

HOT Valid NCP-EUC Study Guide 100% Pass | Trustable Nutanix Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Valid Exam Tips Pass for sure

BTW, DOWNLOAD part of Exam4PDF NCP-EUC dumps from Cloud Storage: <https://drive.google.com/open?id=1Zb5J7vWl1-3khgDKByGwgVH4VaGZZtU2>

We understand you not only consider the quality of our Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam prepare torrents, but price and after-sales services and support, and other factors as well. So our Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam prepare torrents contain not only the high quality and high accuracy NCP-EUC Test Braindumps but comprehensive services as well. By the free trial services you can get close realization with our NCP-EUC quiz guides, and know how to choose the perfect versions before your purchase.

Finally, it is important to stay up-to-date with the latest Exam4PDF developments in the field of NCP-EUC certification exams. To prepare for the exam, it is important to study the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam questions and practice using the practice test software. The Exam4PDF is a leading platform that has been assisting the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam candidates for many years. Over this long time period countless NCP-EUC Exam candidates have passed their Nutanix NCP-EUC certification exam. They got success in NCP-EUC exam with flying colors and did a job in top world companies. It is important to mention here that the NCP-EUC practice questions played important role in their Nutanix Certification Exams preparation and their success.

NCP-EUC Valid Exam Tips, NCP-EUC New Guide Files

Now, our NCP-EUC exam questions have gained wide popularity among candidates. Almost all customers are willing to introduce our NCP-EUC practice quiz to their classmates and friends. And sometimes, they may buy our exam products together. After they have tried our study materials, most of them have successfully passed the NCP-EUC Exam and made a lot of money. There are a lot of the feedbacks that they have left on our website to praise the good quality of our exam materials.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q66-Q71):

NEW QUESTION # 66

What should the administrator use when creating a Windows 10 gold image using Calm for Citrix MCS persistent desktops?

- A. Microsoft downloaded Windows 10 ISO image.
- B. Snapshot of Citrix optimized Windows 10 image.

- C. VMware optimized Windows 10 image.
- D. Sysprepped Microsoft Windows 10 image

Answer: B

Explanation:

A snapshot is a point-in-time copy of a virtual machine that can be used as a template for creating new machines. A Citrix optimized Windows 10 image is a Windows 10 image that has been configured with best practices and optimizations for Citrix Virtual Apps and Desktops.

Using a snapshot of a Citrix optimized Windows 10 image can ensure that the persistent desktops have consistent performance, security, and user experience. It can also simplify the image management process by allowing you to update the snapshot with new patches or applications using Calm.

Calm is a tool that automates application lifecycle management across different environments. Calm can integrate with Citrix MCS to create, update, and delete virtual machines based on blueprints that define the configuration and dependencies of an application.

NEW QUESTION # 67

What should an administrator do when planning for Citrix DaaS disaster recovery?

- A. Deploy at least one Cloud Connector in every resource location.
- B. Pre-stage infrastructure components at the DR location.
- C. Plan to recover Cloud Connectors during a DR event.
- D. Deploy Cloud Connectors in DR and keep them offline. 1

Answer: A

Explanation:

According to Citrix DaaS (formerly Citrix Virtual Apps and Desktops Service) architecture on Nutanix, a Resource Location is defined by the presence of Cloud Connectors.² These connectors serve as the communication proxy between the Nutanix AHV infrastructure and the Citrix Cloud control plane.

For Disaster Recovery (DR) planning, the DR site functions as a distinct Resource Location. To ensure the DR site is available and manageable by the Citrix Cloud service during an event, an administrator must deploy at least one Cloud Connector in every resource location (though two are recommended for high availability). Keeping connectors offline (Option A) is unsupported because they require continuous connectivity to receive automatic updates; if they are offline for too long (tombstone life), they become invalid. Recovering connectors during an event (Option D) increases RTO unnecessarily. Therefore, establishing the DR site as a valid resource location with active Cloud Connectors is the correct planning step.

NEW QUESTION # 68

An administrator plans to deploy a VMWare Horizon Solution on AHV. The administrator used the cluster command to verify if Shadow Clones are enabled in the AHV environment. This command shows the following output:

Which action should the administrator take to enable Shadow Clones?

- A. Execute the `cluster edit-prms enable-shadow-clones=true` command.
- B. Connect to the AHV Host by SSH.
- C. Execute the `cluster enable -cluster _cluster_uid 0xxx - show_clones=true` command.
- D. Connect to Prism Central

Answer: C

Explanation:

An action that the administrator should take to enable Shadow Clones for a VMWare Horizon Solution on AHV is Connect to Prism Central and execute the `cluster enable -cluster _cluster_uid 0xxx - show_clones=true` command. Shadow Clones are a feature that helps decrease read latency by creating local copies of frequently accessed data blocks on each host.² To enable Shadow Clones, the administrator needs to connect to Prism Central and run a cluster command with the appropriate parameters.¹

NEW QUESTION # 69

An administrator is using EUC broker software to manage and direct connections to virtual desktops and applications. After losing power to a host in the cluster, the administrator needs to make sure the broker VMs restart. What will happen to the broker VMs in this situation?

- A. The VMs will live migrate to a powered-on host.
- **B. Built-in AHV policies will automatically restart the VMs.**
- C. A policy must be created so the VMs will power back on.
- D. The VMs will remain powered off until the host is back online.

Answer: B

Explanation:

Nutanix AHV includes a native feature called VM High Availability (VMHA), which protects VMs in the event of a host failure (such as power loss).

When a host fails, the Acropolis High Availability service detects the failure. Built-in AHV policies automatically restart the affected VMs on the remaining healthy hosts in the cluster.

Live migration (Option D) is not possible because the host is already down (powered off), meaning the memory state cannot be transferred; the VMs must be restarted (booted) on new hosts. No manual policy creation (Option B) is required as this is a core default function of the AHV cluster, provided resources are available.

NEW QUESTION # 70

An administrator needs to configure a VM with UEFI. When attempting to boot the VM via PXE in a Nutanix cluster using Nutanix IPAM, the VM fails to boot.

What is the most likely cause of this failure?

- A. The VM is using a SATA controller.
- B. The VM has insufficient memory.
- **C. SDM boot ISO is required with UEFI.**
- D. UEFI boot requires manual MAC assignment.

Answer: C

Explanation:

When using Nutanix IPAM (Managed Network) for DHCP, the built-in DHCP service has limitations regarding UEFI PXE boot support (specifically regarding the dynamic delivery of architecture-specific boot files like bootx64.efi vs undionly.kpxe).

To successfully provision UEFI VMs in this scenario-particularly for Citrix Provisioning Services (PVS)- the BDM (Boot Device Manager) ISO (referred to here as SDM boot ISO due to common industry acronym variance in exam banks) is required. The BDM ISO allows the VM to boot directly from a virtual CD-ROM that contains the bootstrap information needed to contact the provisioning server, bypassing the limitations of the IPAM PXE implementation for UEFI workloads.

NEW QUESTION # 71

.....

The product Exam4PDF provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you pass the NCP-EUC exam by the method which is convenient for you. It is not only cheaper than other dumps but also more effective. The high pass rate of our NCP-EUC Study Materials has been approved by thousands of candidates, they recognized our website as only study tool to pass NCP-EUC exam.
