## Valid AB-900 Exam Format 100% Pass | Reliable AB-900 Valid Test Vce: Microsoft 365 Copilot & Agent Administration Fundamentals

Where there is life, there is hope. Never abandon yourself. You still have many opportunities to counterattack. If you are lack of knowledge and skills, our AB-900 guide questions are willing to offer you some help. Actually, we are glad that our AB-900 Study

Materials are able to become you top choice. Just look at the warm feedbacks from our AB-900 learning braindumps, we are very popular in the whole market. And our AB-900 exam guide won't let you down.

## Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q63-Q68):

### NEW QUESTION # 63

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Users that are assigned a Microsoft 365 E5 license can create Microsoft 365 Copilot agents grounded in the web.	<input type="radio"/>	<input type="radio"/>
Users must be assigned a Microsoft 365 Copilot license to use the Analyst agent.	<input type="radio"/>	<input type="radio"/>
Users can use a natural language prompt to create a Microsoft 365 Copilot agent.	<input type="radio"/>	<input type="radio"/>

### Answer:

### Explanation:

Statements	Yes	No
Users that are assigned a Microsoft 365 E5 license can create Microsoft 365 Copilot agents grounded in the web.	<input type="radio"/>	<input checked="" type="radio"/>
Users must be assigned a Microsoft 365 Copilot license to use the Analyst agent.	<input checked="" type="radio"/>	<input type="radio"/>
Users can use a natural language prompt to create a Microsoft 365 Copilot agent.	<input checked="" type="radio"/>	<input type="radio"/>

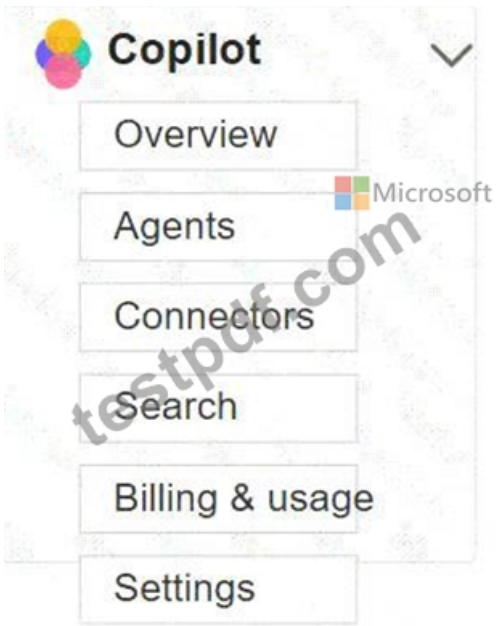

The correct selections are No, Yes, Yes . Statement 1 is No because Microsoft documents that Agent Builder in Microsoft 365 Copilot is included with the Microsoft 365 Copilot license , and agents built with that feature are part of that licensed experience. Microsoft also states that the capability is enabled by default in Microsoft 365 Copilot licensed tenants . While Copilot Chat users with qualifying Microsoft 365 licenses can access web-grounded chat experiences, creating Microsoft 365 Copilot agents in the app is documented under the Copilot-licensed Agent Builder experience, not as an E5-only entitlement.

Statement 2 is Yes because Microsoft states that Researcher and Analyst were deployed to users with Microsoft 365 Copilot licenses . Statement 3 is Yes because Microsoft says users can build agents in Agent Builder by using natural language or manually .

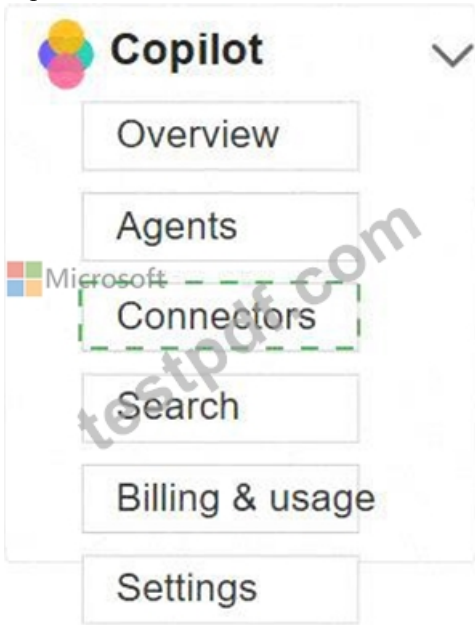

### NEW QUESTION # 64

You need to ensure that users can use an external system as a knowledge source for custom Microsoft 365 Copilot agents. What should you configure in the Microsoft 365 admin center? To answer, select the appropriate settings in the answer area.

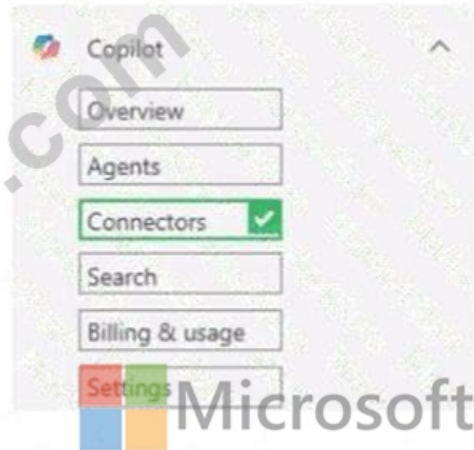

Answer:

Explanation:

Explanation:

Answer Area

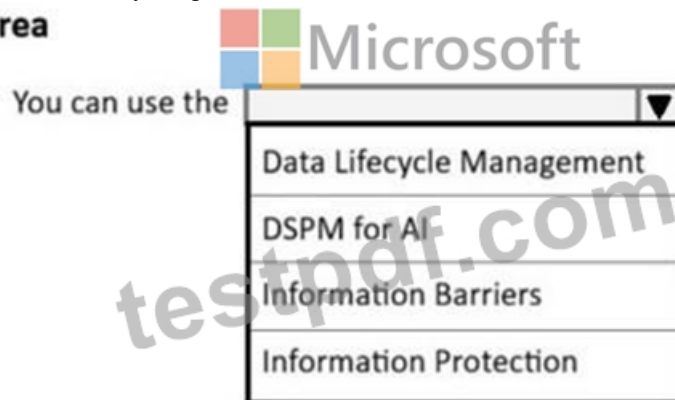

The correct answer is Connectors . Microsoft documents that Microsoft 365 Copilot connectors are used to bring external, line-of-business data into Microsoft 365 Copilot so users can search, reason over, and act on content from non-Microsoft systems. Microsoft also states that admins must enable and configure Copilot connectors in the Microsoft 365 admin center , and once configured, those connectors can be selected as knowledge sources for custom agents. This directly matches the requirement to let users use an external system as a knowledge source for custom Microsoft 365 Copilot agents. This is why the hotspot in the Copilot area should be set to Connectors , not Overview, Agents, Search, Billing & usage, or Settings. Overview provides status information, Agents is for agent management, Search is for Microsoft Search experiences, and Billing & usage is for metering and consumption tracking. The specific admin feature that enables external enterprise data sources for agent grounding is Connectors . Microsoft further explains that configured connectors can expose external knowledge securely and respect source-level permissions when used in agent scenarios.

### NEW QUESTION # 65

Hotspot Question

Select the answer that correctly completes the sentence.

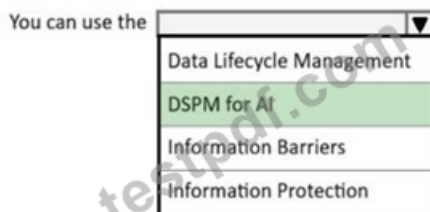

#### Answer Area

Microsoft Purview solution to detect Microsoft 365 Copilot prompts that contain sensitive information.

**Answer:**

Explanation:  
**Answer Area**

Microsoft Purview solution to detect Microsoft 365 Copilot prompts that contain sensitive information.

### NEW QUESTION # 66

An AI agent being prepared to summarize customer transcripts shows bias favoring certain geographic regions. Which Microsoft Responsible AI principle is primarily violated and should be addressed before deployment?

- A. Inclusiveness
- B. Transparency
- C. Fairness
- D. Accountability

**Answer: C**

Explanation:

The principle of Fairness dictates that AI systems should treat all people fairly and not cause harm by reinforcing societal biases.

Producing summaries that disproportionately favor certain geographic regions (or any demographic group) is a clear example of an unfair or biased outcome. The AI agent must be refined to ensure it operates in a just and unbiased manner for all customer segments.
