- D. Any ITIL user.

**Answer: B**

## NEW QUESTION # 79
When can a user choose from multiple rate types for their work, while logging a time card?

- A. Only if the capability is enabled in the Time Sheet Policies
- B. Only if this capability is enabled in the Project Record
- C. Only one (1) rate type can apply
- D. Only if the capability is enabled in the Project Preferences

**Answer: A**

Explanation:
Explanation
According to the Using rate types and labor rate cards document, a user can choose from multiple rate types for their work, while logging a time card, only if the capability is enabled in the Time Sheet Policies. This capability allows users to select different rate types for different tasks, such as standard, overtime, or travel.
The other options are not correct, as they are not the places where the capability can be enabled. The Project Record is used to create and update project details, such as name, description, and state. The Project Preferences are used to set the default values for project fields, such as number, type, and priority. The option C is not correct, as more than one rate type can apply if the capability is enabled.

## NEW QUESTION # 80

## NEW QUESTION # 82

What are the default project template configuration records available in the Template Config module?
Choose 3 answers

- A. Project template
- B. Project subtask
- C. Project task
- D. Project
- E. Task

**Answer: A,C,D**

Explanation:

the default project template configuration records available in the Template Config module are Project task, Project, and Project template. These records define the fields and values that are copied from the template to the project when a project is created from a template. The other options are incorrect because:

B . Project subtask: Project subtask is not a valid record in the Template Config module, as it is a child of the Project task record2.

D . Task: Task is not a valid record in the Template Config module, as it is a parent of the Project task record3.
