Providing You Reliable C_WME_2506 Mock Exam with 100% Passing Guarantee

One of the best ways to prepare for the SAP C_WME_2506 exam is to study the SAP Certified Associate - WalkMe Digital Adoption Consultant (C_WME_2506) exam questions. Familiarizing yourself with the C_WME_2506 certification using practice test on real-world data sets can help you build your confidence and prepare you for the exam. Additionally, taking C_WME_2506 Exam Questions and quizzes can help you identify areas where you need to improve and gauge your understanding of the material.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q27-Q32):

NEW QUESTION # 27

You have created a Smart Walk-Thru to guide users creating a new department on a site. Depending on which option users select from a dropdown at one step in the process, they may need to complete a few additional items before moving forward. Which WalkMe feature could help address this alternate path in a Smart Walk-Thru?

- A. Split
- B. Wait For Condition
- C. Popup Step
- D. Start Point

Answer: A

Explanation:

The Split feature in a Smart Walk-Thru allows Builders to create alternate paths based on user actions or conditions, such as selecting a specific dropdown option. In this case, if users choose a dropdown option that requires additional steps, the Split feature can branch the Smart Walk-Thru to guide them through those steps before rejoining the main flow. This ensures the Smart Walk-Thru adapts dynamically to user choices, providing tailored guidance.

The other options are incorrect:

- * Start Point(A) defines where a Smart Walk-Thru begins, not alternate paths.
- * Wait For Condition(B) pauses the flow until a condition is met, not for branching.
- * Popup Step(D) displays a message or input field, not for managing alternate paths.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2:

Smart Walk-Thrus):

"The Split feature enables branching in Smart Walk-Thrus based on user actions, such as dropdown selections, allowing customized guidance for different paths." The course Getting Started with Building WalkMe Solutions explains:

"Use Split steps to handle alternate paths in a Smart Walk-Thru, like additional steps for specific dropdown choices, ensuring flexible and accurate guidance." Option C, Split, is the correct feature for this scenario.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2: Smart Walk-Thrus.

WalkMe Editor User Guide, "Split Steps" Section.

Course: Getting Started with Building WalkMe Solutions, Module 6: Advanced Smart Walk-Thru Features.

NEW QUESTION # 28

While doing Quality Assurance for a SmartTip, you notice that when you scroll up and down the page the SmartTip appears to scroll up and down as well before snapping back to its proper location next to your element. Which configuration should you adjust to fix this?

- A. Display Condition
- B. Selected Element → Appears and disappears as a result of end user action
- C. Lock to Element
- D. Z-Index

Answer: C

NEW QUESTION # 29

Why is it recommended to disable the multi-language Manual Toggle when using the multi-language Auto-Toggle?

- A. To ensure that the Manual Toggle is only available for administrators
- B. Because the Manual Toggle and Auto-Toggle can cause the page to refresh unexpectedly
- **C. To prevent conflicts where the user's Manual Toggle choice overrides the Auto-Toggle settings**
- D. Because Manual Toggle consumes more resources than Auto-Toggle

Answer: C

NEW QUESTION # 30

In the Editor, a Shuttle has a full green circle next to it when looking at the Production environment. How would you describe the status of this Shuttle?

- **A. Published to Production**
- B. Archived in Production
- C. Published to Production but has been modified
- D. Draft mode in Test

Answer: A

NEW QUESTION # 31

Your product team has informed you that there is a UI element on the website that has no purpose, is causing user confusion, and they need it removed. They also mentioned that they don't have enough development resources to remove it for at least a few weeks. What WalkMe solution can you build to help resolve this issue?

- A. Build a Resource to a support article on the UI element.
- B. Build a Mini Menu and place it next to the button.
- C. Build a mandatory field Launcher and place it on top of the UI element.
- **D. Build a Launcher that will cover up the UI element and make it invisible.**

Answer: D

Explanation:

WalkMe Launchers are on-screen elements that can be configured to trigger actions or content, such as Smart Walk-Thrus, Resources, or Shuttles. A key feature of Launchers is their ability to be customized for visibility and positioning, including the option to make them "invisible" by adjusting transparency settings. This makes them ideal for temporarily covering a problematic UI element without requiring code changes to the underlying website. By placing an invisible Launcher over the unwanted UI element, the Builder can block user interaction with it, effectively "hiding" it until developers can remove it.

The other options are less effective for this use case:

- * A mandatory field Launcher is not a standard WalkMe feature; Launchers are not tied to form validation or mandatory fields.
- * A Resource to a support article provides information but doesn't prevent users from interacting with the confusing UI element.
- * A Mini Menu is a navigational tool for accessing content and cannot cover or hide a UI element.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.3: Launchers):

"Launchers can be customized to be fully transparent using the ghost icon in the WalkMe Editor, allowing them to overlay and block interaction with specific UI elements without being visible to the end user. This is useful for temporarily disabling problematic elements." The course Advancing Your Skills in Building WalkMe Solutions notes:

"In scenarios where a UI element causes confusion and cannot be removed immediately, an invisible Launcher can be placed over the element to prevent user interaction, serving as a temporary workaround." Option D is the correct solution, as it directly addresses the need to make the UI element inaccessible without requiring development resources.
