TroytecDumps is a wonderful study platform that can transform your effective diligence in to your best rewards. By years of diligent work, our experts have collected the frequent-tested knowledge into our 156-587 exam materials for your reference. So our practice materials are triumph of their endeavor. By resorting to our 156-587 Exam Materials, we can absolutely reap more than you have imagined before. We have clear data collected from customers who chose our 156-587 practice materials, and the passing rate is 98-100 percent.

## CheckPoint 156-587 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Advanced Troubleshooting with Logs and Events: This section of the exam measures the skills of Check Point Security Administrators and covers the analysis of logs and events for troubleshooting. Candidates will learn how to interpret log data to identify issues and security threats effectively. |
| Topic 2 | • Introduction to Advanced Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and covers the foundational concepts of advanced troubleshooting techniques. It introduces candidates to various methodologies and approaches used to identify and resolve complex issues in network environments. |

| | |
|---|---|
| Topic 3 | • Advanced Site-to-Site VPN Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and covers troubleshooting site-to-site VPN connections. |
| Topic 4 | • Advanced Access Control Troubleshooting: This section of the exam measures the skills of Check Point System Administrators in demonstrating expertise in troubleshooting access control mechanisms. It involves understanding user permissions and resolving authentication issues. |
| Topic 5 | • Advanced Firewall Kernel Debugging: This section of the exam measures the skills of Check Point Network Security Administrators and focuses on kernel-level debugging for firewalls. Candidates will learn how to analyze kernel logs and troubleshoot firewall-related issues at a deeper level. |
| Topic 6 | • Advanced Gateway Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and addresses troubleshooting techniques specific to gateways. It includes methods for diagnosing connectivity issues and optimizing gateway performance. |
| Topic 7 | • Advanced Management Server Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and focuses on troubleshooting management servers. It emphasizes understanding server architecture and diagnosing problems related to server performance and connectivity. |

Choose a good 156-587 exam quiz and stick with it, you will be successful! Our 156-587 study questions will provide you with professional guidance and quality resources, but you must also be aware of the importance of adherence. As you know, life is like the sea. Only firm people will reach the other side. After you have chosen 156-587 Preparation materials, we will stay with you until you reach your goal.

# CheckPoint Check Point Certified Troubleshooting Expert - R81.20 Sample Questions (Q17-Q22):

**NEW QUESTION # 17**
You do not see logs in the SMS. When you login on the SMS shell and run cpwd_admin list you notice that the RFL process is with status T. What command can you run to try to resolve it?

- A. RFLstop and RFLstart
- B. smartlog_server stop and smartlog_server restart
- C. evstart and evstop
- D. rflsop and rflstart

**Answer: C**

**NEW QUESTION # 18**
The Check Point Watch Daemon (CPWD) monitors critical Check Point processes, terminating them or restarting them as needed to maintain consistent, stable operating conditions. When checking the status/output of CPWD you are able to see some columns like APP, PID, STAT, START, etc. What is the column "STAT" used for?

- A. Shows what monitoring method Watch Dog is using to track the process
- B. Shows the Watch Dog name of the monitored process
- C. Shows how many times the Watch Dog started the monitored process
- D. Shows the status of the monitored process

**Answer: D**

Explanation:

The STAT column in the output of the cpwd_admin list command shows the status of the monitored process. The possible values are E for established, meaning that the process is running, or T for terminated, meaning that the process is not running. The STAT column is useful for quickly checking if any critical process has crashed or failed to start. If the value is T, the process should be restarted and the reason for the termination should be investigated. The STAT column does not show the Watch Dog name, the number of times the process was started, or the monitoring method of the Watch Dog.

**NEW QUESTION # 19**

What is the best way to resolve an issue caused by a frozen process?

- A. Restart the process
- B. Kill the process
- C. Reboot the machine
- D. Power off the machine

**Answer: B**

Explanation:
When a process is frozen (hung or unresponsive), the typical method to resolve it is to kill the process. On Check Point, you can use cpwd_admin kill -name <ProcessName> or a standard Linux kill -9 <PID> command if necessary. You then allow CPWD (the Check Point watchdog) to restart it, or manually restart it if needed.
Other options:
A . Power off the machine: This is too drastic and not recommended just for a single frozen process.
B . Restart the process: While this sounds viable, you typically must kill the frozen process first, then let WatchDog or an admin restart it.
C . Reboot the machine: Similar to powering off-too disruptive for just one stuck process.
Hence, the most direct and standard approach:
"Kill the process."
Check Point Troubleshooting Reference
sk97638 - Explanation of CPWD (Check Point WatchDog) and how to manage processes.
sk43807 - How to gracefully stop or kill a Check Point process.
Check Point CLI Reference Guide - Details on using cpwd_admin commands to kill or restart processes.

**NEW QUESTION # 20**

Which of the following is a component of the Context Management Infrastructure used to collect signatures in user space from multiple sources, such as Application Control and IPS, and compiles them together into unified Pattern Matchers?

- A. Context Loader
- B. cpas
- C. CMI Loader
- D. PSL - Passive Signature Loader

**Answer: A**

Explanation:

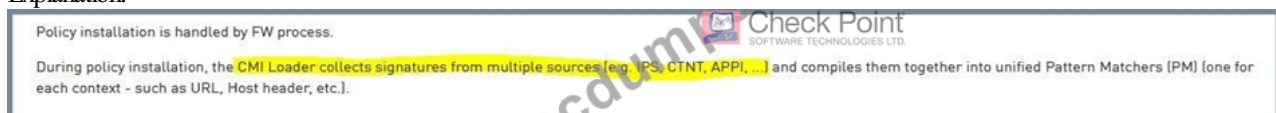

**NEW QUESTION # 21**

Which command shows the installed licenses and contracts on a Check Point device?

- A. cplic print -s
- B. fwlic print -x
- C. cplicenses print -x
- D. cplic print -x

**Answer: D**

# NEW QUESTION # 22

......

Research indicates that the success of our highly-praised 156-587 test questions owes to our endless efforts for the easily operated practice system. Most feedback received from our candidates tell the truth that our 156-587 guide torrent implement good practices, systems as well as strengthen our ability to launch newer and more competitive products. Accompanying with our 156-587 Exam Dumps, we educate our candidates with less complicated Q&A but more essential information, which in a way makes you acquire more knowledge and enhance your self-cultivation to pass the 156-587 exam.
