

CMMC-CCA學習指南，CMMC-CCA題庫

此外，這些VCESoft CMMC-CCA考試題庫的部分內容現在是免費的：https://drive.google.com/open?id=1zig3Zu6_ipwIt-Qc8BWJws3oeHzJQr-

你想过怎样才能更轻松地通过Cyber AB的CMMC-CCA认证考试吗？你发现诀窍了吗？如果你不知道怎么办，我来告诉你。其實通過考試的方法有很多種。努力學習考試要求的所有的相關知識就是其中的一種方法。你現在正在這樣做嗎？但是這是最浪費時間並且很可能得不到預期的效果的方法。而且，每天都忙於工作的你恐怕沒有那麼多時間來準備考試吧？那麼試一下VCESoft的CMMC-CCA考古題吧。這個資料絕對可以讓你得到你想不到的成果。

Cyber AB CMMC-CCA 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
主題 2	<ul style="list-style-type: none">Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.
主題 3	<ul style="list-style-type: none">CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.
主題 4	<ul style="list-style-type: none">CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.

CMMC-CCA學習指南： Certified CMMC Assessor (CCA) Exam考試通過證書， Cyber AB CMMC-CCA

想獲得各種IT認證證書？为什么不嘗試VCESoft的Cyber AB CMMC-CCA最新考古題？所有的問題和答案由資深的IT專家針對相關的CMMC-CCA認證考試研究出來的。我們網站的CMMC-CCA學習資料是面向廣大群眾的，是最受歡迎且易使用和易理解的題庫資料。您可以隨時隨地在任何設備上使用Cyber AB CMMC-CCA題庫，簡單易操作，并且如果您購買我們的考古題，還將享受一年的免費更新服務。

最新的 Cyber AB CMMC CMMC-CCA 免費考試真題 (Q18-Q23):

問題 #18

An OSC seeking Level 2 certification has a fully cloud-based environment. The assessor must evaluate fulfillment of Level 2 requirements the OSC implements versus those handled by the cloud service provider.

Which document would be BEST to identify the Level 2 requirements handled by the OSC's cloud provider?

- **A. Shared Responsibility Matrix**
- B. Identity and Access Management (IAM) Plan
- C. Zero Trust Architecture
- D. Cloud Security Baseline White Paper

答案： A

解題說明：

The Shared Responsibility Matrix (Customer Responsibility Matrix) is the authoritative document that specifies which security responsibilities are owned by the OSC versus the Cloud Service Provider (CSP). This enables assessors to determine which CMMC practices apply to the OSC and which are inherited from the provider.

Exact extracts:

* "External Service Providers (ESPs), including CSPs, must provide a Shared Responsibility Matrix that delineates customer versus provider responsibilities."

* "Assessors should request and review this matrix to determine practice applicability." Why other options are incorrect:

* A: Zero Trust Architecture is a design framework, not a responsibility breakdown.

* C: White papers are marketing/technical resources, not binding assignments of responsibility.

* D: IAM Plans address access management, not overall shared responsibilities.

References:

CMMC Scoping Guide - External Service Providers.

CMMC Assessment Guide - Level 2, Use of Shared Responsibility Matrices.

問題 #19

An OSC is planning a CMMC Level 2 assessment that your C3PAO will conduct. In Phase 1.6.1 - Access and Verify Evidence, as the Lead Assessor, you are verifying the existence and accessibility of the evidence provided by the OSC. While reviewing the list of evidence mapped against the CMMC practices, you discover that the OSC cannot locate several critical system security policies for key IT systems supporting their DoD contracts. These missing policies are essential for demonstrating compliance with various CMMC practices related to access control, incident response, and system maintenance. What is the primary role of the CMMC Quality Assurance Professional (CQAP) regarding the Pre-Assessment Form?

- A. To assign roles and responsibilities for each Assessment Team member.
- **B. To verify the accuracy and completeness of the information before uploading to CMMC eMASS.**
- C. To configure access controls within the CMMC eMASS system.
- D. To schedule CMMC eMASS training sessions for C3PAO representatives.

答案： B

解題說明：

Comprehensive and Detailed in Depth Explanation:

The CQAP's primary role in Phase 1 is to ensure Pre-Assessment Form accuracy before eMASS upload (Option A). Options B, C, and D are not CQAP duties.

Extract from Official Document (CAP v1.0):

* Section 1.6 - Prepare for Assessment (pg. 18): "The CQAP verifies the accuracy and completeness of the Pre-Assessment Form data before uploading to CMMC eMASS." References:

問題 #20

An OSC specializing in developing directed energy systems plans to bid on a DoD contract to produce a 250kW High Energy Laser Weapon System (HELWS). This system is to be deployed on military bases across the globe to protect U.S. servicemen against aerial threats, including mortars, rockets, and unmanned aerial vehicles (UAVs), as well as swarms of mini-UAVs. Because of the sensitivity of the information, the OSC has prohibited using emails to transmit information regarding the project, whether encrypted or otherwise.

They also have instituted procedures to remove CUI from the email system. What CMMC assessment requirements must the Assessment Team follow regarding the OSC's email system?

- **A. Review the SSP in accordance with practice CA.L2-3.12.4 - System Security Plan.**
- B. The Assessment Team must assess the email system against all CMMC practices.
- C. Since there are measures in place to prevent CUI transfer through email, the email system is out of scope and there is no need to assess it against CMMC practices.
- D. Review the SSP in accordance with CA.L2-3.12.4 - System Security Plan and assess against other CMMC practices.

答案: A

解題說明:

Comprehensive and Detailed Explanation:

The email system is a Contractor Risk Managed Asset (CRMA), as it can but is not intended to handle CUI due to strict policies. CRMAs are in scope, and the CMMC Assessment Scope - Level 2 requires their review in the SSP per CA.L2-3.12.4 to verify compliance, but not against all practices (Options B, D). Option A is incorrect, as CRMAs are not out of scope. C is correct.

Reference:

CMMC Assessment Scope - Level 2, Section 2.3.2 (CRMAs), p. 5: "CRMAs are reviewed in the SSP per CA.L2-3.12.4."

問題 #21

Sarah, a Certified CMMC Assessor, is conducting an assessment for DataSecure, a cloud service provider that hosts various applications for the Defense Industrial Base (DIB). During the assessment, Sarah encounters a complex and highly specialized cloud architecture that leverages cutting-edge technologies such as containerization, serverless computing, and advanced security controls. As Sarah reviews the evidence provided by DataSecure for the relevant CMMC practices, she realizes that some of the evidence and implementations are unlike anything she has encountered in previous assessments. What is the most appropriate action for Sarah to take as a CCA in this scenario?

- A. Defer the assessment until she can receive additional training on the specific technologies used by DataSecure.
- **B. Thoroughly research and understand DataSecure's cloud architecture, seek clarification from subject matter experts, and evaluate the evidence within the context of their specialized environment.**
- C. Strictly adhere to a standardized assessment checklist, regardless of DataSecure's unique architecture.
- D. Request DataSecure to simplify their architecture and align with more traditional IT practices for easier evaluation.

答案: B

解題說明:

Comprehensive and Detailed in Depth Explanation:

The CAP requires assessors to adapt to unique implementations by researching and understanding them, not forcing simplification (Option A), ignoring context (Option B), or delaying unnecessarily (Option C). Option D ensures a thorough, context-aware assessment.

Extract from Official Document (CAP v1.0):

* Section 2.2 - Conduct Assessment (pg. 25): "Assessors shall research and understand unique implementations, seeking clarification from SMEs as needed." References:

CMMC Assessment Process (CAP) v1.0, Section 2.2.

問題 #22

A manufacturing company is seeking Level 2 certification. The loading docks are currently accessible directly from the company's main parking lot, which may lead to unauthorized access to facilities. Based on this information, how should this method be modified

to BEST meet Level 2 requirements?

- A. Implement physical perimeter controls, such as turnstiles, to limit access.
- B. Require visitors to check in at the reception desk and maintain a visitor log.
- C. Implement physical perimeter controls, such as cameras, to limit access to only authorized personnel.
- **D. Implement physical perimeter controls, such as a gate with a badge system, to limit access to only authorized personnel.**

答案： D

解題說明：

* Applicable Requirement: PE.L2-3.10.3 - "Control physical access to organizational systems, equipment, and the respective operating environments."

* Why D is Correct: A gate with a badge system represents preventive perimeter control that ensures only authorized personnel can access sensitive areas (e.g., loading docks). This directly aligns with Level 2 physical protection requirements.

Why Other Options Are Insufficient:

* A (Turnstiles): More relevant for internal building entry, not loading docks.

* B (Visitor log): Supports accountability, but does not prevent unauthorized entry.

* C (Cameras): Provides monitoring but not control - surveillance alone does not restrict access.

References (CCA Official Sources):

* NIST SP 800-171 Rev. 2 - PE.L2-3.10.3

* NIST SP 800-171A - PE.L2-3.10.3 Assessment Objectives
