Most Probable Real Exam Questions in ZDTA Zscaler Digital Transformation Administrator PDF Dumps Format

Only by practising our ZDTA exam braindumps on a regular base, you will see clear progress happened on you. Besides, rather than waiting for the gain of our ZDTA practice guide, you can download them immediately after paying for it, so just begin your journey toward success now. With our ZDTA learning questions, you will find that passing the exam is as easy as pie for our ZDTA study materials own 100% pass guarantee.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 2	• Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.
Topic 3	• Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
Topic 4	• Platform Services: This section measures skills of Cloud Infrastructure Engineers and focuses on the suite of Zscaler platform services. Key topics include advanced device posture assessments, TLS inspection mechanics, and the application of policy frameworks governing internet, private access, and digital experience services.
Topic 5	• Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 6	• Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS • SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.

Zscaler Digital Transformation Administrator Sample Questions (Q90-Q95):

NEW QUESTION # 90
An organization has more than one ZIA instance, each on different clouds. The organization is using the same login domain for both and upon login users are given this menu in ZCC asking which cloud they would like to join. What steps could an Administrator take to avoid having this menu appear?

- A. Create only one SAML integration with the desired ZIA instance.
- B. Federate the login domain between two different IDP instances.
- C. Customize an MSI version of the ZCC file specifying the USERDOMAIN variable.
- D. Customize an MSI version of the ZCC file specifying the CLOUDNAME variable.

Answer: D

Explanation:
To avoid prompting users with a cloud selection menu in the Zscaler Client Connector (ZCC), administrators should customize the MSI installation package with the CLOUDNAME parameter. This setting ensures the ZCC automatically connects to the correct ZIA cloud instance without user intervention. The CLOUDNAME corresponds to the designated cloud name for the organization's ZIA tenant, effectively bypassing the prompt.
This is outlined under Zscaler's deployment and configuration instructions for ZCC.

NEW QUESTION # 91
Which list of protocols is supported by Zscaler for Privileged Remote Access?

- A. RDP, DNS and VNC
- B. RDP, VNC and SSH
- C. RDP, SSH and DHCP
- D. SSH, DNS and DHCP

Answer: B

Explanation:
Zscaler supportsRDP, VNC, and SSHprotocols for Privileged Remote Access. These are commonly used protocols for remote management and privileged user sessions, allowing secure access to internal applications or systems without exposing the network or requiring VPN connections.
The study guide clearly states that Privileged Remote Access capabilities focus on these protocols to ensure secure, monitored, and controlled remote sessions for administrators and privileged users, supporting remote desktop and shell access securely .

NEW QUESTION # 92
When are users granted conditional access to segmented private applications?

- A. Immediately upon connection request for best performance.
- B. After passing criteria checks related to authorization and security.
- C. After verifying the user password inside of private application.
- D. After a short delay of a random number of seconds.

Answer: B

Explanation:
Users receive conditional access only once they satisfy the policy's authorization and security criteria, ensuring device posture, user identity, and any other checks have passed before they can reach the segmented application.

NEW QUESTION # 93
What is the preferred method for authentication to access oneAPI?

- A. Transport Layer Security (TLS)
- B. System for Cross-domain Identity Management (SCIM)
- C. Security Assertion Markup Language (SAML)
- D. OpenID Connect (OIDC)

Answer: D

Explanation:
The preferred method for authentication to access Zscaler's oneAPI isOpenID Connect (OIDC). OIDC is an identity layer on top of the OAuth 2.0 protocol and provides a modern, secure, and scalable way to authenticate users and services interacting with the API.
The study guide notes that OIDC supports flexible and secure authentication, making it the recommended choice for API access management within Zscaler's platform.

NEW QUESTION # 94
What is the purpose of a Microtunnel (M-Tunnel) in Zscaler?

- A. To create an end-to-end communication channel to Azure AD for authentication
- B. To create an end-to-end communication channel to internal applications
- C. To provide an end-to-end communication channel to Microsoft Applications such as M365
- D. To provide an end-to-end communication channel between ZCC clients

Answer: B

Explanation:
TheMicrotunnel (M-Tunnel)in Zscaler is designed to create anend-to-end communication channel to internal applications. This tunnel facilitates secure and direct access from the client device to internal corporate applications without exposing the network or requiring

traditional VPN infrastructure. The M- Tunnel is part of ZPA's mechanism to ensure secure, zero-trust access to private resources.

NEW QUESTION # 95
......

There are different ways to achieve the same purpose, and it's determined by what way you choose. A lot of people want to pass Zscaler certification ZDTA exam to let their job and life improve, but people participated in the Zscaler Certification ZDTA Exam all knew that Zscaler certification ZDTA exam is not very simple. In order to pass Zscaler certification ZDTA exam some people spend a lot of valuable time and effort to prepare, but did not succeed.
