PL-400 Certification Exam Dumps & Leader in Certification Exams Materials & PL-400 Latest Study Notes

To stand in the race and get hold of what you deserve in your career, you must check with all the ValidExam Microsoft PL-400 Exam Questions that can help you study for the PL-400 certification exam and clear it with a brilliant score. You can easily get these Microsoft Power Platform Developer (PL-400) exam dumps from ValidExam that are helping candidates achieve their goals. As a working person, the Microsoft PL-400 Practice Exam will be a great help because you are left with little time to prepare for the PL-400 certification exam which you cannot waste to make time for the PL-400 exam questions.

To be eligible to take the PL-400 exam, candidates must have experience in developing solutions with Power Apps, Power Automate, Power BI, and Dataverse. Additionally, it is recommended that candidates have knowledge of Microsoft Azure and Dynamics 365. PL-400 Exam consists of around 40-60 questions that test a candidate's practical knowledge of the Power Platform.

Microsoft Power Platform Developer Sample Questions (Q185-Q190):

NEW QUESTION # 185

An international organization has a series of client-server applications that manage red light cameras and traffic violations across a wide geographic region. The daily volume of traffic violations is very high and growing.

You plan to use Microsoft Power Platform apps to manage the following types of data:

- * Existing vehicle licensing data must be imported into Common Data Service and easily queried.
- * Red light camera images must be stored in a repository for later analysis.
- * Information about traffic violations must be stored and related to vehicle details.

You need to select data storage mechanisms for the new apps.

Which data storage mechanisms should you use? To answer, drag the appropriate data storage mechanisms to the correct data types. Each storage mechanism may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 188

You need to configure the custom connector to incorporate the environment name and DataId in the Web API URL. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Explanation:

Topic 6, City Power & Light
Background

City Power & Light is an energy and utilities company that has offices in Europe. The company subsidizes home improvements for

domestic customers, to improve energy efficiency and to meet environmental commitments. The company also distributes and generates electricity for domestic and commercial customers.

The company has 2,000 employees in multiple offices and in work-from-home locations.

City Power & Light uses a team of schedulers, assessors, field engineers, and customer support agents for home improvements in a program named Get Energy Fit.

Current Environment

Get Energy Fit Program

City Power & Light uses the following to manage the Get Energy Fit program:

- * The company uses a Microsoft Excel spreadsheet named Planning Hub on Microsoft SharePoint Online to store information about customer appointments, customer details, and customer eligibility in the program.

- * The company records sensitive customer information that includes the document identification numbers and the customer's financial information.

- * The company uses an assessor to verify customer eligibility in the program and to perform a suitability assessment. The assessor completes the suitability assessment by using a paper and clipboard at the customer property and enters the data to the Planning Hub after the assessment is completed. The assessor also uploads * photographs to an on-premises document library. The assessor completes the eligibility assessment by using an application written in React.

- * Schedulers use Microsoft Outlook to schedule engineers and assessors for home improvement appointments.

About 200 appointments are scheduled daily.

- * Employees for the company submit funding claims on behalf of the customer by uploading evidence and compliance checks information to an application named the Claim Submission Portal.

Technical Environment

- * Schedulers use Windows 11 desktop and laptop computers with the latest version of Microsoft Edge.

- * Assessors use iOS and Android tablet devices.

- * The Claim Submission Portal uses REST-based APIs for all operations and a dedicated testing environment.

Authentication to the API is provided by using the following example header key and value pair o Authentication:
2C8D41431415E429C7FC7A74D8315

- * The company uses Microsoft Azure for hosting multiple applications.

Requirements

Overview

City Power & Light plans to implement Microsoft Power Platform to improve the customer experience and increase delivery for the Get Energy Fit program.

Business Requirements

- * Only team leaders and senior managers should have access to read personally identifiable information (PII).

- * All development changes must be tested in a separate environment.

- * The company requires out-of-the-box solutions, when possible.

- * Sensitive credentials, such as user passwords and API secrets, must be stored securely.

- * The Claim Submission Portal must allow citizen developers to create automated solutions.

- * Customer and appointment information must be accessible to all applications.

Planning Hub Application

The company is planning to replace the Planning Hub spreadsheet with a new application. The new application has the following requirements:

- * The application must support a component design that provides rapid changes requested by the schedulers.

- * The data model for the application must capture the following information:

- * The application must support a component design that provides rapid changes requested by the schedulers.

- * The data model for the application must capture the following information; o Information about customers such as name, address, and other PH.

- o The data and time for an assessor's or engineer's appointment. Schedulers must be able to view all appointments without filters, o Records the details of the home improvements installed for the customer, o Contains all the information and evidence for submission to the Claim Submission Portal.

- * After an assessor uploads the funding application and all evidence after a home improvement has been complete, the company requires that the status of the application is set to Submit and should run the following:

- o Retrieve the details about the customer and the improvement installed, o Send an approval to a senior manager to review and approve in Microsoft Teams.

- o Upload the information to the API endpoint.

- o If the upload fails to complete, it should retry after a delay of 30 seconds up to three times. If an error occurs after three times, the application should send an email notification to the application support team.

- o Must record the status on the funding application.

Suitability Assessment Tool

The company plans to implement a new application named the Suitability Assessment Tool for the assessors.

The new application has the following requirements:

- * Must integrate with Microsoft Power Platform.

- * Assessors must be able to complete the eligibility assessment by using the Suitability Assessment Tool. The assessors must be able to upload photographs to the on-premises file share.
- * Must be developed by using modular components that can be used by other applications.
- * Must be optimized for use on tablet devices.
- * All changes to the application must be completed in the Suitability Assessment Tool solution.

Reporting

The company has the following requirements for a reporting solution:

- * The data source for the reporting solution must support incremental refreshes.
- * The solution must report accurate data if an error occurs.

NEW QUESTION # 189

You are a Power Apps app maker with administrative rights to Microsoft 365.

You create a canvas app that will be used by employees at your company. You plan to allow users to embed the app in Microsoft Teams. During testing, the following issues are reported:

The app runs slowly when it runs in Microsoft Teams.

Test users cannot add the personal app within Microsoft Teams.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.
