問題 #15

A client recently started using the new Adobe Live Search functionality. They report an issue with content from the website, such as CMS blocks, not returning with the search result.

A Developer is asked to investigate because the client wants this content to be part of the data pool of Live Search.

How should the Developer respond to the client?

- A. Share documentation regarding the limitations of Live Search.
- B. Extend the class `Magento\LiveSearchAdapter\Model\Attribute\Metadata`.
- C. Advise the client to enable content for Live Search from the admin panel.

答案: A

解題說明:

Adobe Live Search is designed to handle catalog product data only. It does not index or return CMS content such as blocks or pages. This is a known limitation of Live Search.

B is invalid because there is no admin setting to enable CMS content in Live Search.

C is not a supported solution; extending Live Search classes will not include CMS content.

問題 #16

A Developer is integrating a custom third-party gift card system into the Adobe Commerce checkout. During checkout, a customer enters a store-bought gift card for payment, and depending on external API checks, the gift card is verified and allowed to be used on the order.

Which approach should be used for the internal processing of such functionality?

- A. Create a unique voucher code for each gift card usage request which grants a discount on the order's total.
- B. Create an Adobe Commerce gift card account and manage the account using the gift card repositories.
- C. Directly subtract the gift card amount from the order, keeping no history of the discount transaction.

答案: A

解題說明:

The correct way to integrate external gift cards is to generate a unique discount (voucher code) that maps to the validated gift card value. This approach ensures that the transaction is recorded in Magento's discount system, preserving order and accounting integrity.

A is incorrect because Adobe Commerce gift card accounts are native to the Commerce Gift Card module and not applicable to external systems.

C is incorrect as directly subtracting amounts without transaction history violates best practices and auditability.

B is correct: mapping external validation into a voucher/discount ensures proper tracking.

問題 #17

While implementing additional functionality, a Developer needs to modify a class with protected and private methods requiring custom logic. The Developer finds that no other Magento customization, such as plugins, will work.

What should the Developer do in this scenario?

- A. Use a preference and extend the original class.
- B. Use a patch to implement the necessary customizations.
- C. Use an observer to customize data processed by the class.

答案: A

問題 #18

A new critical security vulnerability is found on Adobe Commerce Cloud. The successful exploitation may lead to arbitrary code execution, so the Developer must apply a security patch file given by Adobe as soon as possible to ensure system security. How should the Developer apply the security patch on Adobe Commerce hosted on cloud infrastructure according to best practices?

- A. Upgrade Adobe Commerce to the latest security patch release
- **B. Copy a security patch to m2-hotfixes directory**
- C. Apply a security patch using composer.json

答案: B

問題 #19

A client expresses disappointment with the underreported engagement and revenue metrics reported by Product Recommendations. Which limitation or consideration of this service should be communicated to the client?

- **A. Ad blockers and privacy settings can prevent Product Recommendations from capturing shopper behavior.**
- B. Product Recommendations does not support insightful engagement and revenue metrics; an additional service contract is required for this feature.
- C. Product Recommendations requires the purchase of an additional license to enable real-time reporting.

答案: A

解題說明:

Product Recommendations relies on capturing shopper behavior (page views, clicks, add-to-cart events) via JavaScript trackers. If users have ad blockers or restrictive privacy settings enabled, this data may not be captured, leading to underreported metrics.

A is false: Product Recommendations does not require extra licenses for reporting.

C is false: The service already supports engagement and revenue metrics; no additional contract required.
