Visual EDI101 Cert Exam | EDI101 Valid Test Labs

One of the most important functions of our EDI101 preparation questions are that can support almost all electronic equipment. If

you want to prepare for your exam by the computer, you can buy our EDI101 training quiz. Of course, if you prefer to study by your mobile phone, our study materials also can meet your demand. You just need to download the online version of our EDI101 Preparation questions. We can promise that the online version will not let you down. We believe that you will benefit a lot from it if you buy our EDI101 study materials and pass the EDI101 exam easily.

EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which of the following can be parts of an XML message? (SELECT ALL THAT APPLY)

- **A. Attribute**
- B. Processing ID
- C. Subcomponent Separator
- **D. Namespace**
- **E. Element**

Answer: A,D,E

Explanation:

XML messages are structured differently than HL7. Core components of XML include Elements (the tags that contain data), Attributes (properties provided within an element tag), and Namespaces (used to provide uniquely named elements and attributes in an XML document). "Subcomponent Separator" and "Processing ID" are specific to HL7 and are not native structural components of XML.

NEW QUESTION # 13

Which of the following actions will mark an error as deleted? (SELECT ALL THAT APPLY)

- A. Releasing the error from a workqueue
- **B. Resubmitting the related message**
- **C. Retriggering the related message**
- **D. Pressing Delete Error from an Error Log Report**

Answer: B,C,D

Explanation:

In Bridges, an error is tied to a specific instance of a message. Resubmitting or retriggering a message (Options B and D) essentially tells the system to try again or create a new message, which clears or "deletes" the error status associated with the previous failed attempt. Additionally, users can manually select Delete Error within an Error Log Report (Option C) to administratively clear an error that no longer requires action.

Releasing an error from a workqueue (Option A) merely removes it from that specific list; it does not delete the error from the system logs.

NEW QUESTION # 14

For which of the following tasks would you use the ID Maintenance activity?

- A. Specify the table to use for mapping
- **B. Add an Identity ID to a record**
- C. Set an outgoing default mapping
- D. Define new ID Types

Answer: B

Explanation:

The ID Maintenance activity is a record-level tool used by analysts to manage specific identifiers for individual records. If a patient or provider has an incorrect external ID or is missing one necessary for interface communication, an administrator uses this activity to manually add, edit, or delete an Identity ID for that specific record. Defining new ID types (Option B) or configuring global mapping tables (Option D) are high-level configuration tasks performed in different administrative activities, not in the individual ID Maintenance tool.

NEW QUESTION # 15

After opening a message in the messages activity, you find that you are unable to retrigger the message. What are some reasons that this might be the case? (SELECT ALL THAT APPLY)

- A. The message was on an incoming interface
- B. The message was previously retriggered
- C. The message was already sent
- D. The message was previously resubmitted

Answer: A,B

Explanation:

Retriggering is the process of asking Epic to re-create an outgoing message based on current data. You cannot retrigger an incoming message because retriggering is an outgoing function (the equivalent for incoming is "resubmit "). Furthermore, Bridges prevents " recursive " retriggering-you cannot retrigger a message that was itself created by a retriggering action (Option A) to prevent duplicate processing loops.

NEW QUESTION # 16

Which of the following criteria can you use to return XML messages using the message search? (SELECT ALL THAT APPLY)

- A. Specify an absolute path in the XML Message Content criteria
- B. Search for all messages using Interconnect as a communication method
- C. Specify a relative path in the XML Message Content criteria
- D. Message search cannot be used to find XML messages

Answer: A,C

Explanation:

Bridges supports searching through XML-formatted messages by navigating the message structure. Analysts can use an absolute path (defining the exact location from the root element) or a relative path (searching for an element regardless of where it resides in the hierarchy) to find specific data points within the XML payload. Searching by communication method (Interconnect) identifies how a message traveled, but does not search the content of the XML itself.

NEW QUESTION # 17

.....

We have an authoritative production team, after you purchase EDI101 study materials, our professions can consolidate important knowledge points for you, and we guarantee that your EDI101 practice quiz is tailor-made. The last but not least, we can provide you with a free trial service, so that customers can fully understand our format before purchasing our EDI101 training guide, which can be an unparalleled trial experience compared to other counterparts.

Visual EDI101 Cert Exam: <https://www.freecram.com/EPIC-certification/EDI101-exam-dumps.html>

Because it is right and reliable, after a long time, FreeCram Visual EDI101 Cert Exam exam dumps are becoming increasingly popular, EPIC EDI101 Test Certification Cost You can learn more with less time, We provide the stimulation, the instances and the diagrams to explain the hard-to-understand contents of our EDI101 study materials, Quick installation.

It means we will make sure the contents are up to date EDI101 because we have professional staff responsible for updating.
