We have prepared our USGBC LEED-Green-Associate Training Materials for you. They are professional practice material under warranty. Accompanied with acceptable prices for your reference, all our materials with three versions are compiled by professional experts in this area more than ten years long.

## USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Project Surroundings and Public Outreach: This section of the exam measures the skills of community engagement specialists and covers the environmental impacts of buildings, green building codes, and the values of sustainable design. It also includes regional design considerations and public outreach strategies.</li> </ul>

## Excel in Your USGBC LEED-Green-Associate Exam with TestInsides: The Quick Solution for Success

If you want to get something done, just roll up your sleeves and do it. If you want to clear LEED-Green-Associate exam, let our training online files help you. The more difficult the thing is the more important and useful it is. USGBC LEED-Green-Associate training online files help your difficult thing become simple. Professionals be professionals! People can be defeated, but can't be beat. If you are determined to get a IT certification, you should not give up if you fail exam. Our LEED-Green-Associate Training Online files will be the right exam materials for your choice.

### USGBC LEED Green Associate Exam Sample Questions (Q260-Q265):

#### NEW QUESTION # 260

LEED certification steps generally proceed in which of the following order?

- A. Project Registration, Application Preparation, Submission, Application Review, Certification
- B. Select LEED rating system, Submission, Application Review, Project Registration, Certification
- C. Application Preparation, Project Registration, Application Review, Submission, Certification
- D. Application Preparation, Application Review, Project Registration, Submission, Certification

**Answer: A**

Explanation:

This is the correct order of the LEED certification process for most projects<sup>1</sup>. The first step is to register the project on LEED Online and pay the registration fee<sup>2</sup>. The second step is to prepare the application by collecting and uploading the required information and documents according to the chosen rating system and credits<sup>2</sup>. The third step is to submit the application and pay the certification fee<sup>2</sup>. The fourth step is to undergo the application review by a LEED accredited third party, which may request clarifications or corrections<sup>2</sup>. The final step is to receive the certification decision and the LEED plaque and certificate<sup>2</sup>.

#### NEW QUESTION # 261

When a developer builds a new shopping center in a rural area, one externality might be

- A. an increase in traffic on adjacent roads
- B. an increase in the fees for customer parking
- C. an increase in installation of rooftop solar
- D. an increase in profits for the developer

**Answer: A**

Explanation:

Explanation

An externality is a consequence of an economic activity that affects other parties who are not directly involved in the activity. Externalities can be positive or negative, depending on whether they create benefits or costs for others. When a developer builds a new shopping center in a rural area, one externality might be an increase in traffic on adjacent roads. This is a negative externality because it imposes costs on other road users who are not part of the development project, such as increased travel time, fuel consumption, air pollution, noise pollution, and accident risk<sup>13</sup>. References: LEED v4 Green Associate Candidate Handbook<sup>1</sup>, Investopedia's Externality

#### NEW QUESTION # 262

Which of the following is an Environmental Concern when referring to Energy and Atmosphere?

- A. Ventilation levels
- B. Resource depletion
- C. Occupant comfort

- D. Use of native species

**Answer: B**

Explanation:

Explanation

Resource depletion is a major environmental concern related to energy use. The extraction and use of non-renewable energy resources (such as fossil fuels) can lead to their depletion over time. This is why strategies that reduce energy use or utilize renewable energy sources are important in green building practices. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

### NEW QUESTION # 263

The intent of waste management in the Materials and Resources credit category is to

- A. reduce the amount of waste and toxins hauled to landfills
- B. promote the use of rapidly renewable resources
- C. increase the use of pre-consumer/post-consumer recycled content
- D. specify the use of green materials

**Answer: A**

Explanation:

Explanation

The intent of waste management in the Materials and Resources credit category is to reduce the amount of waste and toxins hauled to landfills. This can be achieved through strategies such as recycling, composting, reusing materials, and reducing overall material consumption. By reducing waste, we can conserve natural resources, reduce pollution from waste treatment and disposal processes, and decrease the demand for landfill space. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

### NEW QUESTION # 264

Energy and Atmosphere Credit encompasses

- A. integrative process, building loads and EQ
- B. site selection, site design and environmental concerns
- C. building loads, energy performance management and EQ
- D. building loads, energy performance management and environmental concerns

**Answer: C**

Explanation:

The Energy and Atmosphere Credit in LEED encompasses building loads, energy performance management, and environmental quality (EQ). Building loads refer to the amount of energy consumed by a building's systems, such as heating, cooling, lighting, and equipment. Energy performance management involves strategies to reduce energy consumption and improve efficiency. Environmental quality refers to the conditions inside the building, including air quality, thermal comfort, and access to daylight and views. Reference: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

### NEW QUESTION # 265

.....

High quality and high accuracy LEED-Green-Associate real materials like ours can give you confidence and reliable backup to get the certificate smoothly because our experts have extracted the most frequent-tested points for your reference, because they are proficient in this exam who are dedicated in this area over ten years. Besides, from economic perspective, our LEED-Green-Associate study dumps are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment, our LEED-Green-Associate real materials will make you satisfied. Our LEED-Green-Associate exam materials can provide integrated functions. You can learn a great deal of knowledge and get the certificate of the exam at one order like win-win outcome at one try.
