Salesforce Certified Identity and Access Management Architect Sample Questions (Q21-Q26):

NEW QUESTION # 21

Universal containers (UC) would like to enable self - registration for their salesforce partner community users.

UC wants to capture some custom data elements from the partner user, and based on these data elements, wants to assign the appropriate profile and account values. Which two actions should the architect recommend to UC? Choose 2 answers

- A. Modify the `communitiesselfregcontroller` to assign the profile and account.
- B. Configure registration for communities to use a custom visualforce page.
- C. Configure registration for communities to use a custom apex controller.
- D. Modify the selfregistration trigger to assign profile and account.

Answer: A,B

NEW QUESTION # 22

A client is planning to rollout multi-factor authentication (MFA) to its internal employees and wants to understand which authentication and verification methods meet the Salesforce criteria for secure authentication.

Which three functions meet the Salesforce criteria for secure mfa?

Choose 3 answers

- A. Username and password + security key
- B. Certificate-based Authentication
- C. username and password + SMS passcode
- D. Lightning Login
- E. Third-party single sign-on with Mobile Authenticator app

Answer: A,D,E

NEW QUESTION # 23

Universal Containers (UC) is considering a Customer 360 initiative to gain a single source of the truth for its customer data across disparate systems and services. UC wants to understand the primary benefits of Customer 360 Identity and how it contributes to successful Customer 360 Truth project.

What are two are key benefits of Customer 360 Identity as it relates to Customer 360?

Choose 2 answers

- A. Customer 360 Identity enables an organization to build a single login for each of its customers, giving the organization an understanding of the user's login activity across all its digital properties and applications.
- B. Customer 360 Identity supports multiple brands so you can deliver centralized identity services and correlation of user activity, even if it spans multiple corporate brands and user experiences.
- C. Customer 360 Identity not only provides a unified sign up and sign in experience, but also tracks anonymous user activity prior to signing up so organizations can understand user activity before and after the users identify themselves.
- D. Customer 360 Identity automatically integrates with Customer 360 Data Manager and Customer 360 Audiences to seamlessly populate all user data.

Answer: A,B

NEW QUESTION # 24

Which three are capabilities of SAML-based Federated authentication? Choose 3 answers

- A. Centralized federation provides single point of access, control and auditing

- B. Access tokens are used to access resources on the server once the user is authenticated.
- C. Trust relationships between Identity Provider and Service Provider are required.
- D. SAML tokens can be in XML or JSON format and can be used interchangeably.
- E. Web applications with no passwords are more secure and stronger against attacks.

Answer: A,B,C

NEW QUESTION # 25

Universal Containers (UC) has built a custom based Two-factor Authentication (2fa) system for their existing on-premise applications. They are now implementing Salesforce and would like to enable a Two-factor login process for it, as well. What is the recommended solution an architect should consider?

- A. Replace the custom 2fa system with Salesforce 2fa for on-premise application and Salesforce.
- B. Use custom login flows to connect to the existing custom 2fa system for use in Salesforce.
- C. Replace the custom 2fa system with an app exchange app that supports on-premise applications and Salesforce.
- D. Use the custom 2fa system for on-premise applications and native 2fa for Salesforce.

Answer: B

NEW QUESTION # 26

.....
