They got help from ActualVCE C_SAC_2501 Practice Questions and easily got success in the final SAP Certified Associate - Data Analyst - SAP Analytics Cloud certification exam. You can also trust ActualVCE C_SAC_2501 exam dumps and start preparation with complete peace of mind and satisfaction.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q60-Q65):

NEW QUESTION # 60

Your story takes a long time to open. What could cause this? Note: There are 3 correct answers to this question.

- A. Many story filters
- B. Large calculation scope
- C. Many hyperlinks
- D. Complex formatting
- E. Many data sources

Answer: A,D,E

NEW QUESTION # 61

In a planning data model, what dimensions are included by default? Note: There are 2 correct Answers to this question.

- A. Entity
- B. Organization
- C. Date
- D. Version

Answer: C,D

Explanation:

In a planning data model in SAP Analytics Cloud, the Date and Version dimensions are included by default. The Date dimension is essential for time-based planning and analysis, while the Version dimension allows for the creation and management of different data scenarios, such as budget, forecast, and actuals. These dimensions provide a foundational structure for planning activities within the model.

NEW QUESTION # 62

You input new data for a private version in a story. What must you do to ensure the new data is added to the model?

- A. Publish
- B. Nothing
- C. Save
- D. Send

Answer: A

Explanation:

When inputting new data for a private version in a story in SAP Analytics Cloud, it is necessary to "Publish" the data to ensure it is added to the model. Publishing the private version commits the changes to the underlying model, making the new data visible and accessible to other users according to their permissions. This step is crucial for ensuring that the updated data is incorporated into the shared model for further analysis and decision-making.

NEW QUESTION # 63

For which activities must you enable Advanced Mode in story design? Note: There are 2 correct answers to this question.

- A. Add JavaScript to a button
- B. Add a popup
- C. Add a layer to a geo map
- D. Add a custom widget

Answer: A,B

NEW QUESTION # 64

You import data into a dataset. One of the columns imported is Year, and SAP Analytics Cloud interprets it as a measure. How can you ensure that it is treated as a calendar year?

- A. Change the Year measure to a dimension in the dataset.
- B. Includes the Year measure in a level-based time hierarchy in the dataset.
- C. Insert a character into the Year measure using the transform bar.
- D. Add the month as a suffix to the Year measure.

Answer: A

Explanation:

If SAP Analytics Cloud interprets a 'Year' column as a measure instead of a dimension, it should be changed to a dimension to ensure it is treated as a calendar year. This adjustment can be made within the model or dataset settings, where the column's role can be switched from a measure (quantitative value) to a dimension (qualitative value). Treating 'Year' as a dimension allows it to be used appropriately in time-based analyses, such as trends over time, without being aggregated like a numerical measure.

NEW QUESTION # 65

.....

If you want to sail through the difficult SAP C_SAC_2501 Exam, it would never do to give up using exam-related materials when you prepare for your exam. If you would like to find the best certification training dumps that suit you, ActualVCE is the best place to go.
