PassitCertify works hard to provide the most recent version of Network Appliance NS0-528 Exams through the efforts of a team of knowledgeable and certified Implementation Engineer - Data Protection Exam NS0-528 Exams experts. Actual Dumps Our professionals update Implementation Engineer - Data Protection Exam NS0-528 on a regular basis. You must answer all Implementation Engineer - Data Protection Exam NS0-528 questions in order to pass the Implementation Engineer - Data Protection Exam NS0-528 exam.

You may think choosing practice at the first time is a little bit like taking gambles. However, you can be assured by our NS0-528 learning quiz with free demos to take reference, and professional elites as your backup. Accuracy rate is unbelievably high and helped over 98 percent of exam candidates pass the exam. By imparting the knowledge of the NS0-528 Exam to those ardent exam candidates who are eager to succeed like you, they treat it as responsibility to offer help. So please prepare to get striking progress if you can get our NS0-528 study guide with following traits for your information

NS0-528 Study Guide Practice Materials and NS0-528 Actual Dumps and Torrent - TestKingIT

Once you have practiced and experienced the quality of our NS0-528 exam preparation, you will remember the serviceability and usefulness of them. For the excellent quality of our NS0-528 training questions explains why our NS0-528 practice materials helped over 98 percent of exam candidates get the certificate you dream of successfully. Believe me with our NS0-528 Guide quiz, you will be more confident to pass the exam in the shortest time with ease.

Network Appliance NS0-528 Exam Syllabus Topics:

Topic	Details
Topic 1	NetApp ONTAP Business Continuity Solutions: This section of the exam measures the skills of Disaster Recovery Specialists and covers advanced business continuity technologies. This includes the configuration and operation of SnapMirror active sync for continuous data replication and the execution of SVM-DR (Storage Virtual Machine Disaster Recovery) operations to ensure high availability.

Topic 2	• Data Protection Solutions: This section of the exam measures the skills of Storage Architects and covers the foundational principles of designing data protection solutions. It focuses on creating comprehensive design documentation, understanding the various components involved, and identifying all critical solution dependencies to ensure a robust and reliable data protection strategy.
Topic 3	• Troubleshooting and Testing: This section of the exam measures the skills of Support Engineers and focuses on the practical skills needed to maintain data integrity. It involves troubleshooting common data protection configuration issues, executing well-defined Disaster Recovery (DR) procedures, and performing data restore operations to recover from data loss.
Topic 4	• NetApp ONTAP Core Data Protection Features: This section of the exam measures the skills of Systems Administrators and validates core knowledge of data protection and redundancy within the ONTAP environment. It encompasses understanding how data efficiencies impact protection strategies and the practical knowledge required to deploy these data protection solutions effectively in a hybrid cloud infrastructure.
Topic 5	• NetApp Data Protection Software: This section of the exam measures the skills of DevOps Engineers and focuses on the deployment and administration of NetApp's proprietary data protection software. A key part of this domain involves applying these solutions to protect modern containerized applications running in Kubernetes environments.

Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

After deploying a new on-premises AFF cluster, you have been tasked with backing it up to StorageGRID. You have requested the NetApp ONTAP One licenses.

To successfully deploy this solution, what else needs to be deployed through NetApp ONTAP System Manager?

- A. NetApp Cloud Backup service
- B. NetApp BlueXP tiering
- C. NetApp BlueXP observability
- **D. NetApp SnapMirror Cloud API license**

Answer: D

Explanation:

To back up data from an on-premises AFF cluster to StorageGRID, you must use SnapMirror Cloud, which requires the SnapMirror Cloud API license to be deployed through ONTAP System Manager - even when using ONTAP One. This license enables integration with object storage like StorageGRID for cloud backup.

NEW QUESTION # 46

An administrator needs to replicate data and snapshots from on-premises volumes to a compliant object storage target. Which of the following could be used?

- A. SnapMirror SVM
- B. SnapMirror active sync
- **C. SnapMirror Cloud**
- D. SnapMirror Asynchronous

Answer: C

Explanation:

SnapMirror Cloud is designed specifically to replicate Snapshot copies and data from on-premises ONTAP systems to object storage targets such as AWS S3, Azure Blob, or compliant S3-compatible systems. It supports compliance requirements and efficient cloud integration.

NEW QUESTION # 47

Your customer wants to ensure that the SnapMirror relationships are easily managed in a bidirectional, multi-cluster environment. Which version of clustered Data ONTAP would you recommend?

- A. clustered Data ONTAP 8.1.4
- **B. clustered Data ONTAP 9.1**
- C. clustered Data ONTAP 8.3
- D. clustered Data ONTAP 8.2.3

Answer: B

NEW QUESTION # 48

For DR purposes, data must be replicated between on-premises clusters and multiple public clouds. In this scenario, which solution would simplify management?

- A. Cloud Insights
- B. Cloud Volumes ONTAP
- **C. Cloud Manager**
- D. Cloud Sync

Answer: C

NEW QUESTION # 49

You want to set up SnapLock to meet regulatory requirements and to help safeguard the authenticity of the archived data. In this scenario, which two statements are correct? (Choose two.)

- A. SnapLock Compliance and SnapLock Enterprise use different licenses to enable SnapLock functionality.
- **B. All nodes in a cluster must have the SnapLock license for the cluster to be compliant.**
- **C. Only a single SnapLock license is required to use both SnapLock Compliance and SnapLock Enterprise functionality.**
- D. A SnapLock license is deployed at a cluster level and not required for every node.

Answer: B,C

NEW QUESTION # 50

.....

You will notice the above features in the Network Appliance NS0-528 Web-based format too. But the difference is that it is suitable for all operating systems. There is no need to go through time-taking installations or agitating plugins to use this format. It will lead to your convenience while preparing for the Implementation Engineer - Data Protection Exam (NS0-528) certification test. Above all, it operates on all browsers.
