Latest Mule-101 Exam Preparation & Mule-101 Exam Details

The pass rate is 99% for Mule-101 exam materials, and most candidates can pass the exam by using Mule-101 questions and answers of us. If you choose us, we can ensure you that you can pass the exam just one time. We will give you refund if you fail to pass the exam, you don't need to worry that your money will be wasted. We offer you free demo to have a try before buying Mule-101 Exam Dumps, so that you can have a better understanding of what will buy. We have online and offline chat service stuff, and if you have any questions about Mule-101 exam dumps, you can consult us.

Salesforce Certified MuleSoft Integration Foundations Sample Questions (Q53-Q58):

NEW QUESTION # 53

According to MuleSoft, a synchronous invocation of a RESTful API using HTTP to get an individual customer record from a single system is an example of which message exchange pattern? 6(Note: The options are partially truncated in the PDF, but based on the provided text "A. Multicast" 7 and standard MuleSoft certification context, the correct pattern is Request-Response).

- A. Multicast
- **B. Request-Response**
- C. Fire-and-Forget
- D. Acknowledge Only

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

Request-Response: The HTTP protocol is inherently synchronous and follows the Request-Response pattern. The client sends a request (the GET command) and waits for the server to process the query and send back the data (the 200 OK response).

Synchronous Nature: The "Synchronous" keyword in the question is the biggest clue. The client processing is blocked or expects an immediate return of data before proceeding.

Why "Multicast" is incorrect: Multicast is a one-to-many pattern (usually asynchronous). It involves sending one message to multiple receivers (like a topic subscription), which contradicts the question's scenario of getting a "record from a single system." 8

NEW QUESTION # 54

An organization needs to procure an enterprise software system to increase cross-selling opportunities and better track prospect data.

- A. Business-to-Business (B2B)
- B. IT Service Management (ITSM)
- **C. Customer Relationship Management (CRM)**
- D. Supply Chain Management (SCM)

Answer: C

Explanation:

Customer Relationship Management (CRM): A CRM system (like Salesforce) is specifically designed to manage a company's interactions with current and potential customers.5.

Key Functionality: It stores contact information, identifies sales opportunities, records service issues, and manages marketing campaigns-perfectly matching the requirement to "increase cross-selling" and "track prospect data"⁶.

Why others are incorrect:

SCM: Manages the flow of goods and services (logistics/inventory)⁷.

ITSM: Manages IT services (help desk tickets)⁸.

B2B: Refers to the exchange of products/services between businesses, not the system of record for prospect data⁹.

NEW QUESTION # 55

Which role is primarily responsible for building API implementations as part of a typical MuleSoft integration project?

- A. Integration Architect
- B. API Designer
- C. Operations
- **D. API Developer**

Answer: D

Explanation:

API Developer: This role is responsible for the actual coding and implementation of the API. They use Anypoint Studio to build the Mule flows, configure connectors, write DataWeave transformations, and ensure the API functions according to the design specification¹.

Why others are incorrect:

API Designer: Responsible for writing the RAML/OAS contract (specification) in Design Center, usually before implementation begins².

Integration Architect: Responsible for high-level design, pattern selection, and governance, not the day-to-day coding of flows³.

Operations: Responsible for deployment, monitoring, and maintenance after the application is built⁴.

NEW QUESTION # 56

An IT integration team followed an API-led connectivity approach to implement an order-fulfillment business process. It created an order processing API that coordinates stateful interactions with a variety of microservices that validate, create, and fulfill new product orders.

- A. Aggregation
- **B. Orchestration**
- C. Multicasting
- D. Streaming

Answer: B

Explanation:

Orchestration: This refers to the logic where a central controller (the Process API) manages the interactions between multiple systems to achieve a business goal.

The Scenario: The API is "coordinating stateful interactions" (e.g., Step 1: Validate Customer -> Step 2: Check Inventory -> Step 3: Debit Payment -> Step 4: Create Shipment). This strictly sequential or logic-driven coordination is the definition of Orchestration.

Why others are incorrect:

Aggregation: Specifically refers to just gathering data from multiple sources (Scatter-Gather) and combining the results, usually without complex state management or sequential logic.

Streaming: Refers to processing data in continuous chunks, not the logic of coordinating services.

NEW QUESTION # 57

Which type of communication is managed by a service mesh in a microservices architecture?

- **A. Communication between microservices**
- B. Communication between microservices runtime administrators
- C. Communication between trading partner services
- D. Communication between microservices developers

Answer: A

Explanation:

Service Mesh Definition: A service mesh is a dedicated infrastructure layer for handling service-to-service communication.

East-West Traffic: It is specifically designed to manage East-West traffic, which is the network traffic flowing inside the data center or cluster between different microservices.

Capabilities: It handles things like mutual TLS (mTLS) for security, retries, load balancing, and traffic control between these services without requiring changes to the application code itself.

NEW QUESTION # 58

.....

Passing the Mule-101 exam with least time while achieving aims effortlessly is like a huge dream for some exam candidates. Actually, it is possible with our proper Mule-101 learning materials. To discern what ways are favorable for you to practice and what is essential for exam syllabus, our experts made great contributions to them. All Mule-101 Practice Engine is highly interrelated with the exam. You will figure out this is great opportunity for you. Furthermore, our Mule-101 training quiz is compiled by professional team with positive influence and reasonable price
