS conforms to both the organization's own requirements and the requirements of the standard, including actions arising from external audits."

\* ISO 19011:2018 Clause 5.5 allows internal auditors to verify that corrective actions from all sources (internal and external audits) are implemented effectively.

Reference: ISO/IEC 42001:2023 Clause 9.2.2; ISO 19011:2018 Clause 5.5.

## NEW QUESTION # 180

Question:

DenSolutions, a financial institution, is seeking to certify its AIMS. The certification body appointed Sarah as the audit team leader, who previously provided consultancy services regarding the AIMS. Can Sarah audit the AIMS of DenSolutions?

- A. Yes, if a minimum of two years have passed following the end of the consultancy
- B. Yes, with approval from the auditee
- C. Yes, if the auditor does not directly audit any component of the AIMS they consulted on and only oversees the audit process
- **D. No - auditors who contribute to the design, implementation, and maintenance of the AIMS cannot participate in AIMS audits**

**Answer: D**

Explanation:

Sarah cannot audit because auditors who have contributed to the design, implementation, or maintenance of a management system must not audit that same system to avoid conflict of interest.

\* ISO/IEC 17021-1:2015 Clause 5.2.5 clearly states: "Personnel who have provided management system consultancy, including those acting in a managerial capacity, shall not be used to conduct audits."

\* The Lead Auditor Guide explains: "Maintaining impartiality requires that individuals with consultancy roles be excluded from auditing the systems they helped create." Reference: ISO/IEC 17021-1:2015 Clause 5.2.5; ISO/IEC 42001 Lead Auditor Training Material, Conflict of Interest Management.

## NEW QUESTION # 181

.....

PECB ISO-IEC-42001-Lead-Auditor practice test software contains many PECB ISO-IEC-42001-Lead-Auditor practice exam designs just like the real ISO/IEC 42001:2023 Artificial Intelligence Management System Lead Auditor Exam (ISO-IEC-42001-Lead-Auditor) exam. These ISO-IEC-42001-Lead-Auditor practice exams contain all the ISO-IEC-42001-Lead-Auditor questions that clearly and completely elaborate on the difficulties and hurdles you will face in the final ISO-IEC-42001-Lead-Auditor Exam. We update our PECB ISO-IEC-42001-Lead-Auditor exam questions bank regularly to match the changes and improve the quality of ISO-IEC-42001-Lead-Auditor questions so you can get a better experience.
