Any restrictions start from your own heart, if you want to pass the HashiCorp Terraform-Associate-003 examination, you will

choose the VerifiedDumps.

## HashiCorp Terraform-Associate-003 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Develop collaborative Terraform workflows: In this section, candidates are tested for their skills related to managing the Terraform binary, providers, and modules using version constraints and setting up remote states. It also covers the utilization of the Terraform workflow in automation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Collaborate on infrastructure as code using HCP Terraform: In this section, the topics covered include analyzing the HCP Terraform run workflow, the role of HCP Terraform workspaces and their configuration options, and the management of provider credentials in HCP Terraform.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Manage resource lifecycle: The section covers topics such as Initializing a configuration using terraform init and its options and generating an execution plan using terraform plan and its options. It also covers the configuration changes using Terraform Apply and its options.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Configure and use Terraform providers: In this section, topics covered include understanding Terraform's plugin-based architecture and configuring providers. It also covers aliasing, sourcing, and versioning functions.</li></ul>

## HashiCorp Certified: Terraform Associate (003) (HCTA0-003) Sample Questions (Q63-Q68):

### NEW QUESTION # 63

A senior admin accidentally deleted some of your cloud instances. What will Terraform do when you run terraform apply?

- A. Stop and generate an error message about the missing instances.
- B. Rebuild only the instances that were deleted.
- C. Tear down the entire workspace's infrastructure and rebuild it.
- D. Build a completely brand new set of infrastructure.

**Answer: B**

Explanation:

Terraform detects infrastructure drift by comparing the state file with the actual infrastructure.

\* When an instance is manually deleted, Terraform sees it as missing and marks it for recreation.

\* Running terraform apply will only recreate the missing instances while leaving the rest of the infrastructure unchanged.

Explanation of incorrect answers:

\* A (Tear down everything and rebuild)- Incorrect. Terraform does not destroy existing infrastructure unless explicitly told to.

\* B (Build a completely new set of infrastructure)- Incorrect. Terraform does not create duplicates unless configuration changes.

\* D (Stop and error out)- Incorrect. Terraform does not fail; it rebuilds missing resources automatically.

Official Terraform Documentation Reference:

Handling Infrastructure Drift

### NEW QUESTION # 64

Which of these are benefits of using Sentinel with HCP Terraform/Terraform Cloud? (Pick the 3 correct responses)

- A. You can enforce a list of approved AWS AMIs.
- B. You can check out and check in cloud access keys.
- C. Policy-as-code can enforce security best practices.
- D. Sentinel Policies can be written in HashiCorp Configuration Language (HCL).

**Answer: A,B,C**

Explanation:

Sentinel is a policy-as-code framework that integrates with Terraform Cloud to enforce security, compliance, and governance rules. You can enforce rules such as approved AMIs and ensure security best practices. Policies are written in the Sentinel language, not HCL.

Reference:

Sentinel Policies

#### NEW QUESTION # 65

Which of the following commands would you use to access all of the attributes and details of a resource managed by Terraform?

- A. terraform state list 'provider\_type.name'
- B. terraform get 'provider\_type.name'
- C. terraform state show 'provider\_type.name'
- D. terraform state list

**Answer: C**

Explanation:

The terraform state show command allows you to access all of the attributes and details of a resource managed by Terraform. You can use the resource address (e.g. provider\_type.name) as an argument to show the information about a specific resource. The terraform state list command only shows the list of resources in the state, not their attributes. The terraform get command downloads and installs modules needed for the configuration. It does not show any information about resources. References = [Command: state show] and

[Command: state list]

#### NEW QUESTION # 66

You can configure Terraform to log to a file using the TF\_LOG environment variable.

- A. False
- B. True

**Answer: B**

Explanation:

You can configure Terraform to log to a file using the TF\_LOG environment variable. This variable can be set to one of the log levels: TRACE, DEBUG, INFO, WARN or ERROR. You can also use the TF\_LOG\_PATH environment variable to specify a custom log file location. References = : Debugging Terraform

#### NEW QUESTION # 67

What is the Terraform style convention for indenting a nesting level compared to the one above it?

- A. With three spaces
- B. With a tab
- C. With two spaces
- D. With four spaces

**Answer: C**

Explanation:

Explanation

This is the Terraform style convention for indenting a nesting level compared to the one above it. The other options are not consistent with the Terraform style guide.

#### NEW QUESTION # 68

.....
