## Pass with AWS Certified Developer AWS-Developer valid cram & AWS-Developer practice dumps

Our AWS-Developer study materials are designed carefully. We have taken all your worries into consideration. Also, we adopt the useful suggestions about our AWS-Developer study materials from our customers. Now, our study materials are out of supply. Thousands of people will crowd into our website to choose the AWS-Developer study materials. So people are different from the past. Learning has become popular among different age groups. Our AWS-Developer Study Materials truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our Amazon study materials a chance? Our products will live up to your expectations.

To be eligible for the AWS-Certified-Developer-Associate certification exam, candidates must have at least one year of experience in developing and maintaining applications on AWS. They must also have a strong understanding of AWS core services and be able to design and deploy scalable, fault-tolerant, and highly available applications on AWS.

## Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q294-Q299):

### NEW QUESTION # 294

A Developer is making changes to a custom application that is currently using AWS Elastic Beanstalk.

After the Developer completes the changes, what solutions will update the Elastic Beanstalk environment with the new application version? (Choose two.)

- A. Package the application code into a .zip file, create a new application version from the packaged application by using AWS CLI, then update the environment by using AWS CLI
- B. Package the application code into a .tar file, create a new application version from the AWS Management Console, then update the environment by using AWS CLI
- C. Package the application code into a .zip file, create a new application version from the AWS Management Console, then rebuild the environment by using AWS CLI
- D. Package the application code into a .tar file, and upload and deploy the packaged application from the AWS Management Console
- E. Package the application code into a .zip file, and upload, then deploy the packaged application from the AWS Management Console

**Answer: A,E**

#### NEW QUESTION # 295

A company is using an Amazon API Gateway REST API endpoint as a webhook to publish events from an on-premises source control management (SCM) system to Amazon EventBridge. The company has configured an EventBridge rule to listen for the events and to control application deployment in a central AWS account.

The company needs to receive the same events across multiple receiver AWS accounts. How can a developer meet these requirements without changing the configuration of the SCM system?

- A. Deploy the API Gateway REST API to all the receiver AWS accounts. Create as many SCM webhooks as the number of AWS accounts.
- B. Convert the API Gateway type from REST API to HTTP API
- C. Grant permission to the central AWS account for EventBridge to access the receiver AWS accounts. Add an EventBridge event bus on the receiver AWS accounts as the targets to the existing EventBridge rule
- D. Deploy the API Gateway REST API to all the required AWS accounts. Use the same custom domain name for all the gateway endpoints so that a single SCM webhook can be used for all events from all accounts.

**Answer: D**

#### NEW QUESTION # 296

What item operation allows the retrieval of multiple items from a DynamoDB table in a single API call?

- A. BatchGetItem
- B. GetItemRange
- C. GetMultipleItems
- D. GetItem

**Answer: A**

Explanation:

Explanation

[https://docs.aws.amazon.com/amazondynamodb/latest/APIReference/API\\_BatchGetItem.html](https://docs.aws.amazon.com/amazondynamodb/latest/APIReference/API_BatchGetItem.html)

#### NEW QUESTION # 297

A Developer has published an update to an application that is served to a global user base using Amazon CloudFront. After deploying the application, users are not able to see the updated changes.

How can the Developer resolve this issue?

- A. Remove the origin from the CloudFront configuration and add it again.
- B. Disable forwarding of query strings and request headers from the CloudFront distribution configuration.
- C. Disable the CloudFront distribution and enable it again to update all the edge locations.
- D. Invalidate all the application objects from the edge caches.

**Answer: A**

### NEW QUESTION # 298

An organization has 10 departments. The organization wants to track the AWS usage of each department. Which of the below mentioned options meets the requirement?

- A. Create separate accounts for each department and track them separately
- **B. Create separate accounts for each department, but use consolidated billing for payment and tracking**
- C. Setup IAM groups for each department and track their usage
- D. Setup IAM users for each department and track their usage

**Answer: B**

Explanation:

The cost of an IAM user or groups can never be tracked separately for the purpose of billing.

The best solution in this case is to create a separate account for each department and use consolidated billing.
