

# Updated FCP\_FMG\_AD-7.4 Interactive EBook Provide Prefect Assistance in FCP\_FMG\_AD-7.4 Preparation

What's more, part of that SureTorrent FCP\_FMG\_AD-7.4 dumps now are free: <https://drive.google.com/open?id=1RhLad6NdW4gv6QEAKZ2WakGeRRTvTaSO>

There are three versions of our FCP\_FMG\_AD-7.4 exam questions. And all of the PDF version, online engine and windows software of the FCP\_FMG\_AD-7.4 study guide will be tested for many times. Although it is not easy to solve all technology problems, we have excellent experts who never stop trying. And whenever our customers have any problems on our FCP\_FMG\_AD-7.4 Practice Engine, our experts will help them solve them at the first time.

If you are new to our website, you can ask any questions about our FCP\_FMG\_AD-7.4 study materials. Our workers are very familiar with our FCP\_FMG\_AD-7.4 learning braindumps. So you will receive satisfactory answers. What is more, our after sales service is free of charge. So our FCP\_FMG\_AD-7.4 Preparation exam really deserves your choice. Welcome to come to consult us. We are looking forward to your coming at any time.

## FCP - FortiManager 7.4 Administrator easy pass guide & FCP\_FMG\_AD-7.4 training pdf & FCP - FortiManager 7.4 Administrator torrent vce

With FCP\_FMG\_AD-7.4 practice test questions you can not only streamline your exam Fortinet FCP\_FMG\_AD-7.4 exam preparation process but also feel confident to pass the challenging FCP\_FMG\_AD-7.4 Exam easily. One of the top features of Fortinet FCP\_FMG\_AD-7.4 valid dumps is their availability in different formats.

### Fortinet FCP\_FMG\_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.</li></ul>

### Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q49-Q54):

#### NEW QUESTION # 49

Refer to the exhibit. An administrator is about to add the FortiGate device to FortiManager using the discovery process. FortiManager is operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result?

- A. During discovery, FortiManager sets the FortiManager NATed IP address on FortiGate.
- B. During discovery, FortiManager sets both the FortiManager NATed IP address and NAT device IP address on FortiGate.
- C. During discovery, FortiManager sets the NATed device IP address on FortiGate.
- D. During discovery, FortiManager uses only the FortiGate serial number to establish the connection.

**Answer: A**

**Explanation:**

You can configure the FortiManager NATed IP address on FortiGate under the central management configuration. This allows FortiGate to announce itself to FortiManager and try to re-establish the FGFM tunnel, if it is torn down. Configuring the FortiManager NATed IP address on FortiGate allows both FortiManager and FortiGate to re-establish the FGFM tunnel. Also, if you configure the FortiManager NATed IP address under the FortiManager system administrator settings, FortiManager sets this address on FortiGate during the discovery process.

### NEW QUESTION # 50

Refer to the exhibit which shows the Download Import Report.

```
Start to import config from device(Remote-FortiGate) vdom(root) to
adom(root), package(Remote-FortiGate_root)

"firewall address",SKIPPED,"(name=all, oid=2309, DUPLICATE)"

"firewall address",FAIL,"(name=REMOTE_SUBNET, oid=2311,
reason=interface((firewall address:REMOTE_SUBNET) any<-port6) binding
fail)"

"firewall policy",FAIL,"(name=1, oid=3070, reason=interface(interface binding
contradiction. detail: (firewall address:REMOTE_SUBNET) any<-port6) binding
fail)"
```

Why is FortiManager failing to import firewall policy ID 1?

- A. Policy ID 1 has an address object that already exists in the ADOM database with any as the interface association, and conflicts with the address object interface association locally on FortiGate.
- B. Policy ID 1 is configured from the interface any to port6. FortiManager rejects the request to import this policy because the any interface does not exist on FortiManager
- C. Policy ID 1 for this managed FortiGate already exists on FortiManager in the policy package named Remote-FortiGate.
- D. Policy ID 1 does not have the ADOM Interface mapping configured on FortiManager.

**Answer: A**

### NEW QUESTION # 51

Exhibit.

```
FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
```

Given the configuration shown in the exhibit, what are two results from this configuration? {Choose two.}

- A. The same administrator can lock more than one ADOM at the same time.
- B. You can validate administrator login attempts through external servers.
- C. Two or more administrators can make configuration changes at the same time, in the same ADOM.
- D. Concurrent read-write access to an ADOM is disabled.

**Answer: A,D**

Explanation:

The configuration shown in the exhibit sets the workspace-mode to normal. The workspace mode in FortiManager defines how configuration changes and administrative tasks are handled, specifically regarding locking and collaboration in ADOMs (Administrative Domains).

Understanding the workspace modes:

\* Normal Mode: In this mode, only one administrator at a time can lock and edit an ADOM. The changes made by one administrator must be completed and saved before another administrator can make changes. It prevents concurrent read-write access within the same ADOM.

\* Workflow Mode: This mode allows multiple administrators to work on different tasks within the same ADOM, but changes still need to be approved before being committed.

Explanation of Options:

\* A. You can validate administrator login attempts through external servers.

\* This option is unrelated to the workspace mode. External authentication servers can be used for administrator logins, but that is a different configuration setting (not related to workspace-mode).

\* B. The same administrator can lock more than one ADOM at the same time.

- \* This is true. In Normal mode, an administrator can lock multiple ADOMs, meaning they can work on more than one ADOM simultaneously, but each ADOM can only be accessed by one administrator at a time for read-write purposes.
- \* C. Two or more administrators can make configuration changes at the same time, in the same ADOM.
- \* This is false. In Normal mode, only one administrator can have read-write access to an ADOM at a time. If another administrator attempts to make changes, they must wait until the ADOM is unlocked by the first administrator.
- \* D. Concurrent read-write access to an ADOM is disabled.
- \* This is true. In Normal mode, concurrent read-write access is disabled. This means only one administrator at a time can make changes to an ADOM. Other administrators can view the ADOM in read-only mode but cannot make changes until the ADOM is unlocked.

#### NEW QUESTION # 52

Refer to the exhibit.

What percent of the available RAM is being used by the process in charge of downloading the web and email filter databases from the public FortiGuard servers?

- **A. 2.9**
- B. 3.1
- C. 4.1
- D. 1.5

**Answer: A**

#### NEW QUESTION # 53

An administrator wants to create a policy on an ADOM that is in backup mode and install it on a FortiGate device in the same ADOM. How can the administrator perform this task?

- A. The administrator must use the Policy & Objects section to create a policy first.
- B. The administrator must disable the FortiManager offline mode first.
- **C. The administrator must use a FortiManager script.**
- D. The administrator must change the ADOM mode to Advanced to bring the FortiManager online.

**Answer: C**

Explanation:

To create and install a policy on a FortiGate device in an ADOM (Administrative Domain) that is in backup mode, the administrator must use a FortiManager script. This is because backup mode restricts direct configuration changes, and scripts can be used to push specific configuration changes without altering the ADOM mode.

Options A, C, and D are incorrect because:

- \* A requires the ADOM to be in normal or advanced mode to create policies directly in the Policy & Objects section.
- \* C suggests disabling offline mode, which is irrelevant to the backup mode configuration.
- \* D implies changing the ADOM mode, which is unnecessary if using a script to perform the task.

FortiManager References:

- \* Refer to FortiManager 7.4 Administrator Guide: Working with ADOMs and Using Scripts for managing policies in backup mode.

#### NEW QUESTION # 54

.....

Our FCP\_FMG\_AD-7.4 exam questions are authoritatively certified. Our goal is to help you successfully pass relevant FCP\_FMG\_AD-7.4 exam in an efficient learning style. Due to the quality and reasonable prices of our FCP\_FMG\_AD-7.4 training materials, our competitiveness has always been a leader in the world. Our FCP\_FMG\_AD-7.4 Learning Materials have a higher pass rate than other training materials, so we are confident to allow you to gain full results. With our FCP\_FMG\_AD-7.4 exam questions, your success is guaranteed.
