Adobe AD0-E725 덤프구매전 한국어 온라인상담서비스부터 구매후 덤프 무료 업데이트버전제공 , Adobe AD0-E725시험불합격시 덤프비용 전액환불 혹은 다른 과목으로 교환 등 저희는 구매전부터 구매후까지 철저한 서비스를 제공해드립니다. Adobe AD0-E725 덤프는 인기덤프인데 지금까지 덤프를 구매한후 환불신청하신 분은 아직 없었습니다.

Adobe AD0-E725 시험요강:

주제	소개
주제 1	• External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I • O events and webhooks to create automated and connected business processes.
주제 2	• Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.
주제 3	• Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.
주제 4	• Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.

AD0-E725시험대비 인증덤프, AD0-E725인기자격증 시험 덤프자료

Fast2test에서는 IT인증시험에 관한 모든 덤프를 제공해드립니다. 우선 시험센터에서 정확한 시험코드를 확인하시고 그 코드와 동일한 코드로 되어있는 덤프를 구매하셔서 덤프에 있는 문제와 답을 기억하시면 시험을 쉽게 패스하실수 있습니다.AD0-E725시험은 IT인증시험중에서 많은 인기를 가지고 있는 시험입니다.AD0-E725시험을 패스하여 자격증을 취득하시면 취업이나 승진에 많은 가산점이 되어드릴것입니다.

최신 Adobe Commerce AD0-E725 무료샘플문제 (Q12-Q17):

질문 # 12

A client is setting up an Adobe Commerce B2B store and wants to start offering a Payment on Account option for their customers when placing orders.

How should the Developer achieve this?

- A. Install and activate the native Adobe Commerce module which activates payment.
- B. Repurpose the native Cash on Delivery method.
- C. Create and implement a new Payment Method to provide credit accounts to customers.

정답: A

질문 # 13

A Developer needs to set up a message queue topic in Adobe Commerce to asynchronously handle order processing. Which XML file should the Developer use to configure this?

- A. queue_topology.xml
- B. communication.xml
- C. queue_consumer.xml

정답: A

질문 # 14

An Adobe Commerce Expert is tasked with implementing a custom condition on salable quantity with reservations. The condition needs to be applicable only when added to cart.

Which option should the Developer implement?

- A. `<type name="Magento\InventoryApi\Model\Stock\ValidatorChain">`
 `<arguments>`
 `<argument name="validators" xsi:type="array">`
 `<item name="is_salable_with_reservations" xsi:type="object"`
 `>Vendor\InventorySales\Model\Stock\Validator\IsSalableWithReservationsValidator</item>`
 `</argument>`
 `</arguments>`
 `</type>`
- B. `<virtualType name="IsProductSalableForRequestedQtyConditionChainOnAddToCart">`
 `<arguments>`
 `<argument name="conditions" xsi:type="array">`
 `<item name="is_salable_with_reservations" xsi:type="array">`
 `<item name="object" xsi:type="object"`
 `>Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC`
 `/item>`
 `</item>`
 `</argument>`
 `</arguments>`
 `</virtualType>`
- C. `<preference for="`
 `Magento\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsC type="`
 `Vendor\InventorySales\Model\IsProductSalableForRequestedQtyCondition\IsSalableWithReservationsCo`
 `>`

정답: B

설명:

To add a custom salable quantity condition for use only during the add-to-cart flow, developers must extend the `IsProductSalableForRequestedQtyConditionChainOnAddToCart` virtual type. This chain is designed specifically for cart validation, ensuring the new condition runs only at that stage.

A would override the core class completely, not scoped to add-to-cart.

B relates to stock validator chains, not salable quantity conditions.

C is correct: defining a virtual type extension ensures proper conditional logic for reservations during cart validation.

Adobe Commerce DevDocs - MSI salable quantity conditions

질문 # 15

A recent client-reported bug is fixed by the Adobe Commerce community. The Adobe engineering team has not yet released the patch or committed the bug fix to GitHub. A Developer acquires the custom patch and releases it to their Adobe Commerce environments.

What are the recommended steps the Developer should follow to implement the custom patch for the bug fix?

- A. Install the cweagans/composer-patches module and edit the composer.json file to apply the custom patch.
- B. Install only official patches supplied by them to maintain upgradability.
- C. Update the quality-patches module and list the required patch in the magento-ce-patch.yaml file.

정답: A

설명:

If a bug fix patch has not yet been officially released by Adobe (via Quality Patches Tool (QPT)), developers can apply custom patches using the cweagans/composer-patches package.

Option A is best practice in general, but in urgent scenarios, custom patches are allowed.

Option B applies only for official Adobe patches distributed via QPT, not for community-supplied or custom fixes.

Option C is correct: cweagans/composer-patches allows applying custom patches via composer.json until an official fix is available.

Adobe Commerce DevDocs - Apply custom patches

질문 # 16

A client uses APIs on their Adobe Commerce platform and powers external programs with the data fed from the Adobe API systems. The client reports that it is becoming unmanageable to handle all the API endpoints and would like to have a centralized API system.

Which new feature will help the client with this problem?

- A. Adobe I/O Events for Adobe Commerce
- B. Adobe Commerce API Mesh
- C. Adobe Bulk API Handler

정답: B

설명:

Adobe Commerce API Mesh provides a centralized GraphQL layer that aggregates data from multiple APIs (Commerce, third-party systems, microservices). This allows the client to interact with a single unified API endpoint, instead of managing multiple APIs individually.

A Bulk API Handler does not exist.

B Adobe I/O Events is for real-time event streaming, not API centralization.

C is correct: API Mesh is the official solution for centralized API management.
