Salesforce Data-Cloud-Consultant인증시험은 전문적인 관련지식을 테스트하는 인증시험입니다. ExamPassdump는 여러분이Salesforce Data-Cloud-Consultant인증시험을 통과할 수 있도록 도와주는 사이트입니다. 많은 분들이 많은 시간과 돈을 들여 혹은 여러 학원 등을 다니면서Salesforce Data-Cloud-Consultant인증시험패스에 노력을 다합니다. 하지만 우리ExamPassdump에서는 20시간 좌우만 투자하면 무조건Salesforce Data-Cloud-Consultant시험을 패스할 수 있도록 도와드립니다.

## Salesforce Data-Cloud-Consultant 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>Act on Data: This topic defines activations and their basic use cases, using attributes and related attributes, identifying and analyzing timing dependencies affecting the Data Cloud lifecycle. Additionally it focuses on troubleshooting common problems with activations, and using data actions, including their requirements and intended use cases.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>Segmentation and Insights: This topic defines basic concepts of segmentation and use cases, identifies scenarios for analyzing segment membership, configuring, refining, and maintaining segments within Data Cloud, and differentiating between calculated and streaming insights.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>Data Cloud Overview: This topic covers Data Cloud's function, key terminology, business value, typical use cases, the Data Cloud lifecycle, dependencies, and principles of data ethics. These sub-topics provide an overview of Data Cloud's capabilities and applications.</li> </ul>

## Data-Cloud-Consultant 최신 인증 시험 덤프

ExamPassdump의Salesforce인증 Data-Cloud-Consultant덤프를 공부하시면 한방에 시험을 패스하는건 문제가 아닙니다. ExamPassdump의Salesforce인증 Data-Cloud-Consultant덤프는 시험적중률 최고의 인지도를 넓히 알고 있습니다. 저희가 제공한 시험예상문제로 시험에 도전해보지 않으실래요? Salesforce인증 Data-Cloud-Consultant덤프를 선택하시면 성공의 지름길이 눈앞에 다가옵니다.

## 최신 Salesforce Data Cloud Data-Cloud-Consultant 무료 샘플문제 (Q88-Q93):

### 질문 # 88

A consultant is integrating an Amazon S3 activated campaign with the customer's destination system.

In order for the destination system to find the metadata about the segment, which file on the S3 will contain this information for processing?

- A. The .txt file
- **B. The json file**
- C. The .zip file
- D. The .csv file

**정답: B**

**설명:**

Explanation

The file on the Amazon S3 that will contain the metadata about the segment for processing is B. The json file.

The json file is a metadata file that is generated along with the csv file when a segment is activated to Amazon S3.

The json file contains information such as the segment name, the segment ID, the segment size, the segment attributes, the segment filters, and the segment schedule.

The destination system can use this file to identify the segment and its properties, and to match the segment data with the corresponding fields in the destination system.

### 질문 # 89

Which two dependencies need to be removed prior to disconnecting a data source?

Choose 2 answers

- **A. Data stream**
- B. Activation target
- **C. Segment**
- D. Activation

**정답: A,C**

**설명:**

Dependencies in Data Cloud:

Before disconnecting a data source, all dependencies must be removed to prevent data integrity issues.

Reference: Salesforce Data Source Management Documentation

Identifying Dependencies:

Segment: Segments using data from the source must be deleted or reassigned.

Data Stream: The data stream must be disconnected, as it directly relies on the data source.

Reference: Salesforce Segment and Data Stream Management Guide

Steps to Remove Dependencies:

Remove Segments:

Navigate to the Segmentation interface in Salesforce Data Cloud.

Identify and delete segments relying on the data source.

Disconnect Data Stream:

Go to the Data Stream settings.

Locate and disconnect the data stream associated with the source.

Reference: Salesforce Segment Deletion and Data Stream Disconnection Tutorial Practical Application:

Example: When preparing to disconnect a legacy CRM system, ensure all segments and data streams using its data are properly removed or migrated.

Reference: Salesforce Data Source Disconnection Best Practices

### 질문 # 90

What is the primary functionality of Data 360?

- A. To create a master data management (MDM) strategy
- B. To automatically generate sales forecasts based on historical email patterns
- **C. To unify and harmonize data from multiple sources to create a complete customer profile**

- D. To help users build a heat map using their data

**정답: C**

**설명:**

The core Data 360 principle is harmonization: bring data from multiple systems into a governed model that business teams can use consistently. To unify and harmonize data from multiple sources to create a complete customer profile is the strongest answer because Data 360 is designed to unify, harmonize, and activate customer and business data across systems. The platform is not merely a dashboard, archive, or point solution.

The distractors fall short because they either move the problem into the wrong system, add needless duplication, ignore Data 360 object relationships, or rely on a feature built for a different lifecycle stage. In a real implementation, those choices usually create brittle pipelines, stale data, security exposure, or segments that look correct on paper but fail when activated. Thinking like an architect, the selected option places the logic where Data 360 can govern it and reuse it reliably. This is the nuance exam questions often test: the platform capability must match both the technical layer and the business timing requirement, not just sound related to data.

**질문 # 91**

A new user of Data Cloud only needs to be able to review individual rows of ingested data and validate that it has been modeled successfully to its linked data model object. The user will also need to make changes if required.

What is the minimum permission set needed to accommodate this use case?

- **A. Data Cloud User**
- B. Data Cloud Admin
- C. Data Cloud for Marketing Data Aware Specialist
- D. Data Cloud for Marketing Specialist

**정답: A**

**설명:**

The Data Cloud User permission set is the minimum permission set needed to accommodate this use case. The Data Cloud User permission set grants access to the Data Explorer feature, which allows the user to review individual rows of ingested data and validate that it has been modeled successfully to its linked data model object. The user can also make changes to the data model object fields, such as adding or removing fields, changing field types, or creating formula fields. The Data Cloud User permission set does not grant access to other Data Cloud features or tasks, such as creating data streams, creating segments, creating activations, or managing users. The other permission sets are either too restrictive or too permissive for this use case. The Data Cloud for Marketing Specialist permission set only grants access to the segmentation and activation features, but not to the Data Explorer feature. The Data Cloud Admin permission set grants access to all Data Cloud features and tasks, including the Data Explorer feature, but it is more than what the user needs. The Data Cloud for Marketing Data Aware Specialist permission set grants access to the Data Explorer feature, but also to the segmentation and activation features, which are not required for this use case.

**질문 # 92**

Northern Trail Outfitters unifies individuals in its Data Cloud instance.

Which three features can a consultant use to validate the data on a unified profile?

Choose 3 answers

- **A. Identity Resolution**
- B. Query APL
- **C. Profile Explorer**
- **D. Data Explorer**
- E. Data Actions

**정답: A,C,D**

**설명:**

Explanation

To validate the data on a unified profile, the consultant can use the following features:

\* Identity Resolution: This feature allows the consultant to view and edit the identity resolution rulesets that determine how individuals are unified from different data sources.

\* Data Explorer: This feature allows the consultant to browse and filter the unified profiles and view their attributes, segments, and activities<sup>2</sup>.

\* Profile Explorer: This feature allows the consultant to drill down into a specific unified profile and view its details, such as source records, identity graph, calculated insights, and data actions<sup>3</sup>. References:

\* 1: Identity Resolution in Data Cloud

\* 2: Data Explorer in Data Cloud

\* 3: Profile Explorer in Data Cloud

## 질문 # 93

.....

많은 분들이 Salesforce Data-Cloud-Consultant 시험을 패스하려고 하는데 시험대비방법을 찾지 못하고 계십니다.

Salesforce Data-Cloud-Consultant 덤프를 구매하려면 먼저 Salesforce Data-Cloud-Consultant 샘플문제를 다운받아 덤프 품질을 검증후 주문하시면 믿음이 생길것입니다. Salesforce Data-Cloud-Consultant 시험대비덤프는 IT 업계에 오랜 시간 동안 종사한 전문가들의 노하우로 연구해낸 최고의 자료입니다.
