Pass Guaranteed Quiz Pass-Sure Oracle - 1z0-071 - Oracle Database SQL Exam Dumps.zip

We will have a dedicated specialist to check if our 1z0-071 learning materials are updated daily. We can guarantee that our 1z0-071 exam question will keep up with the changes, and we will do our best to help our customers obtain the latest information. If you choose to purchase our 1z0-071 quiz torrent, you will have the right to get the update for free. Once our 1z0-071 Learning Materials are updated, we will automatically send you the latest information about our 1z0-071 exam question. We assure you that our company will provide customers with a sustainable update system.

Oracle Database SQL Sample Questions (Q135-Q140):

NEW QUESTION # 135

You create a table named 123. Which statement runs successfully?

- A. SELECT * FROM \ *123\ ;
- B. SELECT * FROM "123
- C. SELECT * FROM , 123* ;
- D. SELECT * FROM TABLE(123);

Answer: B

NEW QUESTION # 136

View the exhibit and examine the structure of the SALES, CUSTOMERS, PRODUCTS and TIMEStables.

The PROD_ID column is the foreign key in the SALEStable referencing the PRODUCTStable.

The CUST_ID and TIME_ID columns are also foreign keys in the SALEStable referencing the CUSTOMERS and TIMEStables, respectively.

Examine this command:

```
CREATE TABLE new_sales (prod_id, cust_id, order_date DEFAULT SYSDATE)
```

```
AS
```

```
SELECT prod_id, cust_id, time_id
```

```
FROM sales;
```

Which statement is true?

- A. The NEW_SALEStable would not get created because the DEFAULT value cannot be specified in the column definition.
- B. The NEW_SALEStable would get created and all the FOREIGNKEY constraints defined on the selected columns from the SALES table would be created on the corresponding columns in the NEW_SALES table.
- C. The NEW_SALEStable would get created and all the NOTNULL constraints defined on the selected columns from the SALES table would be created on the corresponding columns in the NEW_SALES table.
- D. The NEW_SALEStable would not get created because the column names in the CREATETABLE command and the SELECT clause do not match.

Answer: C

NEW QUESTION # 137

Which three are true about the CREATE TABLE command?

- A. It can include the CREATE...INDEX statement for creating an index to enforce the primary key constraint.
- B. A user must have the CREATE ANY TABLE privilege to create tables.
- C. The owner of the table should have space quota available on the tablespace where the table is defined.
- D. It implicitly rolls back any pending transactions.
- E. It implicitly executes a commit.
- F. The owner of the table must have the UNLIMITED TABLESPACE system privilege.

Answer: B,C,E

Explanation:

A). False - The CREATE TABLE command cannot include a CREATE INDEX statement within it. Indexes to enforce constraints like primary keys are generally created automatically when the constraint is defined, or they must be created separately using the CREATE INDEX command.

B). True - The owner of the table needs to have enough space quota on the tablespace where the table is going to be created, unless they have the UNLIMITED TABLESPACE privilege. This ensures that the database can allocate the necessary space for the table.

Reference: Oracle Database SQL Language Reference, 12c Release 1 (12.1).

C). True - The CREATE TABLE command implicitly commits the current transaction before it executes. This behavior ensures that table creation does not interfere with transactional consistency. Reference: Oracle Database SQL Language Reference, 12c Release 1 (12.1).

D). False - It does not implicitly roll back any pending transactions; rather, it commits them.

E). True - A user must have the CREATE ANY TABLE privilege to create tables in any schema other than their own. To create tables in their own schema, they need the CREATE TABLE privilege. Reference: Oracle Database Security Guide, 12c Release 1 (12.1).

F). False - While the UNLIMITED TABLESPACE privilege allows storing data without quota restrictions on any tablespace, it is not a mandatory requirement for a table owner. Owners can create tables as long as they have sufficient quotas on the specific tablespaces.

NEW QUESTION # 138

Examine the data in the COLORS table:

Examine the data in the BRICKS table:

Which two queries return all the rows from COLORS?

- A. CASE is a function and DECODE is not.
- B. Neither CASE nor DECODE is a function.
- C. Both CASE and DECODE are functions.
- D. All conditions evaluated using DECODE can also be evaluated using CASE.
- E. DECODE is a function and CASE is not.
- F. All conditions evaluated using CASE can also be evaluated using DECODE.

Answer: E,F

NEW QUESTION # 139

The SQL statements executed in a user session are as follows:

Which two statements describe the consequences of issuing the ROLLBACK TO SAVE POINT a command in the session? (Choose two.)

- A. No SQL statements are rolled back.
- B. The rollback generates an error.
- C. Only the second DELETE statement is rolled back.
- D. Both the DELETE statements and the UPDATE statement are rolled back.
- E. Only the DELETE statements are rolled back.

Answer: A,B

NEW QUESTION # 140

.....

The first goal of our company is to help all people to pass the 1z0-071 exam and get the related certification in the shortest time. Through years of concentrated efforts of our excellent experts and professors, our company has compiled the best helpful and useful 1z0-071 test training materials, and in addition, we can assure to everyone that our 1z0-071 Study Materials have a higher quality than other study materials in the global market. The 1z0-071 learn prep from our company has helped thousands of people to pass the exam and get the related certification.
