We have the first-rate information safety guarantee system for the buyers who buy the NSE4_FGT_AD-7.6 questions and answers of our company, we can ensure that the information of your name, email, or product you buy. We respect the private information of every customer, and we won't send the junk information to you to bother. Besides, you will get NSE4_FGT_AD-7.6 Questions and answers downloading link within ten minutes, and our system will send you the update version to your mailbox.

You can trust Exam-Killer NSE4_FGT_AD-7.6 exam questions and start this journey with complete peace of mind and satisfaction. The Exam-Killer NSE4_FGT_AD-7.6 practice questions are designed and verified by experienced and qualified NSE4_FGT_AD-7.6 exam experts. They work collectively and put their expertise to ensure the top standard of Exam-Killer Fortinet NSE4_FGT_AD-7.6 Exam Dumps. So we can say that with the Exam-Killer Fortinet NSE4_FGT_AD-7.6 exam questions, you will get everything that you need to learn, prepare and pass the difficult Fortinet NSE 4 - FortiOS 7.6 Administrator certification exam with good scores.

Test NSE4_FGT_AD-7.6 Price - NSE4_FGT_AD-7.6 Reliable Braindumps

If you hope to get a job with opportunity of promotion, it will be the best choice chance for you to choose the NSE4_FGT_AD-7.6 study question from our company. Because our NSE4_FGT_AD-7.6 study materials have the enough ability to help you improve yourself and make you more excellent than other people. The NSE4_FGT_AD-7.6 Learning Materials from our company have helped a lot of people get the certification and achieve their dreams. And you also have the opportunity to contact with the NSE4_FGT_AD-7.6 test guide from our company.

Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q57-Q62):

NEW QUESTION # 57

Refer to the exhibit. The NOC team connects to the FortiGate GUI with the NOC_Access admin profile. They request that their

GUI sessions do not disconnect too early during inactivity. What must the administrator configure to answer this specific request from the NOC team?

- A. Move NOC_Access to the top of the list to ensure all profile settings take effect.
- **B. Increase the offline value of the Override Idle Timeout parameter in the NOC_Access admin profile.**
- C. Ensure that all NOC_Access users are assigned the super_admin role to guarantee access
- D. Increase the admintimeout value under config system accprofile NOC_Access.

Answer: B

Explanation:

You can override the idle timeout setting per administrator profile using the Override Idle Timeout setting.

You can configure an administrator profile to increase inactivity timeout and facilitate use of the GUI for central monitoring. Then Override Idle Timeout setting allows the admintimeout value, under the config system accprofile, to be overridden per access profile..

NEW QUESTION # 58

Refer to the exhibit.

FortiGate has two separate firewall policies for Sales and Engineering to access the same web server with the same security profiles. Which action must the administrator perform to consolidate the two policies into one?

- A. Replace port1 and port2 with the any interface in a single firewall policy.
- B. Create an Interface Group that includes port1 and port2 to create a single firewall policy.
- **C. Enable Multiple Interface Policies to select port1 and port2 in the same firewall policy.**
- D. Select port1 and port2 subnets in a single firewall policy.

Answer: C

Explanation:

However, you can enable the Multiple Interface Policies option on the Feature Visibility page to disable the single interface restriction.

NEW QUESTION # 59

A FortiGate firewall policy is configured with active authentication, however, the user cannot authenticate when accessing a website. Which protocol must FortiGate allow even though the user cannot authenticate?

- A. TACASC+
- **B. DNS**
- C. Kerberos
- D. LDAP

Answer: B

Explanation:

DNS traffic must be allowed so the user can resolve domain names and reach the authentication server or web resources, even if authentication initially fails.

NEW QUESTION # 60

An administrator wants to form an HA cluster using the FGCP protocol. Which two requirements must the administrator ensure both members fulfill? (Choose two answers)

- A. They must have the heartbeat interfaces in the same subnet.
- **B. They must have the same HA group ID.**
- C. They must have the same number of configured VDOMs.
- **D. They must have the same hard drive configuration.**

Answer: B,D

Explanation:

"To successfully form an HA cluster, you must ensure that the members have the same:

* Model: hardware model or VM model

* Firmware version

* Licensing: includes the FortiGuard license, virtual domain (VDOM) license, FortiClient license, and so on

* Hard drive configuration: the same number and size of drives and partitions

* Operating mode: the operating mode-NAT mode or transparent mode-of the management VDOM."

"From a configuration and setup point of view, you must ensure that the HA settings on each member have the same group ID, group name, password, and heartbeat interface settings. Try to place all heartbeat interfaces in the same broadcast domain, or for two-member clusters, connect them directly." Technical Deep Dive:

The correct answers are A and D.

A is correct because FGCP cluster formation requires matching HA parameters, and group ID is explicitly one of them. If the group ID differs, the units will not consider each other part of the same cluster during HA discovery and election.

D is correct because FortiGate HA expects hardware parity in critical platform characteristics, including hard drive configuration. If disk layout differs, the members do not satisfy the HA formation prerequisites.

B is incorrect because the study guide does not require heartbeat interfaces to be in the same IP subnet. The requirement is that heartbeat links be in the same broadcast domain, or directly connected in a two-node design. In practice, heartbeat links are Layer 2 adjacency links; IP subnet matching is not the stated requirement.

C is incorrect because the guide does not say both units must start with the same number of configured VDOMs. What must match is the licensing level and the operating mode of the management VDOM. After cluster formation, the primary synchronizes its configuration to the secondary.

A practical verification set before forming FGCP HA is:

```
get system status
```

```
show system ha
```

```
diagnose sys ha status
```

Operationally, FGCP then uses the heartbeat links for member discovery, health monitoring, election, and config/session synchronization. On supported hardware, session forwarding and HA processing can still benefit from FortiGate's ASIC-assisted architecture, but HA state, config sync, and election logic remain control-plane functions handled by FortiOS.

NEW QUESTION # 61

Refer to the exhibits. A web filter profile configuration and firewall policy configuration are shown. You are trying to access www.facebook.com, but you are redirected to a FortiGuard web filtering block page. Based on the exhibits, what is the possible cause of the issue?

web filter profile configuration

FORTINET

FortiGuard Intrusion Prevention - Access Blocked

Web Page Blocked

You have tried to access a web page that is in violation of your Internet usage policy.

Category Malicious Websites
URL <https://www.facebook.com/>

To have the rating of this web page re-evaluated [please click here](#).

- A. The web filter profile feature set is configured incorrectly.
- B. For www.facebook.com, the URL filter action is incorrect.
- C. The firewall policy inspection mode is incorrect.
- D. The web rating override configuration is incorrect.

Answer: D

Explanation:

The web filter profile shows a URL filter override for www.facebook.com with action Monitor, which should allow access. However, the block page shows FortiGuard categorizing www.facebook.com as Malicious Websites and blocking it. This indicates that the web rating override configuration is incorrect (the override is not applied properly), so FortiGuard's default category action takes precedence and blocks the site.

NEW QUESTION # 62

.....

You can alter the duration and quantity of Fortinet NSE4_FGT_AD-7.6 questions in these Fortinet NSE4_FGT_AD-7.6 practice exams as per your training needs. For offline practice, our NSE4_FGT_AD-7.6 desktop practice test software is ideal. This NSE4_FGT_AD-7.6 software runs on Windows computers. The NSE4_FGT_AD-7.6 web-based practice exam is compatible with all browsers and operating systems.

Test NSE4_FGT_AD-7.6 Price: https://www.exam-killer.com/NSE4_FGT_AD-7.6-valid-questions.html

If you have any doubt about our NSE4_FGT_AD-7.6 pass dumps, welcome you to contact us via on-line system or email address, Before you buy our products, you can download the Test NSE4_FGT_AD-7.6 Price - Fortinet NSE 4 - FortiOS 7.6 Administrator free demo questions to have a try, Fortinet Printable NSE4_FGT_AD-7.6 PDF Our experts will check it to see if there are any updates every day, if any, they will sent the updated one to our users immediately to save time and improve efficiency for them, The service of NSE4_FGT_AD-7.6 test guide is very prominent.

Whom do you have in mind as the intended reader, Text can be loaded from a server or placed directly on the Stage, If you have any doubt about our NSE4_FGT_AD-7.6 pass dumps, welcome you to contact us via on-line system or email address.
