We have to admit that the exam of gaining the 1z0-1075-25 certification is not easy for a lot of people, especial these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the 1z0-1075-25 certification is a good choice for you. Now it is time for you to take an exam for getting the certification. If you have any worry about the 1z0-1075-25 Exam, do not worry, we are glad to help you. Because the 1z0-1075-25 study materials from our company are very useful for you to pass the exam and get the certification.

We believe that if you can learn about several advantages of 1z0-1075-25 preparation questions, I believe you have more understanding of the real questions and answers. You can download the trial versions of the 1z0-1075-25 Exam Questions for free. After using the trial version of our 1z0-1075-25 study materials, I believe you will have a deeper understanding of the advantages of our 1z0-1075-25 training engine.

## Oracle 1z0-1075-25 Exam Questions in exam preparation

Improve your professional ability with our 1z0-1075-25 certification. Getting qualified by the certification will position you for better job opportunities and higher salary. Now, let's start your preparation with 1z0-1075-25 exam training guide. Our 1z0-1075-25 practice pdf offered by PremiumVCEDump is the latest and valid which suitable for all of you. The free demo is especially for you to

free download for try before you buy. You can get a lot from the 1z0-1075-25 simulate exam dumps and get your 1z0-1075-25 certification easily.

## Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q31-Q36):

### NEW QUESTION # 31

Your customer has multiple distribution centers and a few manufacturing plants. The plants manufacture different items with some overlap between them. The distribution centers stock parts from all plants.

A Corporate Engineering team is responsible for centrally defining items and catalogs. This team defines the items and sets the attributes for most parameters. The respective distribution centers and manufacturing plants must be allowed to change some attributes locally.

What is the best way to achieve this?

- A. Set up plants and the Corporate Engineering organization as item organizations, and distribution centers as inventory organizations.
- B. Set up plants as inventory organizations, and distribution centers and the corporate Engineering organization as item organizations.
- C. Set up plants, distribution centers, and the Corporate Engineering organization as inventory organizations.
- **D. Set up plants and distribution centers as inventory organizations, and the Corporate Engineering organization as an Item organization.**
- E. Set up plants and the Corporate Engineering organization as Inventory organizations, and distribution centers as item organizations.

**Answer: D**

Explanation:

In Oracle Cloud, managing items and their attributes across multiple organizations requires careful structuring of inventory and item organizations. The best way to configure this setup given the customer 's requirements is as follows:

\* Plants and Distribution Centers as Inventory Organizations : Inventory organizations are required to manage on-hand quantities, perform transactions, and handle the physical movement of materials.

Plants need to be inventory organizations to manage production, and distribution centers need to be inventory organizations to manage stocking and distribution.

\* Corporate Engineering Organization as an Item Organization : An item organization is responsible for centrally defining item attributes. By setting the Corporate Engineering team as an item organization, you ensure that item definitions are controlled centrally. The team can define standard attributes while allowing inventory organizations (plants and distribution centers) to modify certain attributes at their level based on local needs.

This structure allows for centralized item management with localized flexibility for plants and distribution centers.

Oracle SCM Cloud guides for "Item and Inventory Organizations " explain how item organizations allow centralized management of item definitions while inventory organizations handle the physical inventory and can override certain attributes locally.

Incorrect Options:

A : Defining all entities as inventory organizations would not allow centralized control of item attributes.

C , D , E : These setups would either limit the ability to control item attributes centrally or misassign organizations that need to handle physical inventory as item-only organizations.

### NEW QUESTION # 32

Your customer runs production 24 x 7 x 365 and wants to track Overall Equipment Effectiveness (OEE) online.

Which key setup can they use to achieve this?

- **A. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production Monitoring " In Inventory Organization.**
- B. Enable IoT Fleet Monitoring and enable synchronization to IoT Production Monitoring in Plant Parameters.
- C. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " In Plant Parameters.
- D. Enable IoT Production Monitoring and turn on " Enable synchronization to IoT Production
- E. Enable IoT Asset Monitoring and turn on " Enable synchronization to IoT Asset Monitoring " in Resources.

**Answer: A**

Explanation:

To track Overall Equipment Effectiveness (OEE) in real-time, Oracle Manufacturing Cloud can integrate with IoT solutions. The

correct setup involves:

\* Enabling IoT Production Monitoring and turning on synchronization to IoT Production Monitoring in the Inventory Organization . This allows real-time data from the shop floor to be captured, processed, and used to monitor equipment effectiveness, performance, and availability.

Incorrect options:

\* IoT Fleet Monitoring (A) and IoT Asset Monitoring (B, D) focus on tracking assets and fleets, which are more relevant for logistics or asset management, not production monitoring for OEE.

Oracle Cloud documentation on IoT Production Monitoring details how to set up the system to track OEE and integrate production data with IoT capabilities.

### NEW QUESTION # 33

Which statement is NOT true about the Reservations tab?

- A. Reservations are generally created when a Back-to-Back sales order or a Configured Items sales order is reserved for the work order.
- B. Manual reservations can be done for a work order in inventory.
- C. A work order can be reserved against one or more sales orders.
- D. Demand details displayed are: Document Type (such as Sales Order), Customer Number and Name, Document Number, Due Date, and Quantity.
- E. You can view the reservation details of a work order as a source of demand, and a sales order as supply.

**Answer: E**

Explanation:

In Oracle Manufacturing Cloud, the Reservations tab provides detailed information on reservations linked to work orders and sales orders. The following explains why statement E is not true:

\* Statement E is incorrect : A work order is typically viewed as a source of supply , not demand. Sales orders generate demand, while work orders are created to supply the required products. Therefore, reservation details will show the work order as a source of supply and the sales order as the source of demand.

Correct statements:

\* Statement A : Demand details such as document type (e.g., Sales Order), customer number, document number, due date, and quantity are displayed.

\* Statement B : Reservations are often created for Back-to-Back or Configured Items sales orders to ensure the necessary products are reserved in the system for production.

\* Statement C : A work order can be reserved against one or more sales orders, especially in cases of configurable or customized items.

\* Statement D : Manual reservations for a work order can be made directly in inventory to allocate the necessary materials for production.

Oracle Cloud SCM documentation on reservations explains the interaction between work orders and sales orders and clarifies that work orders serve as sources of supply.

### NEW QUESTION # 34

A Production Operator needs to review the materials issued, resources charged, and operations performed for a job that was executed in the previous shift.

Which task should the operator select to review all the transactions in a single place for both work order and orderless execution?

- A. Manage Work Orders
- B. Report Resource, Material, and Operation Transactions
- C. Review Dispatch List
- D. Review Production Transaction History

**Answer: D**

Explanation:

To review all the transactions associated with a job, including materials issued , resources charged , and operations performed , the Production Operator should select Review Production Transaction History .

This task provides a comprehensive overview of all transaction types, whether for work order or orderless execution, in a single place.

\* Review Production Transaction History offers a detailed record of all activities performed during a work order or orderless

transaction, making it easy for operators to audit and review the work executed in previous shifts.

Incorrect options:

\* Report Resource, Material, and Operation Transactions (A) is used for recording transactions, not for reviewing historical data.  
\* Manage Work Orders (B) and Review Dispatch List (D) provide more general management and operational details, but not the comprehensive transactional history.

Oracle Manufacturing Cloud documentation on Production Transaction History outlines how operators can review and audit transaction data for both work orders and orderless processes.

### NEW QUESTION # 35

You are implementing project-driven supply chain functionality. You need to set up movement requests to issue or transfer project material to manage the inventory associated with projects and tasks.

Which two are types of movement requests to issue or transfer project material?

- **A. Transfer project material from one subinventory to another.**
- B. Create a movement receipt line with the Project Costing widget.
- C. Pick transactions Interfaced by the project costing project and task using the project material, common Inventory, or Inventory from another project.
- **D. Perform manual pick for such movement requests using the project material, common inventory, or inventory from another project.**

**Answer: A,D**

Explanation:

When setting up movement requests in a project-driven supply chain, you need to manage inventory associated with specific projects and tasks. The two correct types of movement requests in this context are:

\* Statement A : Transfer project material from one subinventory to another - This is a standard type of movement request in Oracle Cloud, allowing project materials to be transferred between subinventories.

It is essential for managing inventory tied to specific projects and tasks, ensuring that materials are available where needed for project execution.

Oracle Fusion SCM Cloud: Inventory Management Guide describes how material transfers can be executed between subinventories, including project-based transfers.

Statement D : Perform manual pick for such movement requests using the project material, common inventory, or inventory from another project - Manual picking for project-specific material is another supported operation. It allows users to perform manual picks from various sources, such as project material, common inventory, or even inventory from other projects.

Reference : Oracle Project-Driven Supply Chain documentation explains how manual picks can be configured to source inventory based on project requirements.

Incorrect Statements:

Statement B : Pick transactions are not interfaced specifically by project costing. Although project costing is relevant for tracking costs, it is not the driving factor behind pick transactions.

Statement C : There is no concept of creating a movement receipt line with the " Project Costing widget " in Oracle Manufacturing Cloud.

### NEW QUESTION # 36

.....

The Oracle modern job market is becoming more and more competitive and challenging and if you are not ready for it then you cannot pursue a rewarding career. Take a smart move right now and enroll in the Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) certification exam and strive hard to pass the Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) certification exam.
