

# Visual F5CAB1 Cert Test & Vce F5CAB1 Torrent

Our F5CAB1 exam materials are compiled by experts and approved by the professionals who are experienced. They are revised and updated according to the pass exam papers and the popular trend in the industry. The language of our F5CAB1 exam torrent is simple to be understood and our F5CAB1 test questions are suitable for any learners. Only 20-30 hours are needed for you to learn and prepare our F5CAB1 Test Questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn.

Our F5CAB1 exam training' developers to stand in the perspective of candidate and meet the conditions for each user to tailor their F5CAB1 learning materials. What's more, our F5CAB1 guide questions are cheap and cheap, and we buy more and deliver more. The more customers we buy, the bigger the discount will be. In order to make the user a better experience to the superiority of our F5CAB1 Actual Exam guide, we also provide considerate service, users have any questions related to our F5CAB1 study materials, can get the help of our staff in a timely manner.

## Vce F5CAB1 Torrent & Pdf F5CAB1 Exam Dump

There are multiple choices on the versions of our F5CAB1 learning guide to select according to our interests and habits since we have three different versions of our F5CAB1 exam questions: the PDF, the Software and the APP online. The Software and APP online versions of our F5CAB1 preparation materials can be practiced on computers or phones. They are new developed for the reason that electronics products have been widely applied to our life and work style. The PDF version of our F5CAB1 Actual Exam supports printing, and you can practice with papers and take notes on it.

## F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q25-Q30):

### NEW QUESTION # 25

What command will allow the BIG-IP Administrator to view the configured management IP of a BIG-IP system?  
(Choose one.)

- A. tmsh show sys management-ip
- B. tmsh list sys management-route

- C. tmsh list net self
- D. tmsh list sys management-ip

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation (Paraphrased)

The BIG-IP stores the configured management IP address as a system configuration object under the /sys hierarchy.

To display configured (persistent) values, BIG-IP uses the tmsh list command, not show.

Why tmsh list sys management-ip is correct

\* The management IP configuration is defined under:

\* /sys management-ip

\* Running:

\* tmsh list sys management-ip

displays:

\* The configured management IP address

\* Netmask

\* Associated attributes

This command shows the actual configured management IP, which is what the question asks for.

Why the other options are incorrect

A). tmsh show sys management-ip

\* The show command is used for runtime statistics and status.

\* management-ip is a configuration object, not a statistics object.

C). tmsh list sys management-route

\* Displays management routing information, not the management IP address itself.

D). tmsh list net self

\* Displays Self IPs used on the data plane.

\* Does not show the management interface IP.

## NEW QUESTION # 26

In order to configure allowed IP addresses for SSH access to a BIG-IP device, the BIG-IP Administrator has issued the commands shown in the exhibit.

Which IP addresses will have SSH access after issuing the shown commands?

(Choose two.)

- A. 100.0.1.10
- B. 10.0.0.256
- C. 100.0.0.10
- D. 10.0.0.100
- E. 10.0.0.254

**Answer: D,E**

Explanation:

From the exhibit, the administrator performs the following actions:

\* Displays the current SSH allow configuration:

```
tmsh list sys sshd allow
```

```
allow { ALL }
```

\* Replaces the existing SSH allow list with a specific subnet:

```
tmsh modify sys sshd allow replace-all-with { 10.0.0.0/24 }
```

\* Confirms the updated configuration:

```
tmsh list sys sshd allow
```

```
allow { 10.0.0.0/24 }
```

This configuration restricts SSH access to only hosts that fall within the 10.0.0.0/24 network.

Evaluation of the options

A). 10.0.0.100

This address is within the 10.0.0.0/24 subnet and is a valid host address, so SSH access is permitted.

B). 10.0.0.254

This address is also within the 10.0.0.0/24 subnet and is a valid host address, so SSH access is permitted.

C). 10.0.0.256

This is not a valid IP address because an IPv4 octet cannot exceed 255.

D). 100.0.1.10

This address is outside the configured 10.0.0.0/24 subnet and will not be allowed.

E). 100.0.0.10

This address is also outside the configured subnet and will not be allowed.

### NEW QUESTION # 27

An organization is planning to upgrade a BIG-IP system from 6.1.x to 7.1.x.

For a successful upgrade, the Service Check Date must be equal to or newer than the License Check Date required for 7.1.x.

Which command will show the Service Check Date on the BIG-IP system being upgraded?

- A. `grep "Service check date" /config/bigip.conf`
- B. `grep "Service check date" /config/svc_chk_date.dat`
- C. `grep "Service check date" /config/BigDB.dat`
- D. `grep "Service check date" /config/bigip.license`

**Answer: D**

Explanation:

BIG-IP licensing information, including the Service Check Date, is stored in the file:

`/config/bigip.license`

This file contains all license attributes downloaded from the F5 licensing server, including:

- \* License key
- \* Licensed modules
- \* Useful life date
- \* Service check date

The Service Check Date determines whether the system is eligible for upgrades to specific TMOS versions.

When reviewing upgrade readiness, administrators extract this value directly from the license file with:

`grep "Service check date" /config/bigip.license`

Why the other options are incorrect:

- \* `/config/bigip.conf` stores BIG-IP configuration objects, not license metadata.
- \* `/config/svc_chk_date.dat` is not a valid file in the licensing system; it does not contain license parameters.
- \* `/config/BigDB.dat` stores internal database values, not licensing attributes.

Thus, only the `bigip.license` file contains the correct licensing information required for verifying upgrade eligibility.

### NEW QUESTION # 28

Which configuration file can a BIG-IP administrator use to verify the provisioned modules?

- A. `/config/bigip_base.conf`
- B. `/config/bigip.license`
- C. `/var/local/ucs/config.ucs`
- D. `/config/bigip.conf`

**Answer: D**

Explanation:

Provisioning settings define which modules are enabled and how system resources are allocated to them.

These provisioning declarations are stored in:

`/config/bigip.conf`

This file contains:

- \* Full module provisioning statements
- \* TMSH-equivalent provisioning configurations such as:
  - \* `sys provision ltm { level nominal }`
  - \* `sys provision asm { level nominal }`

It is the primary system configuration file that stores all active provisioning details.

Why the other answers are incorrect

A). `/config/bigip.license`

\* Shows licensed modules, not provisioned modules.

B). `/config/bigip_base.conf`

\* Stores base networking (VLANs, Self-IPs, routes), not provisioning.  
D). config.ucs  
\* A backup archive, not a live configuration file.  
Thus, the correct file to review active module provisioning is /config/bigip.conf.

#### NEW QUESTION # 29

A BIG-IP Administrator needs to purchase new licenses for a BIG-IP appliance.

The administrator needs to know:

- \* Whether a module is licensed
- \* The memory requirement for that module

Where should the administrator view this information in the System menu?

- A. Configuration - Device
- **B. Resource Provisioning**
- C. Software Management
- D. Configuration - OVSDDB

**Answer: B**

#### NEW QUESTION # 30

.....

For candidates who are going to buy the F5CAB1 training materials online, they have the concern of the safety of the website. Our F5CAB1 training materials will offer you a clean and safe online shopping environment, since we have professional technicians to examine the website and products at times. In addition, F5CAB1 Training Materials have 98.75% pass rate, and you can pass the exam. We also pass guarantee and money back guarantee if you fail to pass the exam.

**Vce F5CAB1 Torrent:** <https://www.vceprep.com/F5CAB1-latest-vce-prep.html>

After almost 10 years' research and development, we are finally able to guarantee that our F5CAB1 pass-sure guide files will be your trustful partner in your preparation. Thus, this demonstration will enable them to scrutinize the quality of the BIG-IP Administration Install, Initial Configuration, and Upgrade (F5CAB1) study material, F5 Visual F5CAB1 Cert Test. It takes a lot of effort and hard work to get the results, F5 Visual F5CAB1 Cert Test. The characteristics of the three versions is that they own the same questions and answers but different displays.

This makes art accessible to pretty much anyone and gives new and emerging F5CAB1 artists an opportunity to get promoted and sell their work. This is largely to ensure that lists remain low volume" or announcement only.

### **F5CAB1 free study torrent & F5CAB1 latest training dumps & F5CAB1 test practice vce**

After almost 10 years' research and development, we are finally able to guarantee that our F5CAB1 pass-sure guide files will be your trustful partner in your preparation.
