

# 156-536 Authorized Certification - 156-536 Practice Exams Free

Our company is trying to satisfy every customer's demand. Of course, we also attach great importance on the quality of our 156-536 real exam. Every product will undergo a strict inspection process. In addition, there will have random check among different kinds of 156-536 Study Materials. The quality of our 156-536 practice dumps deserves your trust. Our products have built good reputation in the market. We sincerely hope that you can try our 156-536 preparation guide.

In our software version of 156-536 exam questions the unique point is that you can take part in the 156-536 practice test before the real 156-536 exam. You never know what you can till you try. so that they can enrich their knowledge before the real 156-536 exam. However, confidence in yourself is the first step on the road to success. Our mock exam provided by us can help every candidate to get familiar with the Real 156-536 Exam, which is meaningful for you to take away the pressure and to build confidence in the approach.

## 156-536 Practice Exams Free - Latest 156-536 Dumps Pdf

If you buy our 156-536 study torrent, we will provide 24-hour online efficient service for you. You can consult any questions about our 156-536 study materials that you meet, and communicate with us at any time you want. Of course, if you are so busy that you have no time to communicate with us online, don't worry, you can try to tell us your problems about our 156-536 Guide materials by an email at any time; you will receive an email immediately from the customer service. As a word, I believe the 24-hour online efficient service will help you solve all problems to help you pass the exam.

## CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q22-Q27):

### NEW QUESTION # 22

What happens to clients that fail to meet the requirements?

- A. They do not receive FDE protections
- B. They have encryption issues
- C. They receive incomplete protections
- D. They have unenforced protections

**Answer: A**

Explanation:

The Check Point Harmony Endpoint documentation specifies that clients must fulfill all prerequisites to transition from the Deployment Phase to the Full Disk Encryption policy enforcement phase. If these requirements are not met, Full Disk Encryption

(FDE) cannot protect the computer, and the Pre-boot environment will not activate, indicating that such clients do not receive FDE protections.

Exact Extract from Official Document:

"If these requirements are not met, Full Disk Encryption cannot protect the computer and the Pre-boot cannot open."

Reference: Check Point Harmony Endpoint Specialist R81.20 Administration Guide, Page 250, Section:

"Installing and Deploying Full Disk Encryption."

### NEW QUESTION # 23

Endpoint's Media Encryption (ME) Software Capability protects sensitive data on what, and how?

- A. Removable media and other input/output devices by using encryption methods
- B. Storage devices, removable media, and other input/output devices by requiring authorization before a user accesses the device
- C. Storage devices by requiring multi-factor authorization
- D. Input/output devices using Anti-Malware

**Answer: B**

### NEW QUESTION # 24

What is the default encryption algorithm in the Full Disk Encryption tab under Advanced Settings?

- A. XTS-AES 128 bit
- B. AES-CBC 256 bit
- C. AES-CBC 128 bit
- D. XTS-AES 256 bit

**Answer: D**

Explanation:

The default encryption algorithm for Full Disk Encryption (FDE) in Check Point Harmony Endpoint, as configured in the Advanced Settings tab, is XTS-AES 256 bit. This is explicitly stated in the CP\_R81.

20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf on page 221, under the "Custom Disk Encryption Settings" section:  
"The default encryption algorithm is XTS-AES 256 bit."

This extract confirms that Option C is correct. The document further notes that administrators can choose between XTS-AES 256 bit and XTS-AES 128 bit, but 256 bit is the default, reflecting a preference for stronger encryption. XTS (XEX-based tweaked-codebook mode with ciphertext stealing) is specifically designed for disk encryption, providing better security than CBC (Cipher Block Chaining) modes.

\* Option A ("AES-CBC 128 bit") and Option B ("AES-CBC 256 bit") are incorrect because FDE uses XTS mode, not CBC, which is less suited for disk encryption due to its vulnerabilities in this context.

\* Option D ("XTS-AES 128 bit") is a configurable option but not the default, as the guide specifies 256 bit as the standard setting.  
References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 221: "Custom Disk Encryption Settings" (confirms XTS-AES 256 bit as the default algorithm).

### NEW QUESTION # 25

By default, an FDE Action does what?

- A. Re-defines all visible disk volumes
- B. Rebuilds the hard drive
- C. Encrypts all visible disk volumes
- D. Decrypts all visible disk volumes

**Answer: C**

### NEW QUESTION # 26

What does the Endpoint Security Homepage offer useful resources for?

- A. Quantum Management
- B. Unix Client OS Support
- C. Complicated Practices
- D. Best Practices

**Answer: D**

## NEW QUESTION # 27

.....

Perhaps you have had such an unpleasant experience about 156-536 exam questions you brought in the internet was not suitable for you in actual use, to avoid this, our company has prepared 156-536 free demo in this website for our customers, with which you can have your first-hand experience before making your final decision. The content of the free demo is part of the content in our real 156-536 Study Guide. And you can see how excellent our 156-536 training dumps are!
