CIMA F3 Financial Strategy Sample Questions (Q372-Q377):

NEW QUESTION # 372

CI IJ has decided to move its production plant to overseas country X. This would make the product cheaper to produce. The technology used to make the product is very advanced and some of the skilled staff would have to move to country X. The Production Director has identified that there are some political risks in moving to country X. For each of the political risks of moving to country X shown below, select the correct method for reducing the risk.

Answer:

Explanation:

NEW QUESTION # 373

Company M is a listed company in a highly technical service industry.

The directors are considering making a cash offer for the shares in Company Q, an unquoted company in the same industry.

Relevant data about Company Q:

- * The company has seen consistent growth in earnings each year since it was founded 10 years ago.
- * It has relatively few non-current assets.
- * Many of the employees are leading experts in their field. A recent exercise suggested that the value of the company's human capital exceeded the value of its tangible assets.

The directors and major shareholders of Company Q have indicated willingness to sell the company.

Before negotiations become too advanced, the directors of Company M are considering the benefits to their company that would follow the acquisition.

Which THREE of the following are the most likely benefits of the acquisition to Company M's shareholders?

- A. Improve earnings per share (EPS).
- B. Access to technical expertise.
- C. Improved asset backing for borrowing due to the acquisition of intangible assets.
- D. Gain economies of scale.
- E. Reduction of risk through diversification.

Answer: A,B,D

NEW QUESTION # 374

A company has some 7% coupon bonds in issue and wishes to change its interest rate profile.

It has decided to do this by entering into a plain coupon interest rate swap with its bank.

The bank has quoted a swap rate of 6.0% - 6.5% fixed against LIBOR.

What will the company's new interest rate profile be?

- A. VARIABLE at LIBOR + 1.0%
- B. VARIABLE at LIBOR
- C. VARIABLE at LIBOR + 0.5%
- D. FIXED at 6.5%

Answer: A

Explanation:

Company currently pays fixed 7% on its bonds.

Swap quote 6.0%-6.5% fixed against LIBOR means:

Bank will pay 6.0% fixed and receive LIBOR, or

Receive 6.5% fixed and pay LIBOR.

To move from fixed to variable, the company should receive fixed and pay LIBOR, so it takes the 6.0% fixed leg.

Net position:

Pay 7% fixed on bond

Receive 6% fixed from swap

Pay LIBOR on swap

Total = (7% # 6%) + LIBOR = LIBOR + 1%

NEW QUESTION # 375

Select the category of risk for each of the descriptions below:

Answer:

Explanation:

Explanation:

NEW QUESTION # 376

A company currently has a 5.25% fixed rate loan but it wishes to change the interest style of the loan to variable by using an interest rate swap directly with the bank.

The bank has quoted the following swap rate:

* 4.50% - 455% in exchange for Libor

Libor is currently 4%.

If the company enters into the swap and Libor remains at 4%. what will the company's interest cost be?

- **A. 4.75%**
- B. 4.70%
- C. 5.25%
- D. 4.00%

Answer: A

Explanation:

A company has a 5.25% fixed-rate loan and wants to swap it to variable using a swap quoted:

4.50% - 4.55% in exchange for Libor

(Libor currently 4%)

To turn its fixed loan into a synthetic floating-rate loan, the company needs to:

Receive fixed (to offset part of the 5.25% it pays on the loan), and

Pay Libor (to end up with variable cost).

From the swap quote, if the company wants to receive fixed, it gets the lower rate: 4.50% (the bank's bid rate).

Cash flows:

Pay 5.25% fixed on the loan

Receive 4.50% fixed on the swap

Pay Libor (4.00%) on the swap

Net cost:

$5.25\% - 4.50\% + 4.00\% = 0.75\% + 4.00\% = 4.75\%$

$50\% + 4.00\% = 0.75\% + 4.00\% = 4.75\%$

Answer to Q28: B. 4.75%
