## **H31-311\_V2.5 Reliable Test Camp - Reliable H31-311\_V2.5 Exam Pattern**

This kind of polished approach is beneficial for a commendable grade in the HCIA-Transmission V2.5 (H31-311\_V2.5) exam. While attempting the exam, take heed of the clock ticking, so that you manage the HCIA-Transmission V2.5 (H31-311\_V2.5)

questions in a time-efficient way. Even if you are completely sure of the correct answer to a question, first eliminate the incorrect ones, so that you may prevent blunders due to human error.

Huawei H31-311\_V2.5 (HCIA-Transmission V2.5) Certification Exam is an essential certification for individuals who wish to pursue a career in the field of transmission network technology. H31-311\_V2.5 exam covers a wide range of topics related to transmission network technology and requires a high level of technical expertise and knowledge. Candidates who pass the exam will demonstrate their proficiency in designing, deploying, and maintaining transmission networks and will be recognized globally for their technical expertise in this area.

Huawei H31-311\_V2.5 Certification Exam is aimed at professionals who are involved in the design, deployment, and maintenance of transmission networks. This includes network engineers, network architects, network administrators, and other IT professionals who are responsible for managing transmission networks. H31-311\_V2.5 exam measures their knowledge and skills in various areas such as transmission network principles, network planning, network deployment, network maintenance, and troubleshooting.

## Huawei HCIA-Transmission V2.5 Sample Questions (Q423-Q428):

### NEW QUESTION # 423

Which of the following VLAN numbers can be provided by QINQ technology?

- A. 4096\*1024
- B. 0
- C. 1024\*1024
- D. 4095\*4095

**Answer: D**

### NEW QUESTION # 424

1000BaseSX uses single-mode optical fiber and light with a wavelength of 1300nm to transmit services.

- A. True
- B. False

**Answer: B**

### NEW QUESTION # 425

If a network port that supports autonegotiation is connected to a network port that does not support autonegotiation, you can interconnect in both half-duplex and full-duplex modes.

- A. True
- B. Error

**Answer: A**

### NEW QUESTION # 426

What is the main reason why the OSC monitoring signal does not pass through the EDFA amplification along with the business signal?

- A. Prevent monitoring signals from interfering with business signals.
- B. Even if OA fails, the OSC monitoring channel is still valid
- C. The power of the OSC is too low, below the amplification sensitivity of the OA.
- D. The rate of OSC is too low. If it is scaled up, the energy efficiency will be too low.

**Answer: B**

### NEW QUESTION # 427

PRBS can be used to test that the SDH service is healthy and that the protection reversal function is working.
