Number of Questions	40-60

Microsoft Power Platform Functional Consultant Sample Questions (Q238-Q243):

NEW QUESTION # 238

A company has a sales application that is supported by an Azure SQL database. You are developing a Power Apps app for use by customer service agents.

The app must reference customer data from the sales application. Data in the sales application is constantly changing and must not be replicated in Microsoft Dataverse. Some customer data is considered sensitive. You must protect data for specific fields when users view data in the app.

You need to configure table creation for the app.

How should you configure the app? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point

Requirement	Action
Dataverse table type to create for the referenced customer data.	Create a virtual table. Create an activity table. Create a user-owned table. Create an organization-owned table.
Protect sensitive customer data for specific fields.	Create an alternate key. Create a secured column. Implement input method editor (IME) mode. Set the value of the visible property of the fields to false.

Answer:

Explanation:

Requirement	Action
Dataverse table type to create for the referenced customer data.	Create a virtual table. Create an activity table. Create a user-owned table. Create an organization-owned table.
Protect sensitive customer data for specific fields.	Create an alternate key. Create a secured column. Implement input method editor (IME) mode. Set the value of the visible property of the fields to false.

Explanation

Requirement	Action
Dataverse table type to create for the referenced customer data.	<input type="text" value="Create a virtual table."/>
Protect sensitive customer data for specific fields.	<input type="text" value="Create a secured column."/>

NEW QUESTION # 239

You are a Dynamics 365 help desk administrator. You need to create a dashboard that displays information on help desk cases that are handled each week. Which dashboard components should you use? To answer, select the appropriate options in the answer area.
 NOTE: Each correct selection is worth one point.

Requirement	Component type
Add a tag chart by using opened cases.	System chart Personal chart Area chart
Add a stacked column chart shared with your team.	System chart Personal chart Area chart
Add a Microsoft Power BI visualization.	System chart Personal chart Area chart
Add a chart from a view that a user creates.	System chart Personal chart Area chart
Add a doughnut chart that shows cases by owner.	System chart Personal chart Area chart

Answer:

Explanation:

NEW QUESTION # 240

You are a Dynamics 365 Customer Service system administrator. You create an app for the sales team. Members of the sales team cannot access the app. You need to ensure that sales team members can access the app. Where should you configure app permissions?

- A. Manage Roles
- B. Dynamics administration center
- C. Security Roles
- D. Dynamics 365 home

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/dynamics365/customer-engagement/customize/manage-access-apps-security-roles> Manage access to apps by using security roles.

You can choose what users see and access from the My Apps page or the Customer Engagement home page by giving app access to specific security roles. Users will have access to apps based on the security roles they're assigned to.

1. Go to Settings > My Apps.
2. In the lower-right corner of the app tile you want to manage access for, select More options (...), and then select Manage Roles.
3. Enter the following in the Manage Roles dialog box:
 - a) App URL Suffix
 - b) Roles
 - c) Select Save.
4. Refresh the My Apps page.
5. Go to the Apps Being Edited view, and publish the app again.
