

NetSec-Pro Valid Dumps Pdf | NetSec-Pro Valid Test Vce

วัตถุประสงค์การสอบ

- เพื่อตรวจสอบความพร้อมและประเมินความพร้อมในการเข้าสู่โลกอาชีพศึกษาในทศวรรษที่ 21 และการพัฒนาตนเองอย่างต่อเนื่อง
- เพื่อใช้สถานศึกษาใช้เป็นข้อมูลในการปรับปรุงและพัฒนาการเรียนการสอน และการบริหารจัดการการเรียนการสอนของสถานศึกษา
- เพื่อเป็นข้อมูลและสารสนเทศการตัดสินใจในการเข้าศึกษาต่อประเภทใดจะดีกับตนเอง

เตรียมพร้อมสอบ V-NET อาชีวศึกษา

DIGITAL TESTING

สอบ 17-18 24-25 มกราคม 2569

การเตรียมความพร้อมก่อนสอบ

- ไม่ติด指甲บนสอบ (ห้ามติด指甲บนสอบ)

ตารางสอบ

สอบได้เพียงคนละ 1 รอบเท่านั้น

รอบที่ 1, 3, 5, 7

08.30 น. - 09.00 น. : ลงทะเบียนและเข้าห้องสอบ

09.00 - 12.00 น. : สอบวิชา 511 เศรษฐศาสตร์เบื้องต้น ในการเข้าสู่วิชาชีพ ระดับ ปวช.3

รอบที่ 2, 4, 6, 8

12.30 น. : ลงทะเบียนและเข้าห้องสอบ

13.00 - 16.00 น. : สอบวิชา 511 เศรษฐศาสตร์เบื้องต้น ในการเข้าสู่วิชาชีพ ระดับ ปวช.3

ระเบียบ การเข้าห้องสอบ

- ไม่ได้อาบน้ำสระผม ไม่ใช้เครื่องสำอาง
- ไม่ได้อาบน้ำสระผม ไม่ใช้เครื่องสำอาง
- ไม่ได้อาบน้ำสระผม ไม่ใช้เครื่องสำอาง
- ไม่ได้อาบน้ำสระผม ไม่ใช้เครื่องสำอาง

ห้าม

- นำเครื่องมือสื่อสารเข้าห้องสอบ
- นำสิ่งของเข้าห้องสอบ

ปฏิบัติตามกฎระเบียบของสถานศึกษา

1 ม.ค. 68 - 30 ก.ค. 68 : สอบวิชา 511 เศรษฐศาสตร์เบื้องต้น ในการเข้าสู่วิชาชีพ ระดับ ปวช.3

1 ม.ค. 68 - 30 ก.ค. 68 : สอบวิชา 511 เศรษฐศาสตร์เบื้องต้น ในการเข้าสู่วิชาชีพ ระดับ ปวช.3

5 ม.ค. 2569 : สอบวิชา 511 เศรษฐศาสตร์เบื้องต้น ในการเข้าสู่วิชาชีพ ระดับ ปวช.3

02-2173800

สถาบันทดสอบทางการศึกษาแห่งชาติ (องค์การมหาชน)

It is important to solve more things in limited times, NetSec-Pro Exam have a high quality, Five-star after sale service for our Palo Alto Networks NetSec-Pro exam dump, the Palo Alto Networks Network Security Professional prepare torrent has many professionals, and they monitor the use of the user environment and the safety of the learning platform timely.

Having a good command of professional knowledge in this line, they represent the highest level of this NetSec-Pro exam and we hired them to offer help for you. They made high-end NetSec-Pro preparation exam with one-year supplementary updates one year long. If you want to have free exam questions or lower-priced practice materials, our website provide related materials for you. So their profession makes our NetSec-Pro Exam Prep trustworthy.

2026 Palo Alto Networks NetSec-Pro –High-quality Valid Dumps Pdf

It is universally accepted that in this competitive society in order to get a good job we have no choice but to improve our own capacity and explore our potential constantly, and try our best to get the related NetSec-Pro certification is the best way to show our professional ability, however, the exam is hard nut to crack and there are so many NetSec-Pro Preparation questions related to the exam, it seems impossible for us to systematize all of the key points needed for the exam by ourselves.

Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Connectivity and Security: This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.
Topic 2	<ul style="list-style-type: none">Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.
Topic 3	<ul style="list-style-type: none">FW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.
Topic 4	<ul style="list-style-type: none">NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.
Topic 5	<ul style="list-style-type: none">Network Security Fundamentals: This section of the exam measures skills of network security engineers and covers key concepts such as application layer inspection for Strata and SASE products, differentiating between slow and fast path packet inspection, and the use of decryption methods including SSL Forward Proxy, SSL Inbound Inspection, SSH Proxy, and scenarios where no decryption is applied. It also includes applying network hardening techniques like Content-ID, Zero Trust principles, User-ID (including Cloud Identity Engine), Device-ID, and network zoning to enhance security on Strata and SASE platforms.

Palo Alto Networks Network Security Professional Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which procedure is most effective for maintaining continuity and security during a Prisma Access data plane software upgrade?

- A. Back up configurations, schedule upgrades during off-peak hours, and use a phased approach rather than attempting a network-wide rollout.
- B. Perform the upgrade during peak business hours, quickly address any user-reported issues, and ensure immediate troubleshooting post-rollout.
- C. Use Strata Cloud Manager (SCM) to perform dynamic upgrades automatically and simultaneously across all locations at once to ensure network-wide uniformity.
- D. Disable all security features during the upgrade to prevent conflicts and re-enable them after completion to ensure a smooth rollout process.

Answer: A

Explanation:

The best practice for Prisma Access data plane upgrades involves backing up configurations, scheduling upgrades during off-peak hours, and using a phased approach to minimize disruption and maintain continuity. As per the Palo Alto Networks documentation: "To minimize disruptions, it is recommended to perform Prisma Access upgrades during non-business hours and in a phased manner, starting with less critical sites to validate the process before moving to critical locations. Backup configurations and validate the system's readiness to avoid data loss and maintain service continuity." (Source: Prisma Access Best Practices)

NEW QUESTION # 40

In a distributed enterprise implementing Prisma SD-WAN, which configuration element should be implemented first to ensure optimal traffic flow between remote sites and headquarters?

- A. Configure static routes between all the branch offices.
- **B. Implement dynamic path selection using real-time performance metrics.**
- C. Deploy redundant ION devices at each location.
- D. Enable split tunneling for all branch locations.

Answer: B

Explanation:

Dynamic path selection is the foundation of SD-WAN, leveraging real-time performance data to dynamically route traffic over the best available path.

"Dynamic path selection continuously monitors performance metrics (loss, latency, jitter) and makes real-time routing decisions to ensure application SLAs are met across the WAN." (Source: Prisma SD-WAN Dynamic Path Selection) Establishing dynamic path selection first ensures the rest of the SD-WAN optimizations (e.g., failover, QoS) work effectively.

NEW QUESTION # 41

Which offering can be managed in both Panorama and Strata Cloud Manager (SCM)?

- A. SaaS Security
- B. Prisma SD-WAN
- **C. VM-Series Next-Generation Firewall (NGFW)**
- D. Autonomous Digital Experience Manager (ADEM)

Answer: C

Explanation:

The VM-Series NGFWs are designed to integrate seamlessly with both Panorama and Strata Cloud Manager (SCM), allowing administrators to manage physical and virtual firewall deployments from either interface.

"You can manage VM-Series Next-Generation Firewalls using either Panorama for centralized management of all firewalls or Strata Cloud Manager for cloud-based management, giving flexibility across hybrid environments." (Source: VM-Series Management Options) Unified management flexibility is key for enterprises with hybrid or multi-cloud deployments.

NEW QUESTION # 42

A network security engineer has created a Security policy in Prisma Access that includes a negated region in the source address. Which configuration will ensure there is no connectivity loss due to the negated region?

- A. Add all regions that contain private IP addresses to the source address.
- **B. Create a Security policy for the negated region with destination address "any".**
- C. Add a Dynamic Application Group to the Security policy.
- D. Set the service to be application-default.

Answer: B

Explanation:

Negated source addresses exclude traffic from the specified region. To avoid accidental connectivity loss for traffic from that region, create a separate Security policy to explicitly permit it.

"When you use a negated region in a Security policy rule, ensure to create an additional Security policy to permit traffic from the excluded (negated) region to avoid unintentional drops." (Source: Prisma Access Policy Best Practices) This ensures explicit

inclusivity for the excluded region, maintaining reliable connectivity.

NEW QUESTION # 43

Which security profile provides real-time protection against threat actors who exploit the misconfigurations of DNS infrastructure and redirect traffic to malicious domains?

- A. URL Filtering
- B. Antivirus
- C. Vulnerability Protection
- D. Anti-spyware

Answer: D

Explanation:

The Anti-spyware profile includes DNS-based protections like sinkholing and detection of DNS queries to malicious domains, offering real-time protection against attacks that exploit DNS misconfigurations.

"The Anti-Spyware profile protects against DNS-based threats by sinkholing DNS queries to malicious domains and detecting suspicious DNS activity, thus blocking data exfiltration and C2 communication." (Source: Anti-Spyware Profiles)

NEW QUESTION # 44

.....

To keep with such an era, when new knowledge is emerging, you need to pursue latest news and grasp the direction of entire development tendency, our NetSec-Pro training questions have been constantly improving our performance. Our working staff regards checking update of our NetSec-Pro preparation exam as a daily routine. After you purchase our NetSec-Pro Study Materials, we will provide one-year free update for you. Within one year, we will send the latest version to your mailbox with no charge if we have a new version of NetSec-Pro learning materials.
