100% correct answers of Designing Microsoft Azure Infrastructure Solutions flexible testing engine - unlimited exam practice! AZ-305 exam learning materials has high pass rate. Test price is reasonable and Microsoft certification exam dumps is updated. Exam actual practice test engine is for free. AZ-305 Certification Book Torrent Download now! AZ-305 Free pdf guide 365 days are updates.

What You Need To Know About The Microsoft AZ-305 Certification Exam?

Microsoft AZ-305 stands for Microsoft Azure Infrastructure Solutions Certification Exam. The purpose of this certification is to help you demonstrate your ability to design and administer a cloud solution that's running on Microsoft Azure. It will also help you prove your ability to create, configure, and administer virtual machines, web and mobile services, storage, network services, and access management on Microsoft Azure. **AZ-305 exam dumps** will help you pass this exam in the first attempt.

The AZ-305 Exam is a Microsoft Certification Exam that tests a candidate's knowledge and skills required to successfully design and deploy Microsoft Azure Infrastructure Solutions. Passing the AZ-305 exam certifies that a candidate can work with the products found in Azure solutions. These products are Virtual Machines, Web Apps, Storage, Cloud Services, Mobile Services, SQL Database, App Service, and Service Bus. Relational data security requirements and data protection practices must be applied when working with these products.

Fantastic Latest AZ-305 Braindumps Free – Find Shortcut to Pass AZ-305 Exam

Just the same as the free demo, we have provided three kinds of versions of our Microsoft AZ-305 preparation exam, among which the PDF version is the most popular one. It is understandable that many people give their priority to use paper-based AZ-305 Materials rather than learning on computers, and it is quite clear that the PDF version is convenient for our customers to read and print the contents in our Designing Microsoft Azure Infrastructure Solutions AZ-305 study guide.

Microsoft AZ-305 Exam is a challenging test that requires extensive preparation. Candidates will need to have hands-on experience with Azure services and be familiar with best practices for designing solutions on the platform. Microsoft offers a range of training resources, including online courses, practice exams, and study guides, to help candidates prepare for the exam.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q258-Q263):

NEW QUESTION # 258

A company named Contoso, Ltd. has an Azure Active Directory (Azure AD) tenant that is integrated with Microsoft Office 365 and an Azure subscription.

Contoso has an on-premises identity infrastructure. The infrastructure includes servers that run Active Directory Domain Services (AD DS), and Azure AD Connect. Contoso has a partnership with a company named Fabrikam, Inc. Fabrikam has an Active Directory forest and an Office 365 tenant. Fabrikam has the same on-premises identity infrastructure as Contoso.

A team of 10 developers from Fabrikam will work on an Azure solution that will be hosted in the Azure subscription of Contoso. The developers must be added to the Contributor role for a resource in the Contoso subscription.

You need to recommend a solution to ensure that Contoso can assign the role to the 10 Fabrikam developers.

The solution must ensure that the Fabrikam developers use their existing credentials to access resources.

What should you recommend?

- A. In the Azure AD tenant of Contoso, use MIM to create guest accounts for the Fabrikam developers.
- B. Configure an organization relationship between the Office 365 tenants of Fabrikam and Contoso.
- C. Configure a forest trust between the on-premises Active Directory forests of Contoso and Fabrikam.
- D. Configure an AD FS relying party trust between the fabrikam and Contoso AD FS infrastructures.

Answer: A

Explanation:

Trust configurations - Configure trust from managed forests(s) or domain(s) to the administrative forest. A one-way trust is required from production environment to the admin forest.

Selective authentication should be used to restrict accounts in the admin forest to only logging on to the appropriate production hosts.

NEW QUESTION # 259

You have an Azure subscription that is linked to an Azure Active Directory Premium Plan 2 tenant. The tenant has multi-factor authentication (MFA) enabled for all users.

You have the named locations shown in the following table.

You have the users shown in the following table.

You plan to deploy the Conditional Access policies shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 260

You are designing a solution that calculates 3D geometry from height-map data.

You need to recommend a solution that meets the following requirements:

- Performs calculations in Azure.
- Ensures that each node can communicate data to every other node.
- Maximizes the number of nodes to calculate multiple scenes as fast as possible.
- Minimizes the amount of effort to implement the solution.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a render farm that uses virtual machine scale sets.
- B. Create a render farm that uses virtual machines.
- C. Enable parallel file systems on Azure.
- D. Enable parallel task execution on compute nodes.
- E. Create a render farm that uses Azure Batch.

Answer: D,E

Explanation:

How it works

A common scenario for Batch involves scaling out intrinsically parallel work, such as the rendering of images for 3D scenes, on a pool of compute nodes. This pool can be your "render farm" that provides tens, hundreds, or even thousands of cores to your rendering job.

<https://learn.microsoft.com/en-us/azure/batch/batch-technical-overview>

You configure compute nodes for parallel task execution at the pool level.

NEW QUESTION # 261

A company named Contoso, Ltd. has an Azure Active Directory (Azure AD) tenant that is integrated with Microsoft Office 365 and an Azure subscription.

Contoso has an on-premises identity infrastructure. The infrastructure includes servers that run Active Directory Domain Services (AD DS), and Azure AD Connect. Contoso has a partnership with a company named Fabrikam, Inc. Fabrikam has an Active Directory forest and an Office 365 tenant. Fabrikam has the same on-premises identity infrastructure as Contoso.

A team of 10 developers from Fabrikam will work on an Azure solution that will be hosted in the Azure subscription of Contoso. The developers must be added to the Contributor role for a resource in the Contoso subscription.

You need to recommend a solution to ensure that Contoso can assign the role to the 10 Fabrikam developers. The solution must ensure that the Fabrikam developers use their existing credentials to access resources.

What should you recommend?

- A. In the Azure AD tenant of Contoso, use MIM to create guest accounts for the Fabrikam developers.
- B. Configure an organization relationship between the Office 365 tenants of Fabrikam and Contoso.
- C. Configure a forest trust between the on-premises Active Directory forests of Contoso and Fabrikam.
- D. Configure an AD FS relying party trust between the Fabrikam and Contoso AD FS infrastructures.

Answer: A

Explanation:

Trust configurations - Configure trust from managed forests(s) or domain(s) to the administrative forest. A one-way trust is required from production environment to the admin forest.

Selective authentication should be used to restrict accounts in the admin forest to only logging on to the appropriate production hosts.

NEW QUESTION # 262

You plan to develop a new app that will store business critical data.

a. The app must meet the following requirements:

Prevent new data from being modified for one year.

Minimize read latency.

Maximize data resiliency.

You need to recommend a storage solution for the app.

What should you recommend? To answer, select the appropriate options in the answer area.

Answer:
