

C_CPI_2506 Prüfungsfragen Prüfungsvorbereitungen 2026: SAP Certified Associate - Integration Developer - Zertifizierungsprüfung SAP C_CPI_2506 in Deutsch Englisch pdf downloaden

Auf der Webseite Zertprüfung können Sie sich mühelos auf die SAP C_CPI_2506 Zertifizierungsprüfung vorbereiten und auch manche häufig vorkommenden Fehler vermeiden. Unsere Berufsgruppe aus gut ausgebildeten und erfahrenen IT-Eliten haben die Entwicklungen der ständig veränderten IT-Branche untersucht und erforscht, dann schließen Sie die Fragenkataloge zur SAP C_CPI_2506 Zertifizierungsprüfung für Zertprüfung zusammen. Diese SAP C_CPI_2506 Fragenkataloge verfügen über hohe Genauigkeit und Autorität. Zertprüfung wird Ihre beste Wahl sein!

SAP C_CPI_2506 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Thema 2	SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Thema 3	Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Thema 4	SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

C_CPI_2506 Zertifizierungsfragen, SAP C_CPI_2506 PrüfungFragen

Prüfungsfragen und Antworten zur C_CPI_2506 Zertifizierung verändern sich immer wegen der Entwicklung der IT-Technik. Deshalb sind Dumps von Zertprüfung immer aktualisiert. Und wenn sie die Prüfungsunterlagen zur SAP C_CPI_2506 Zertifizierung von Zertprüfung kaufen, bietet Zertprüfung Ihnen einjährigen kostenlosen Aktualisierungsservice. Solange die exam Fragen aktualisiert sind, werden wir Ihnen die neuesten C_CPI_2506 Prüfungsmaterialien senden. Damit können Sie jederzeit die neueste Version haben. Zertprüfung kann sowohl Ihnen helfen, die Prüfung zu bestehen, als auch die neuesten Kenntnisse zu beherrschen. Verpassen Sie bitte nicht preiswerte Unterlagen.

SAP Certified Associate - Integration Developer C_CPI_2506 Prüfungsfragen mit Lösungen (Q55-Q60):

55. Frage

Which SAP offering manages integrations across hybrid and multcloud environments?

- A. SAP Integration Suite manages integrations across hybrid and multcloud environments.
- B. SAP Cloud Platform Integration manages integrations across hybrid and multcloud environments.
- C. SAP Business Technology Platform manages integrations across hybrid and multcloud environments.
- D. SAP process Orchestration manages integrations across hybrid and multcloud environments.

Antwort: A

Begründung:

SAP Integration Suite is the strategic integration platform-as-a-service (iPaaS) from SAP. It provides a comprehensive set of integration capabilities for hybrid and multcloud landscapes.

It connects on-premise SAP systems, cloud SAP solutions (e.g., S/4HANA Cloud, SuccessFactors, Ariba), and third-party applications.

It offers capabilities like Cloud Integration, API Management, Event Mesh, Open Connectors, and Integration Advisor to support various integration patterns.

SAP explicitly positions Integration Suite as the solution to manage end-to-end integrations across heterogeneous and distributed IT landscapes.

Other options:

SAP Cloud Platform Integration was the older name of Cloud Integration (now part of Integration Suite).

SAP Process Orchestration is the legacy on-premise middleware and not designed for multcloud/hybrid environments.

SAP BTP is the overall platform; integration is only one capability within it.

56. Frage

You have created an API provider of the type Internet. What http response code indicates success?

- A. 0
- B. 1
- C. 2
- D. 3

Antwort: C

Begründung:

The http response code that indicates success is 200. The 200 response code means that the request was successfully processed and the response contains the expected data. Other response codes in the 2xx range also indicate success, but with some variations. For example, 201 means that a resource was created, 202 means that a request was accepted but not completed yet, and 204 means that there is no content in the response. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

57. Frage

Which log level must you use to examine the payload at specific processing steps in an integration flow?

- A. Debug
- B. Info
- C. Error
- D. Trace

Antwort: D

Begründung:

In SAP Cloud Integration, the log levels are:

Info # Default, logs basic execution details.

Debug # Logs processing steps, but not message payload.

Error # Logs only failures.

Trace # Captures message payloads at specific processing steps, used for deep troubleshooting.

Thus, to examine payload at runtime, the log level must be set to Trace.

58. Frage

Which Integration Flow element is best suited for executing custom Logic on the received cloud event data?

- A. Employ a Mule Expression component
- **B. Run a Groovy script**
- C. Use an external REST API
- D. Use a Java connector

Antwort: B

Begründung:

For executing custom logic inside an integration flow:

Groovy script (via Script step) is the supported mechanism in SAP Cloud Integration.

External REST APIs can enrich data but are not for embedded custom logic execution.

Mule components are not part of SAP CPI.

Java connectors are not directly supported in SAP CPI runtime.

Thus, the best suited for executing custom logic is Groovy script.

59. Frage

Which of the following API modeling languages can you use to describe APIs? Note: There are 2 correct answers to this question.

- A. CXML
- **B. RAML**
- C. HTML
- **D. OpenAPI**

Antwort: B,D

Begründung:

In SAP API Management, supported API description languages include:

RAML (RESTful API Modeling Language)

OpenAPI Specification (OAS, formerly Swagger)

Both are industry-standard languages for modeling REST APIs.

Other options:

A). HTML # A markup language for UI, not an API modeling language.

D). CXML (Commerce XML) # A B2B procurement standard, not for API modeling.

60. Frage

.....

Zertprüfung aktualisiert ständig die Prüfungsfragen und Antworten. Das bedeutet, dass Sie jederzeit die neuesten Schulungsmaterialien zur C_CPI_2506 Prüfung bekommen können. Solange das Prüfungsziel geändert wird, ändern wir unsere Lernmaterialien entsprechend. Unser Zertprüfung kennt die Bedürfnisse aller Kandidaten und hilft Ihnen mit dem günstigen Preis und guter Qualität, die C_CPI_2506 Prüfung zu bestehen und das Zertifikat zu bekommen.
