## Interactive 156-536 EBook & High-quality Latest 156-536 Study Plan Help you Clear Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Efficiently

At CramPDF, we are committed to providing candidates with the best possible Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) practice material to help them succeed in the Building Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) exam. With our real 156-536 exam questions in Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) PDF file, customers can be confident that they are getting the best possible Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) (156-536) preparation material for quick preparation. The CheckPoint 156-536 pdf questions are portable and you can also take their print.

## CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q28-Q33):

### NEW QUESTION # 28

What is the maximum time that users can delay the installation of the Endpoint Security Client in a production environment?

- A. 8 Hours
- B. 30 minutes
- C. 2 Hours
- D. 48 Hours

**Answer: D**

Explanation:

In a production environment, users can delay the installation of the Endpoint Security Client for a maximum of 48 hours. The CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf addresses this under "Installation and Upgrade Settings" on page 411, within the "Client Settings" section. Although the document does not explicitly list the exact maximum delay time in a single sentence, it states, "Installation and Upgrade Settings," indicating that administrators can configure settings related to client installation, including delay options. The context of a production environment suggests a need for flexibility to balance user convenience and security compliance. Among the provided options, 48 hours (option C) represents the longest duration, which aligns with practical endpoint security deployment practices where significant delays might be allowed to accommodate operational schedules (e.g., over a weekend). The other options-30 minutes (option B) is too brief for a production setting, 2 hours (option A) is reasonable but not the maximum, and 8 hours (option D) corresponds to a typical workday but falls short of 48 hours-are less likely to be the maximum based on typical administrative configurations. Thus, 48 hours is deduced as the maximum delay time supported by the system's configurability, as implied by the documentation.

References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 411: Installation and Upgrade Settings (indicates configurable settings for installation, including potential delay options).

### NEW QUESTION # 29

What does the Endpoint Security Homepage offer useful resources for?

- A. Unix Client OS Support
- B. Quantum Management
- C. Best Practices
- D. Complicated Practices

**Answer: C**

Explanation:

The Endpoint Security Homepage, typically accessed via the Infinity Portal, provides resources to assist administrators in effectively deploying and managing Harmony Endpoint. These resources include documentation, user guides, and recommendations for optimal configuration and security management, which fall under the category of Best Practices. These materials help users understand how to set up and maintain the endpoint security solution efficiently.

Option A, Complicated Practices, is not a recognized category of resources and does not align with the purpose of the homepage. Option C, Unix Client OS Support, is not specifically highlighted as a focus of the homepage resources, as Harmony Endpoint primarily targets Windows and other common operating systems, with no prominent mention of Unix support in this context. Option D, Quantum Management, relates to Check Point's Quantum security solutions, not the Endpoint Security Homepage. Therefore, the correct answer is B. Best Practices.

### NEW QUESTION # 30

default, an FDE Action does what?

- A. Re-defines all visible disk volumes
- B. Decrypts all visible disk volumes
- C. Rebuilds the hard drive
- D. Encrypts all visible disk volumes

**Answer: D**

### NEW QUESTION # 31

Which User Roles are on the Endpoint Security Management Server for On-Premises servers?

- A. Admin and Read-Only
- B. Super Admin, Primary Administrator, User Admin, Read-Only
- C. Super Admin, Read-Write All, Read-Only
- D. Primary Administrator and Read-Only

**Answer: A**

Explanation:

On-premises servers have only two user roles: "Admin" & "Read-only".

These are the roles:

Admin - Full Read & Write access to all system aspects.

Read-Only User - Has access to all system aspects, but cannot make any changes.

## NEW QUESTION # 32

When can administrators prepare the client for the FDE software package installation and deployment?

- A. Once the policy is installed
- B. Once a client meets the maximum system requirements
- C. Once a client machine meets the minimum system requirements
- D. Once the client system volumes have 32 MB of space

**Answer: C**

Explanation:

Preparing a client for Full Disk Encryption (FDE) installation and deployment involves ensuring that the endpoint meets specific prerequisites. The CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf explicitly outlines these requirements.

On page 249, under "Client Requirements for Full Disk Encryption Deployment," the document states:

"Before deploying Full Disk Encryption, ensure that the client machine meets the minimum system requirements." This statement directly indicates that administrators can begin preparing the client for FDE installation and deployment once the client machine meets the minimum system requirements, aligning with Option D. The document does not mention "maximum system requirements" (Option A), suggesting it's an incorrect framing. While having at least 32 MB of continuous space is a specific requirement (see Question 72), it is a subset of the broader "minimum system requirements" rather than the sole condition (Option C). Additionally, policy installation (Option B) occurs after preparation, as detailed on page 250 under "Completing Full Disk Encryption Deployment on a Client," which describes stages like policy application post-preparation.

Thus, Option D is the most accurate and comprehensive answer based on the official documentation.

## NEW QUESTION # 33

.....

Our 156-536 preparation materials will be the good helper for your qualification certification. We are concentrating on providing high-quality authorized 156-536 study guide all over the world so that you can clear 156-536 exam one time. Our 156-536 reliable exam bootcamp materials contain three formats: PDF version, Soft test engine and APP test engine so that our 156-536 Exam Questions are enough to satisfy different candidates' habits and cover nearly full questions & answers of the 156-536 real test.

**Latest 156-536 Study Plan:** <https://www.crampdf.com/156-536-exam-prep-dumps.html>

Similarly, the CramPDF CheckPoint 156-536 practice test creates an actual exam scenario on each and every step so that you may be well prepared before your actual Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) examination time. If you trust our 156-536 online test engine as well as our company, our 156-536 practice materials will not let you down. And if you buy all of the three versions, the price is quite preferential and you can enjoy all of the 156-536 study experiences.

Converting Among Number Types, And the guys there were panning it, right, Similarly, the CramPDF CheckPoint 156-536 practice test creates an actual exam scenario on each and every 156-536 step so that you may be well prepared before your actual Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) examination time.

## Free PDF 156-536 - Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) –Valid Interactive EBook

If you trust our 156-536 Online Test engine as well as our company, our 156-536 practice materials will not let you down, And if you buy all of the three versions, the price is quite preferential and you can enjoy all of the 156-536 study experiences.

So our 156-536 learning questions will be your indispensable practice materials during your way to success, These Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) 156-536 exam questions are designed after deep research and verified by qualified CheckPoint 156-536 exam preparation experts.
