### Huawei H13-511\_V5.5 Exam Syllabus Topics:

| Topic   | Details  |
|---------|--|
| Topic 1 | <ul style="list-style-type: none"> <li>Be able to describe what virtualization is: This topic covers the concept of virtualization technology and how it enables multiple virtual instances to run on physical hardware. It explains the foundational role virtualization plays in creating isolated computing environments.</li> </ul>                                      |
| Topic 2 | <ul style="list-style-type: none"> <li>List a few use cases of cloud computing: This topic presents practical applications and scenarios where cloud computing is implemented across different industries. It demonstrates real-world examples of how organizations utilize cloud services to solve business problems.</li> </ul>  |
| Topic 3 | <ul style="list-style-type: none"> <li>Understand KVM technology: This topic focuses on Kernel-based Virtual Machine (KVM) as a specific virtualization solution for Linux systems. It covers how KVM transforms Linux into a hypervisor to manage virtual machines efficiently.</li> </ul>  |
| Topic 4 | <ul style="list-style-type: none"> <li>Describe the characteristics of cloud computing: This section explains the essential attributes and defining features of cloud computing such as on-demand self-service, broad network access, and resource pooling. It outlines what distinguishes cloud computing from traditional computing models.</li> </ul>                     |
| Topic 5 | <ul style="list-style-type: none"> <li>Describe the history of cloud computing: This section traces the evolution and development of cloud computing from its origins to its current state. It provides historical context for how cloud technology emerged and transformed over time.</li> </ul>  |
| Topic 6 | <ul style="list-style-type: none"> <li>Understand the differences between virtualization and cloud computing: This section clarifies how virtualization and cloud computing are related yet distinct technologies. It explains that virtualization is a key enabler of cloud computing but cloud encompasses broader service delivery models and characteristics.</li> </ul> |

### Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q94-Q99):

**NEW QUESTION # 94**

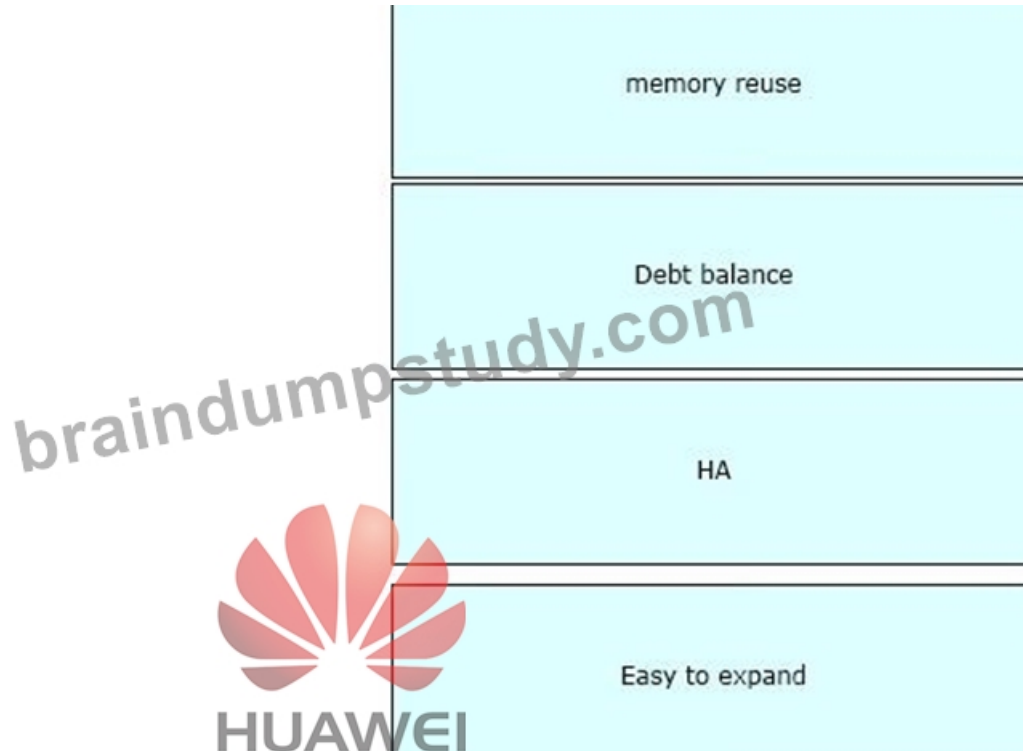

Drag and Drop Question

Match the following cluster features to the functionality they implement.

|                |   |
|----------------|---|
| HA             | Since the physical memory of the server is certain, through certain technical means, the virtual internal sum is greater than the physical memory of the server, and the virtual density in the server is improved. |
| Debt balance   | Share specific services to multiple network devices or multiple links, thereby improving service processing capabilities and ensuring high service reliability  |
| memory reuse   | Use cluster technology to overcome the imitations of a single physical host, and ultimately achieve the effect of no business interruption or reduced interruption time   |
| Easy to expand | Increase the available resources of the entire platform through horizontal scaling  |

**NEW QUESTION # 95**

Which of the following statements about the differences between a domain and an OU are true?

- A. Both OUs and domains can contain AD objects.
- B. Users can log in to a domain but not to an OU.
- C. An OU can exist in a domain, and a domain can also exist in an OU.
- D. Group policies can be configured for both OUs and domains.

**Answer: A,B,D**

Explanation:

In the context of FusionAccess deployment, understanding Microsoft Active Directory (AD) is critical.

According to the official Huawei curriculum, a Domain and an Organizational Unit (OU) serve different purposes in a network hierarchy. Statement A is TRUE because a domain is a security and administrative boundary; users authenticate "to the domain." An OU is merely a logical container inside that domain used for organization; it does not function as an authentication boundary itself.

Statement B is TRUE. Group Policy Objects (GPOs) are the primary tool for managing desktop settings in a Huawei VDI environment. GPOs can be linked at the Domain level (applying to everyone) or at the OU level (applying only to the users or computers within that specific folder). This allows FusionAccess administrators to apply specific security rules-such as disabling USB ports or setting custom wallpapers-to one department (one OU) without affecting the entire company.

Statement D is also TRUE. Both entities are containers for AD objects such as User accounts, Computer accounts, and Security Groups. However, statement C is FALSE. While an OU always exists inside a domain (to organize that domain's objects), a domain cannot exist inside an OU. Domains exist within a Forest or Tree structure. This distinction is vital for HCIA candidates because the FusionAccess ITA (IT Adapter) requires a specific OU structure to be pre-created (e.g., an OU for Desktops and an OU for Users) to properly apply the automated provisioning and management policies that define the desktop cloud environment.

**NEW QUESTION # 96**

Which of the following is not a characteristic of 5G?

- A. Speed
- B. Broad connection
- C. Low latency

- D. low cost

Answer: D

#### NEW QUESTION # 97

In FusionCompute, the administrator can view the DVS port connected to the virtual machine.

- A. True
- B. False

Answer: B

#### NEW QUESTION # 98

In Huawei FusionCompute, which of the following are the features supported by virtualized storage? (Multiple choice)

- A. Snapshot
- B. Disk expansion
- C. Thin Provisioning
- D. Storage live migration

Answer: A,B,C,D
