Microsoft AZ-400 Practice Exam & Valid AZ-400 Test Guide

Our AZ-400 study guide has become a brand for our candidates to get help for their exams. Because our AZ-400 learning materials contain not only the newest questions appeared in real exams in these years, but the most classic knowledge to master. Besides, it is unavoidable that you may baffle by some question points during review process of the AZ-400 Exam Questions, so there are clear analysis under some necessary questions.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q193-Q198):

NEW QUESTION # 193
How should you configure the release retention policy for the investment planning applications suite? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Scenario: By default, all releases must remain available for 30 days, except for production releases, which must be kept for 60 days.
Box 1: Set the default retention policy to 30 days
The Global default retention policy sets the default retention values for all the build pipelines. Authors of build pipelines can override these values.
Box 2: Set the stage retention policy to 60 days

You may want to retain more releases that have been deployed to specific stages.

NEW QUESTION # 194

You use Exabeam Fusion SIEM and the Azure cloud platform.
You need to integrate Exabeam and Azure. The solution must use OAuth authentication.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

1 - Create a client secret.
2 - Register an Exabeam application in Microsoft Azure....
3 - Configure the Exabeam Azure cloud connector.

NEW QUESTION # 195

Your company is concerned that when developers introduce open source libraries, it creates licensing compliance issues.
You need to add an automated process to the build pipeline to detect when common open source libraries are added to the code base.
What should you use?

- A. OWASP ZAP
- B. WhiteSource
- C. Microsoft Visual SourceSafe
- D. PDM

Answer: B

Explanation:
WhiteSource is the leader in continuous open source software security and compliance management. WhiteSource integrates into your build process, irrespective of your programming languages, build tools, or development environments. It works automatically, continuously, and silently in the background, checking the security, licensing, and quality of your open source components against WhiteSource constantly-updated definitive database of open source repositories.
Azure DevOps integration with WhiteSource Bolt will enable you to:
* Detect and remedy vulnerable open source components.
* Generate comprehensive open source inventory reports per project or build.
* Enforce open source license compliance, including dependencies' licenses.
* Identify outdated open source libraries with recommendations to update.

NEW QUESTION # 196

Your company has an Azure DevOps project that produces Node Package Manager (npm) packages. Multiple projects consume the packages.
You need to minimize the amount of disk space used by older packages in Azure Artifacts.
What should you modify?

- A. the retention settings of the company pipeline
- B. the retention settings of the project's release
- C. the retention settings of the project's pipeline
- D. the retention settings of the project's tests

Answer: B

Explanation:
To minimize the amount of disk space used by older packages in Azure Artifacts, you should modify the retention settings of the project's release. This can be done by navigating to the project's release settings and adjusting the retention policy. For more

information, please refer to the Microsoft documentation.

NEW QUESTION # 197

You have an Azure web app named Webapp1.

You need to use an Azure Monitor query to create a report that details the top 10 pages of Webapp1 that failed.

How should you complete the query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
