

HPE7-A12考試： 最新的HP認證HPE7-A12考試指南

KaoGuTi提供的培訓工具包含關於HP HPE7-A12認證考試的學習資料及類比訓練題，更重要的是還會給出跟考試很接近的練習題和答案。選擇KaoGuTi可以保證你可以在短時間內學習及加強IT專業方面的知識，還可以以高分數通過HP HPE7-A12的認證考試。

HP HPE7-A12 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Data Center Network Security and Policy	20%	- Security architecture and policy enforcement • 1. Threat defense and compliance • 2. Micro-segmentation and access control • 3. Security policy design and deployment
Topic 2: Lossless and AI-Optimized Networking	15%	- Advanced transport and optimization • 1. Congestion management and QoS • 2. AI-driven network optimization • 3. Lossless Ethernet and priority flow control
Topic 3: EVPN-VXLAN Overlay Technologies	25%	- Overlay network design and implementation • 1. VXLAN encapsulation and integration • 2. Multi-tenant and segment routing • 3. EVPN control plane and routing

Topic 4: Management, Orchestration and Operations	10%	- Management architecture and tools • 1. Integration with cloud and virtualization platforms • 2. Monitoring, visibility and troubleshooting • 3. Fabric management and automation
Topic 5: Data Center Network Architecture Design	30%	- Requirements analysis and solution design • 1. Business and technical requirement gathering • 2. High-level topology design • 3. Scalability and high availability planning

>> HPE7-A12考試 <<

最優質的HPE7-A12考試擁有模擬真實考試環境與場境的軟件VCE版本 & 權威的HP HPE7-A12

為了讓你們更放心地選擇KaoGuTi, KaoGuTi的最佳的HP HPE7-A12考試材料已經在網上提供了部分免費下載，你可以免費嘗試來確定我們的可靠性。我們不僅可以幫你一次性地通過考試，同時還可以幫你節約寶貴的時間和精力。KaoGuTi能為你提供真實的 HP HPE7-A12認證考試練習題和答案來確保你考試100%通過。通過了HP HPE7-A12 認證考試你的地位將在IT行業中也有很大的提升，你的明天也會跟那美好。

最新的 HPE Networking HPE7-A12 免費考試真題 (Q93-Q98):

問題 #93

What is the primary benefit of using EVPN as the control plane for a VXLAN overlay, compared to traditional flood-and-learn VXLAN?

- A. EVPN only works with IPv6
- B. EVPN eliminates the need for a physical underlay
- C. EVPN removes the need for VTEPs
- **D. EVPN uses BGP to proactively distribute MAC and IP reachability information, reducing unknown-unicast flooding and improving convergence**

答案：D

解題說明：

EVPN leverages MP-BGP to advertise MAC and IP host routes proactively between VTEPs, avoiding the flooding and slow convergence associated with traditional flood-and-learn VXLAN. It still requires an underlay and VTEPs, and works with both IPv4 and IPv6.

問題 #94

You have successfully installed, configured, and migrated the customer to the new Aruba CX data center equipment. What documents are normally part of the post-installation deliverables?

- A. Completed RFP Responses
- **B. Inventory**
- C. Equipment data sheets
- D. Support entitlement QR codes

答案：B

解題說明：

Post-installation deliverables normally include updated as-built documentation such as device inventory, configurations, topology, and implementation details. Data sheets and RFP responses are pre-sales/design documents.

問題 #95

A customer is deploying a cluster of twelve servers running AI workloads. Each server has four NVIDIA GPUs connected with NVLink. Each server supports 400 GbE connectivity on up to six ports; however, you can recommend using fewer ports. You have been asked to design a network for the server's backend AI interconnect. Based on HPE Networking recommendations for this workload, how many CX 9300-32D switches should you propose?

- A. 0
- B. 1
- C. 2
- **D. 3**

答案: D

解題說明:

For AI backend interconnects, HPE recommends a rail-optimized design with one 400GbE rail per GPU/NIC path. With 4 GPUs per server, propose 4 CX 9300-32D switches, each serving one rail across the 12 servers.

問題 #96

A customer wants to migrate from a traditional VLAN-based data center network to a VXLAN/EVPN fabric with minimal disruption. What is an appropriate first step in the design process?

- **A. Design a coexistence strategy using a VXLAN-to-VLAN gateway (border leaf) to bridge legacy and new segments during migration**
- B. Require the customer to migrate all workloads to a public cloud instead
- C. Immediately decommission the existing VLAN-based network
- D. Skip EVPN control plane design since VXLAN alone is sufficient

答案: A

解題說明:

Migrations should minimize disruption; a border leaf function bridges legacy VLAN-based segments into the new VXLAN/EVPN fabric so services can be migrated incrementally. EVPN is the standard control plane for VXLAN and should not be skipped, since it provides MAC/IP learning and reduces flood-and-learn behavior.

問題 #97

Which two considerations should be included in a disaster recovery (DR) design for a data center network spanning two sites? (Choose two.)

- **A. RPO (Recovery Point Objective) and RTO (Recovery Time Objective) targets defined by the business**
- B. Ensuring only one site has any redundant hardware
- C. The color scheme of the network diagrams
- **D. Layer 2 extension or routed DR approach for workload mobility between sites**
- E. The customer's preferred font for documentation

答案: A,D

解題說明:

DR designs must be driven by business-defined RPO/RTO targets, and the network must support the chosen workload mobility method (stretched L2 via EVPN VXLAN, or routed/L3 failover).

Documentation aesthetics and asymmetric redundancy are not relevant DR design considerations.

問題 #98
