Our professionals have devoted themselves to compiling the AP-202 exam questions for over ten years and you can trust us for sure.

Salesforce B2B Commerce for Developers Accredited Professional Sample Questions (Q162-Q167):

NEW QUESTION # 162

Which of these is a key pattern leveraged when building Lightning Web Components? 39m 36s

- A. Composition
- B. Inventory
- C. Juggling
- D. Normalization

Answer: A

Explanation:

Composition is a key pattern in building Lightning Web Components (LWCs). This approach involves creating small, reusable components that can be assembled to form more complex interfaces. This pattern promotes modularity, reusability, and maintainability in the development of web components, aligning with web standards and best practices.

NEW QUESTION # 163

Which category can receive signaling from a Lightning Message Channel?

- A. only direct siblings
- **B. page (anywhere on it)**
- C. only ancestors (i.e. parents)
- D. only descendents (i.e. children)

Answer: B

Explanation:

A Lightning Message Channel can receive signaling from any component on a page (anywhere on it). A Lightning Message Channel is a service that allows components to communicate with each other across different Salesforce UI technologies, such as Aura, LWC, Visualforce, and Lightning web apps. A component can subscribe to a message channel and receive events that are published by another component on the same or different page. The message channel acts as a mediator that delivers the events to the subscribers. A Lightning Message Channel does not receive signaling only from descendants (i.e., children), only from direct siblings, or only from ancestors (i.e., parents), as these are limitations of event-based communication. Salesforce [Lightning Web Components Developer Guide: Communicate Across Salesforce UI Technologies], [Lightning Web Components Developer Guide: Communicate with Events]

NEW QUESTION # 164

Salesforce B2B Commerce natively provides a robots.txt file, however, a customer can also create its own version. Which three scenarios are valid reasons for customer to create their own robots.txt file? (3 answers)

- A. The customer wants to have multiple robot.txt files in a single Salesforce Community.
- **B. The customer's store is not located at the root of their domain.**
- C. robot.txt only works if there is one storefront in the org
- **D. The customer wants to reference a custom sitemap index.**
- **E. The customer wants to reference multiple storefront sitemap indexes in a single robots.txt file**

Answer: B,D,E

Explanation:

A customer can create its own robots.txt file for three valid reasons:

The customer wants to reference multiple storefront sitemap indexes in a single robots.txt file. This can be useful if the customer has multiple storefronts under the same domain and wants to provide a single entry point for search engines to crawl their sitemaps.

The customer wants to reference a custom sitemap index. This can be useful if the customer has created their own sitemap index that contains custom sitemaps or sitemaps from other sources.

The customer's store is not located at the root of their domain. This can be useful if the customer has their store under a subdirectory or a subdomain and wants to specify a different robots.txt file for their store than for their main domain. Salesforce B2B Commerce and D2C Commerce Developer Guide, Robots.txt File

NEW QUESTION # 165

What is essential for a Salesforce B2B Commerce theme to show up in the theme section in CC Admin?

- A. The theme needs to be set in the Configuration Settings.
- B. The theme needs to be set as a Custom Setting in Salesforce.
- C. The theme needs to be referred to in the head element on the page
- **D. The theme needs to have "theme" in the name of the Static Resource.**

Answer: D

Explanation:

An essential requirement for a Salesforce B2B Commerce theme to show up in the theme section in CC Admin is that the theme needs to have "theme" in the name of the Static Resource. For example, a theme named "MyTheme" will not appear in CC Admin, but a theme named "MyTheme_theme" will. This is how the framework identifies which static resources are themes and which are not. Salesforce B2B Commerce and D2C Commerce Developer Guide, Themes

NEW QUESTION # 166

Numerous flags when set, have a direct impact on the result set provided by the Global API's. Which conversion flag allows for sObjects to be returned from the Global API's when provided as a Boolean parameter with a value of true?

- A. ccrz.ccAPISizing.SUBJECT
- B. ccrz.ccAPISizing.SKIPTRZ
- C. ccrz.ccAPI.SZ_SKIPTRZ
- D. ccrz.ccAPI.SZ_SUBJECT

Answer: D

Explanation:

The conversion flag that allows for sObjects to be returned from the Global API's when provided as a Boolean parameter with a value of true is ccrz.ccAPI.SZ_SUBJECT. This flag indicates that the API should return the raw sObjects instead of the transformed objects that are usually returned by the API. For example, ccrz.ccServiceProduct.getProducts(ccrz.ccAPI.SZ_SUBJECT,true) will return the Product2 sObjects instead of the ccrz__E_Product__c objects.
