Free PDF 2026 GH-900: Efficient Valid GitHub Foundations Guide Files

There are only key points in our GH-900 training materials. From the experience of our former customers, you can finish practicing all the contents in our GH-900 guide quiz within 20 to 30 hours, which is enough for you to pass the GH-900 Exam as well as get the related certification. That is to say, you can pass the GH-900 exam as well as getting the related certification only with the minimum of time and efforts under the guidance of our study prep.

Microsoft GitHub Foundations Sample Questions (Q125-Q130):

NEW QUESTION # 125

You've made changes in a branch called feature-update and now want to merge it into the main branch of the same repository. What is the correct base and compare setup when opening a pull request?

- A. Base: main, Compare: feature-updateright
- B. Base: feature-update, Compare: main
- C. Base: develop, Compare: main
- D. Base: main, Compare: main

Answer: A

Explanation:

The base branch is where the changes will be merged into (usually main), and the compare branch is where the changes are coming from (feature-update).

Option A is CORRECT because when creating a pull request, the base branch is the one you want to merge your changes into (in this case, main), and the compare branch is the one that contains the new changes (in this case, feature-update).

NEW QUESTION # 126

A new team member has joined an open-source software project hosted on GitHub. They want to contribute but are unsure about the team's expectations on things like code formatting, pull request procedures, and how to report bugs effectively. At the same time, another contributor is asking which document outlines who should review changes made to specific parts of the codebase. Which of the following files should each of these contributors refer to for their specific concerns? (Choose two.)

- A. CONTRIBUTING - Explains how contributors should interact with the repository, including guidelines for reporting issues, submitting pull requests, and coding standardsright
- B. CODEOWNERS - Identifies individuals or teams responsible for reviewing changes to certain files or directoriesright
- C. README - Provides an overview of the project, including its purpose, installation steps, and usage examples
- D. LICENSE - Specifies how others can legally use, modify, and distribute the code

Answer: A,B

Explanation:

The new team member should refer to the CONTRIBUTING file, which outlines guidelines for reporting issues, submitting pull requests, and coding standards, ensuring they follow best practices. The contributor asking about code review responsibilities should check the CODEOWNERS file, as it specifies which individuals or teams are responsible for reviewing changes in particular areas of the codebase.

Option C is CORRECT because the CONTRIBUTING file serves as a guide for contributors, explaining how they can get

involved, the expected coding style, how to report bugs, and how to make pull requests.

Option D is CORRECT because the CODEOWNERS file assigns responsibility for reviewing changes in specific files or directories to designated users or teams, which automates the review workflow in GitHub.

NEW QUESTION # 127

What should a user follow to see public activity on their personal dashboard? (Choose two.)

- A. stars
- B. organizations
- C. people
- D. enterprises
- E. teams

Answer: B,C

Explanation:

To see public activity on your GitHub dashboard, you must follow people and organizations to see their public actions, and watch repositories to receive updates on their activity. The dashboard will then display their public activity, including new discussions, sponsorships, repositories, and issues, as well as actions like starring, forking, and pushing commits.

How to See Public Activity:

1. Follow Users:

Navigate to a user's profile page.

Click the "Follow" button under their profile picture.

2. Follow Organizations:

Go to the organization's profile page.

Follow the organization to see its public activity, such as new discussions or repositories.

NEW QUESTION # 128

What folder is the definition files stored in when creating custom issue forms?

- A. `.github/ISSUE_TEMPLATE`
- B. `.issues/ISSUE_TEMPLATE`
- C. `.GitHub`
- D. `.issues`

Answer: A

Explanation:

When creating custom issue forms on GitHub, the definition files are stored in the `.github/ISSUE_TEMPLATE` folder. This directory is used to define issue templates and forms that help standardize the information collected when users open new issues in the repository.

The `.github` folder is a special directory used for various repository configurations and workflows.

NEW QUESTION # 129

Workflows can reference actions in:

(Each correct answer presents a complete solution. Choose three.)

- A. An enterprise marketplace.
- B. Any public repository.

- C. The same repository as your workflow file.
- D. GitHub Packages.
- E. A published Docker container image on Docker Hub.

Answer: B,C,E

Explanation:

As mentioned in the answer to Question no. 66, GitHub Actions workflows can reference actions from a variety of sources:

Any Public Repository:

Option A is correct. Actions can be sourced from any public GitHub repository.

The Same Repository as Your Workflow File:

Option B is correct. Actions within the same repository as the workflow file can be referenced directly.

A Published Docker Container Image on Docker Hub:

Option E is correct. Workflows can also use actions provided as Docker container images from Docker Hub.

Incorrect Options:

Option C and D are not relevant for directly referencing actions in workflows.
