Whenever you have problems about our NCP-US study materials, you can contact our online workers via email. We warmly welcome you to experience our considerate service.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q69-Q74):

NEW QUESTION # 69

An administrator wants to monitor their Files environment for suspicious activities, such as mass deletion or access denials.

How can the administrator be alerted to such activities?

How can the administrator be alerted to such activities?

- A. Configure Files to use ICAP servers, with monitors for desired activities.
- B. Create a data protection policy in the Files view in Prism Central.
- C. Configure Alerts & Events in the Files Console, filtering for Warning severity.
- D. Deploy the Files Analytics VM, and configure anomaly rules.

Answer: D

NEW QUESTION # 70

An administrator needs to ensure maximum performance, throughput, and redundancy for the company's Oracle RAC on Linux implementation, while using the native method for securing workloads.

Which configuration meets these requirements?

- A. Volumes with MPIO and a single vDisk
- B. Volumes with CHAP and multiple vDisks
- C. Files with a distributed share and ABE
- D. Files with a general purpose share and File Blocking

Answer: A

NEW QUESTION # 71

Deploying Files instances require which two minimum resources? (Choose two)

- A. 12 GiB of memory per host
- B. 8 GiB of memory per host
- C. 8 vCPUs per host
- D. 4 vCPUs per host

Answer: B,D

NEW QUESTION # 72

An administrator needs to analyze data created by a custom application, which writes data into an SMB share hosted on Files. This application uses custom-built file extensions such as .zyx, . zzz, the administrator needs to provide a collapsed view of space usage, number of files, and changes within a given time frame.

How should the administrator provide the required information?

- A. Create a File Server Resource Manager MMC and use File Screens,
- B. Add a new' file category in File Analytics and use File Distribution View,
- C. Go to Files, select the share used by the application and point to Usage View.
- D. Configure SNMP server with Nutanix MIBS and use Excel to analyze traps.

Answer: B

Explanation:

According to File Auditing and Analytics for your Nutanix Files Enterprise Cloud¹, File Analytics is a feature that captures real-time user audit data and file metadata for Nutanix Files environments. It allows you to create custom reports based on various criteria such as file type, size, owner, access time, etc.

According to Nutanix Files 3.8 and File Analytics 3.0 | Nutanix Community², File Analytics allows you to add new file categories based on custom file extensions such as .zyx or .zzz. You can then use File Distribution View to see a collapsed view of space usage, number of files, and changes within a given time frame for each file category.

Therefore, if the administrator needs to analyze data created by a custom application that uses custom-built file extensions such as .zyx or .zzz, they can add a new file category in File Analytics and use File Distribution View to provide the required information.

NEW QUESTION # 73

An administrator manages a three-node AHV cluster running Nutanix Files and is attempting a Files scale-out operation on a multi-node FSVM deployment. However, the operation has failed. What should the administrator do first?

- A. Add DNS entries
- B. Expand the AHV cluster
- C. Failover to secondary site
- D. Add RAM to the physical hosts

Answer: B

NEW QUESTION # 74
