If you are determined to learn some useful skills, our C_SIGDA_2403 practice material will be your good assistant. Then you will seize the good chance rather than others. Time and tide wait for no man. You cannot depend on others to change your destiny.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q22-Q27):

NEW QUESTION # 22

What are the typical roles required in Process Mining projects? Note: There are 3 correct answers to this question.

- A. Process Manager

- B. Process Owner
- C. Data & IT Expert
- D. Process Analyst
- E. Project Lead

Answer: B,C,D

Explanation:

Process Mining projects require a combination of technical, analytical, and process-specific expertise.

According to the SAP Signavio documentation:

* Option A (Data & IT Expert): This role is responsible for extracting and preparing data from source systems, configuring ETL pipelines, and ensuring data quality for Process Mining analysis.

* Option C (Process Analyst): The Process Analyst interprets Process Mining results, identifies improvement opportunities, and translates insights into actionable recommendations.

* Option E (Process Owner): The Process Owner provides domain knowledge, defines analysis objectives, and ensures that Process Mining outcomes align with business goals.

* Option B (Project Lead) is incorrect as, while a project lead may oversee the project, it is not a role specifically required for Process Mining tasks.

NEW QUESTION # 23

What color have blockers that have an information purpose?

- A. Green
- B. Blue
- C. Red
- D. White

Answer: B

NEW QUESTION # 24

What are use cases for a Parallel Gateway? Note: There are 2 correct answers to this question.

Answer:

Explanation:

B,D

NEW QUESTION # 25

What are some filters that are available in the search function in SAP Signavio Process Collaboration Hub? Note: There are 3 correct answers to this question.

- A. Dictionary entries
- B. Files
- C. Models
- D. IT Systems
- E. Attributes

Answer: A,C,E

Explanation:

In the SAP Signavio Process Collaboration Hub, the search function offers several filters to help users find specific content quickly and efficiently. These filters include Attributes, Models, and Dictionary entries.

Attributes allow users to search based on specific characteristics or properties of processes, facilitating targeted search results.

Models filter enables users to narrow down search results to specific types of process models, enhancing the relevance of the results.

Dictionary entries filter aids in finding terms and definitions that are crucial for understanding and aligning on process terminology across the organization. IT Systems and Files are not listed as standard filters within the SAP Signavio Process Collaboration Hub.

NEW QUESTION # 26

How does Process Mining help companies? Note: There are 2 correct answers to this question.

- **A. By preparing data that's used when analyzing processes**
- B. By creating different data views
- **C. By adapting to rapid changes in the global market and customer expectations**
- D. By analyzing user experience and visualizing them in the Collaboration Hub

Answer: A,C

Explanation:

Process Mining in SAP Signavio enables companies to gain insights into their actual process execution, supporting data-driven decision-making. The SAP Signavio documentation explains:

* Option A (By preparing data that's used when analyzing processes): Process Mining involves extracting and transforming event log data from source systems, preparing it for analysis to uncover process inefficiencies, bottlenecks, or deviations. This data preparation is a core function of Process Mining.

* Option C (By adapting to rapid changes in the global market and customer expectations): By providing visibility into real process performance, Process Mining helps companies identify areas for improvement, enabling them to adapt processes to meet changing market demands and customer needs, such as faster delivery or improved service quality.

* Option B (By analyzing user experience and visualizing them in the Collaboration Hub) is incorrect because user experience analysis is more aligned with Customer Journey Mapping, not Process Mining, which focuses on process execution data.
