PMI CPMAI Exam | Valid CPMAI Exam Voucher - Excellent Website for CPMAI: Cognitive Project Management in AI (PMI-CPMAI) Exam

This is a PMI CPMAI practice exam software for Windows computers. This CPMAI practice test will be similar to the actual CPMAI exam. If user wish to test the Cognitive Project Management in AI (PMI-CPMAI) (CPMAI) study material before joining ValidExam, they may do so with a free sample trial. This CPMAI Exam simulation software can be readily installed on Windows-based computers and laptops. Since it is desktop-based CPMAI practice exam software, it is not necessary to connect to the internet to use it.

PMI Cognitive Project Management in AI (PMI-CPMAI) Sample Questions (Q87-Q92):

NEW QUESTION # 87

Upper management is looking to roll out a new product and wants to see if there are any patterns and insights that can be discovered from customer data. Your team has been tasked to discover these potential patterns and structures within this data.

Which type of machine learning approach would be most appropriate to pick for this problem?

- A. Supervised Learning
- **B. Unsupervised Learning**
- C. Reinforcement Learning
- D. All would work equally well

Answer: B

NEW QUESTION # 88

Your team is working on an AI system to provide a more personalized experience for customers on your website. What should the team do in regard to determining the pattern of AI with regards to the ROI of the project?

- **A. First identify the objective you're trying to solve or the ROI you desire and then use that to figure out the correct pattern**
- B. First identify the AI pattern you want to use and then figure out the ROI
- C. First talk to senior managers who set the ROI of the project
- D. First determine the pattern of AI you want to use and then work with stakeholders to come up with ROI

Answer: A

NEW QUESTION # 89

Your team is running a forecasting project and wants to use previous user data to better predict future outcomes. However your team doesn't have access to all the data it needs.

What's the best course of action?

- **A. Do not move forward until you have access to all the data you need.**
- B. Move ahead as planned and hope you get access to the data once you need it. Since you're using an iterative approach you can always go back to steps as needed later on.
- C. Cautiously move forward knowing you may need to pause mid-project which is ok.
- D. Move ahead as planned so you stay on time with your project.

Answer: A

NEW QUESTION # 90

Leadership wants a new HR system built that will better handle potential candidate matching. The project manager assigned to this project believes that the project is well-suited for AI, however they are unsure which pattern of AI this would be.

What should the project manager do?

- A. Pick an algorithm that seems best suited for the problem and then determine which pattern of AI it is based on the algorithm selected.
- B. Conduct a straw poll with stakeholders to determine which pattern of AI this project falls under so they can best collect the data needed and skill sets for the team.
- **C. Determine which pattern of AI this project falls under so they can best collect the data needed and skill sets for the team.**
- D. Move forward without determining which pattern of AI this falls under.

Answer: C

NEW QUESTION # 91

Your team is using a neural network algorithm to generate a Machine Learning Model. What specific artifacts need to be included? (Select all that apply.)

- **A. The algorithm code**
- **B. Supporting training data**
- **C. Hyperparameter settings**
