If you want to advance in this fast-growing technological world, IAPP CIPM certification is a must. Yet, the common problem the aspiring candidates undergo is seeking updated, authentic, and trustworthy IAPP CIPM Dumps for the most cherished CIPM certification exam.

IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q123-Q128):

NEW QUESTION # 123

Which statement is FALSE regarding the use of technical security controls?

- A. Technical security controls deployed for one jurisdiction often satisfy another jurisdiction.
- **B. Most privacy legislation lists the types of technical security controls that must be implemented.**
- C. A person with security knowledge should be involved with the deployment of technical security controls.
- D. Technical security controls are part of a data governance strategy.

Answer: B

Explanation:

The statement that is false regarding the use of technical security controls is that most privacy legislation lists the types of technical security controls that must be implemented. Technical security controls are the hardware and software components that protect a system against cyberattacks, such as encryption, firewalls, antivirus software, and access control mechanisms¹. However, most privacy legislation does not prescribe specific types of technical security controls that must be implemented by organizations. Instead, they usually require organizations to implement reasonable or appropriate technical security measures to protect personal data from unauthorized or unlawful access, use, disclosure, alteration, or destruction^{2,3}. The exact level and type of technical security controls may depend on various factors, such as the nature and sensitivity of the data, the risks and threats involved, the state of the art technology available, and the cost and feasibility of implementation⁴. Therefore, organizations have some flexibility and discretion in choosing the most suitable technical security controls for their data processing activities. Reference: 1: Technical Controls - Cybersecurity Resilience - Resilient Energy Platform; 2: [General Data Protection Regulation (GDPR) - Official Legal Text], Article 32; 3: [Privacy Act 1988], Schedule 1 - Australian Privacy Principles (APPs), APP 11; 4: Technical Security Controls: Encryption, Firewalls & More

NEW QUESTION # 124

What is the main function of the Asia-Pacific Economic Cooperation (APEC) Privacy Framework?

- A. Establishing legal requirements for privacy protection in the region.
- **B. Promoting consumer trust and business confidence in cross-border data flows.**
- C. Managing the data flows from parties outside the region.
- D. Promoting privacy protection technologies developed in the region.

Answer: B

NEW QUESTION # 125

In a mobile app for purchasing and selling concert tickets, users are prompted to create a personalized profile prior to engaging in transactions. Once registered, users can securely access their profiles within the app, empowering them to manage and modify personal data as needed.

Which foundational Privacy by Design (PbD) principle does this feature follow?

- A. Proactive, not reactive; preventative, not remedial.
- B. Full functionality - positive-sum, not zero-sum
- **C. Respect for user privacy - keep it user-centric.**
- D. End-to-end security - full life cycle protection.

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

This scenario follows the Privacy by Design (PbD) principle of "Respect for User Privacy - Keep it User-Centric" because it gives users direct control over their personal data, allowing them to access, modify, and manage their information.

* Option A (Proactive, not reactive; preventative, not remedial) emphasizes anticipating privacy risks before they arise, which is not the focus of this feature.

* Option B (Full functionality - positive-sum, not zero-sum) refers to integrating privacy protections without sacrificing usability or security.

* Option D (End-to-end security - full life cycle protection) relates to safeguarding data throughout its entire life cycle, which is not the main principle demonstrated in this scenario.

NEW QUESTION # 126

SCENARIO

Please use the following to answer the next QUESTION:

John is the new privacy officer at the prestigious international law firm - A&M LLP. A&M LLP is very proud of its reputation in the practice areas of Trusts & Estates and Merger & Acquisition in both U.S. and Europe.

During lunch with a colleague from the Information Technology department, John heard that the Head of IT, Derrick, is about to outsource the firm's email continuity service to their existing email security vendor - MessageSafe. Being successful as an email hygiene vendor, MessageSafe is expanding its business by leasing cloud infrastructure from Cloud Inc. to host email continuity service for A&M LLP.

John is very concerned about this initiative. He recalled that MessageSafe was in the news six months ago due to a security breach. Immediately, John did a quick research of MessageSafe's previous breach and learned that the breach was caused by an unintentional mistake by an IT administrator. He scheduled a meeting with Derrick to address his concerns.

At the meeting, Derrick emphasized that email is the primary method for the firm's lawyers to communicate with clients, thus it is critical to have the email continuity service to avoid any possible email downtime.

Derrick has been using the anti-spam service provided by MessageSafe for five years and is very happy with the quality of service provided by MessageSafe. In addition to the significant discount offered by MessageSafe, Derrick emphasized that he can also speed up the onboarding process since the firm already has a service contract in place with MessageSafe. The existing on-premises email continuity solution is about to reach its end of life very soon and he doesn't have the time or resource to look for another solution.

Furthermore, the off-premises email continuity service will only be turned on when the email service at A&M LLP's primary and secondary data centers are both down, and the email messages stored at MessageSafe site for continuity service will be automatically deleted after 30 days.

Which of the following is a TRUE statement about the relationship among the organizations?

- A. Cloud Inc. should enter into a data processor agreement with A&M LLP.
- B. MessageSafe is liable if Cloud Inc. fails to protect data from A&M LLP.
- C. Cloud Inc. must notify A&M LLP of a data breach immediately.
- D. A&M LLP's service contract must be amended to list Cloud Inc. as a sub-processor.

Answer: B

Explanation:

A true statement about the relationship among the organizations is that MessageSafe is liable if Cloud Inc.

fails to protect data from A&M LLP. This statement reflects the principle of accountability under the GDPR, which requires data controllers and processors to be responsible for complying with the GDPR and demonstrating their compliance⁴ As a data processor for A&M LLP, MessageSafe is liable for any damage caused by processing that infringes the GDPR or by processing that does not comply with A&M LLP's lawful instructions⁵ This liability extends to any sub-processors that MessageSafe engages to carry out specific processing activities on behalf of A&M LLP⁵ Therefore, if Cloud Inc., as a sub-processor for MessageSafe, fails to protect data from A&M LLP and causes harm to the data subjects or breaches the GDPR or A&M LLP's instructions, MessageSafe will be held liable for such failure and may have to pay compensation or face administrative fines or other sanctions⁶ References: 4: Article 5 GDPR | General Data Protection Regulation (GDPR); 5: Article 82 GDPR | General Data Protection Regulation (GDPR); 6: Article 83 GDPR | General Data Protection Regulation (GDPR)

NEW QUESTION # 127

If done correctly, how can a Data Protection Impact Assessment (DPIA) create a win/win scenario for organizations and individuals?

- A. By quickly identifying potentially problematic data attributes and reducing the risk exposure.
- B. By allowing Data Controllers to solicit feedback from individuals about how they feel about the potential data processing.
- C. By enabling Data Controllers to be proactive in their analysis of processing activities and ensuring compliance with the law.
- D. By better informing about the risks associated with the processing activity and improving the organization's transparency with individuals.

Answer: D

Explanation:

Explanation

A Data Protection Impact Assessment (DPIA) is a process that organizations use to evaluate the potential risks associated with a specific data processing activity, and to identify and implement measures to mitigate those risks. By conducting a DPIA, organizations can proactively identify and address potential privacy concerns before they become a problem, and ensure compliance

with data protection laws and regulations.

When organizations are transparent about their data processing activities and the risks associated with them, individuals are better informed about how their personal data is being used and can make more informed decisions about whether or not to provide their personal data. This creates a win/win scenario for organizations and individuals, as organizations are able to continue processing personal data in a compliant and transparent manner, while individuals are able to trust that their personal data is being used responsibly.

Additionally, by engaging with individuals in the DPIA process and soliciting their feedback, organizations can better understand the potential impact of their data processing activities on individuals and take steps to mitigate any negative impacts.

NEW QUESTION # 128

It is acknowledged that high-quality service after sales plays a vital role in enhancing the relationship between the company and customers. Therefore, we, as a leader in the field specializing in the {Examcode} exam material especially focus on the service after sales. In order to provide the top service after sales to our customers, our customer agents will work in twenty four hours, seven days a week. So after buying our CIPM Study Material, if you have any doubts about the {Examcode} study guide or the examination, you can contact us by email or the Internet at any time you like. We Promise we will very happy to answer your question with more patience and enthusiasm and try our utmost to help you out of some troubles. So don't hesitate to buy our {Examcode} test torrent, we will give you the high-quality product and professional customer services.
