

BIG-IP Administration Data Plane Configuration exam questions & F5CAB3 torrent vce & BIG-IP Administration Data Plane Configuration pdf dumps

Once bit twice shy! Many candidates feel depressed since they failed before, and someone choose to delay exams, someone may choose to give up. Cheer up! Our latest F5 F5CAB3 exam review questions will be your best savior and help you out of failure experience. Yes. We are the best authorized legal company which offers Valid F5CAB3 Exam Review questions many years, we are entitled as the best high passing rate provider now.

It is known to us that our F5CAB3 study materials are enjoying a good reputation all over the world. Our study materials have been approved by thousands of candidates. You may have some doubts about our product or you may suspect the pass rate of it, but we will tell you clearly, it is totally unnecessary. If you still do not trust us, you can choose to download demo of our F5CAB3 Test Torrent. Now I will introduce you our F5CAB3 exam tool in detail, I hope you will like our F5CAB3 exam questions.

2026 Test F5CAB3 Question | High-quality 100% Free Valid BIG-IP Administration Data Plane Configuration Test Review

It is known to us that getting the F5CAB3 certification is not easy for a lot of people, but we are glad to tell you good news. The study materials from our company can help you get the F5CAB3 certification in a short time. Now we are willing to introduce our F5CAB3 practice questions to you in detail, we hope that you can spare your valuable time to have a look to our F5CAB3 Exam questoins. Please believe that we will not let you down. You can just free download the demo of our F5CAB3 training guide on the web to know the excellent quality.

F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q13-Q18):

NEW QUESTION # 13

A Standard Virtual Server reports poor network performance for Internet-based clients.

What configuration should be applied?

- A. Client TCP: f5-tcp-wan / Server TCP: f5-tcp-lan
- B. Client TCP: f5-tcp-lan
- C. Client TCP: f5-tcp-optimized
- D. Client TCP: f5-tcp-lan / Server TCP: f5-tcp-wan

Answer: A

Explanation:

WAN TCP profiles are optimized for high latency and packet loss typical of Internet clients, while LAN profiles are ideal for backend servers.

NEW QUESTION # 14

Refer to the exhibit.

General Properties

Visit Us: Brave-Dumps.com

Name: VS-DNS

Partition / Path: Common

Description:

Type: Standard

Source Address: 192.168.100.0/23

Destination Address/Mask: 192.168.21.50

Service Port: 53

Notify Status to Virtual Address: ☒

Link: None

Availability: ☒ Unknown (Enabled) - The children pool member(s) eit

Syncookie Status: Off

State: Enabled

Configuration: Advanced

Protocol: TCP

Protocol Profile (Client): tcp

Protocol Profile (Server): (Use Client Profile)

DNS queries from two internal DNS servers are being load-balanced to external DNS servers via a virtual server on a BIG-IP device. The DNS queries originate from:

192.168.10.100

192.168.10.200

and target:

192.168.2.150

All DNS queries destined for the external DNS servers fail.

Which property change should the BIG-IP Administrator make in the Virtual Server to resolve this issue? (Choose one answer)

- A. Source Address to 192.168.10.0/24
- B. Type to Performance (HTTP)
- C. Protocol to UDP
- D. Protocol profile (Client) to DNS_OPTIMIZED

Answer: C

Explanation:

DNS traffic is primarily transported using UDP port 53. In the exhibit, the Virtual Server is configured with the Protocol set to TCP,

which prevents standard DNS queries from being processed correctly. BIG-IP Virtual Servers must be configured with the correct Layer 4 protocol to match the application traffic they are handling.

According to the BIG-IP Administration: Data Plane Configuration documentation:

The Protocol setting on a Virtual Server defines whether traffic is processed as TCP, UDP, or another supported transport protocol. Standard DNS queries and responses use UDP, while TCP is only required for DNS zone transfers (AXFR) or exceptionally large responses.

When a DNS Virtual Server is incorrectly configured with TCP, UDP-based DNS queries are dropped, causing all requests to fail.

Why the other options are incorrect:

A . Protocol profile (Client) to DNS_OPTIMIZED

A DNS profile enhances DNS functionality but does not correct an incorrect transport protocol configuration.

B . Type to Performance (HTTP)

Performance (HTTP) Virtual Servers are designed for HTTP traffic and are not suitable for DNS services.

C . Source Address to 192.168.10.0/24

The existing source IPs already fall within the allowed range, so this setting does not address the failure.

Correct Resolution:

Changing the Protocol to UDP aligns the Virtual Server with standard DNS transport requirements, allowing DNS queries to be successfully processed and load-balanced.

NEW QUESTION # 15

A node is a member of multiple pools hosting different web applications. If one application fails, only that pool member should be marked down.

What should be configured?

- A. HTTP monitor with custom send/receive
- B. UDP monitor
- C. TCP monitor
- D. ICMP + TCP monitor

Answer: A

Explanation:

Application-specific health checks must validate application responses, which requires HTTP monitors with custom send/receive strings.

NEW QUESTION # 16

A BIG-IP Administrator needs to configure health monitors for a pool containing HTTP, HTTPS, FTP, and SSH services.

Which configuration ensures accurate member status?

- A. All monitors with Availability Requirement = at least one
- B. HTTP and HTTPS only
- C. ICMP + TCP with all
- D. All monitors with Availability Requirement = all

Answer: A

Explanation:

Using "at least one" ensures each member is marked up based on its relevant service monitor.

NEW QUESTION # 17

All pool members are online. All other virtual server settings are at default.

What might alter the load balancing behavior? (Choose one answer)

- A. Adding a persistence profile
- B. Enabling SNAT automap
- C. Enabling a fallback host in the HTTP profile
- D. Adding a OneConnect profile

Answer: A

Explanation:

By default, BIG-IP load balancing algorithms (such as Round Robin) distribute connections evenly across all available pool members. However, persistence profiles override normal load balancing decisions by forcing subsequent connections from a client to be sent to the same pool member.

According to the BIG-IP Administration: Data Plane Configuration documentation:

Persistence creates a client-to-server mapping that is honored before load balancing algorithms are applied.

When persistence is enabled, BIG-IP may repeatedly select the same pool member even if others are available.

This directly alters load balancing behavior.

Why the other options are incorrect:

A . Adding a OneConnect profile

OneConnect optimizes server-side TCP connections but does not change which pool member is selected.

B . Enabling SNAT automap

SNAT affects source address translation, not pool member selection.

C . Enabling a fallback host in the HTTP profile

A fallback host is only used when no pool members are available.

Correct Resolution:

Adding a persistence profile alters load balancing behavior by maintaining client affinity to a specific pool member.

NEW QUESTION # 18

.....

Our company has built the culture of integrity from our establishment. You just need to pay the relevant money for the F5CAB3 practice materials. Our system will never deduct extra money from your debit cards. Also, your payment information of the F5CAB3 Study Materials will be secret. No one will crack your passwords. Our payment system will automatically delete your payment information once you finish paying money for our F5CAB3 exam questions.

Valid F5CAB3 Test Review: <https://www.dumpsactual.com/F5CAB3-actualtests-dumps.html>

Just choose the right DumpsActual F5CAB3 exam questions format demo and download it quickly, F5 Test F5CAB3 Question The reasons are as follows, We want to finish long term objectives through customer satisfaction and we have achieved it already by our excellent F5CAB3 exam questions, Here's where DumpsActual comes in with actual F5CAB3 Questions.
