

# HPE7-A11 Reliable Test Notes, Valid HPE7-A11 Test Blueprint

2026 Latest ActualtestPDF HPE7-A11 PDF Dumps and HPE7-A11 Exam Engine Free Share: <https://drive.google.com/open?id=1T5F96nkcdGEY9b7QfTUHmB9mYfNMLDo2>

Compared to other products in the industry, HPE7-A11 actual exam have a higher pass rate. If you really want to pass the exam, this must be the one that makes you feel the most. Our company guarantees this pass rate from various aspects such as content and service. Of course, we also consider the needs of users, HPE7-A11 Exam Questions hope to help every user realize their dreams. The 99% pass rate of our HPE7-A11 study guide is a very proud result for us. Buy HPE7-A11 study guide now and we will help you. Believe it won't be long before, you are the one who succeeded!

We know that time is really important to you. So that as long as we receive you email or online questions about our HPE7-A11 study materials, then we will give you information as soon as possible. If you do not receive our email from us, you can contact our online customer service right away for we offer 24/7 services on our HPE7-A11 learning guide. We will solve your problem immediately and let you have HPE7-A11 exam questions in the least time for you to study.

## Pass Guaranteed Quiz HP - Valid HPE7-A11 - HPE Network Campus Access Professional Architect Exam Reliable Test Notes

Many clients may worry that if they buy our product they will fail in the exam but we guarantee to you that our HPE7-A11 study questions are of high quality and can help you pass the exam easily and successfully. Our product boosts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam. Our HPE7-A11 exam torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our HPE Network Campus Access Professional Architect Exam guide torrent can simulate the exam and boosts the timing function. The language is easy to be understood and makes the learners have no learning obstacles. So our HPE7-A11 Exam Torrent can help you pass the exam with high possibility.

## HPE Network Campus Access Professional Architect Exam Sample Questions (Q96-Q101):

### NEW QUESTION # 96

You are responding to the customer's RFP and are at the point of documenting design decisions that were not specified in the RFP or the RFP questions. What are valid examples of assumptions made that should be presented to the customer during the response? (Select three)

- A. Vendor equipment availability will meet customer project timelines.
- B. Sufficient space and power exist to rack and turn up the proposed equipment.
- C. The customer budget is sufficient to afford the proposed solution.
- D. The customer has technical staff that is capable of implementing the proposed equipment.
- E. Adequate virtual machine resources exist to successfully install required or optional management systems.

- F. Optional monitoring systems (syslog, How collectors) exist.

**Answer: B,D,E**

Explanation:

In the context of responding to an RFP (Request for Proposal), it is common to make certain assumptions about the project environment when specific details are not provided. Answer A is valid because assuming the customer has technically capable staff is essential for the successful implementation of the proposed equipment; if this is not the case, additional training or services may be needed. Answer D is a reasonable assumption as well, given that physical space and power are fundamental requirements for installing new hardware; however, this should be clarified to avoid potential issues during deployment. Answer E is also a valid assumption, especially in modern network environments where management and orchestration systems often reside on virtual machines; assuming there are adequate resources for these systems is critical for the overall solution but should be verified with the customer. These assumptions are important to present to the customer to ensure there are no misunderstandings or gaps in the project planning phase, as highlighted in Aruba Campus Access documentation.

### NEW QUESTION # 97

A global cruise line company needs to refresh its current fleet. They will refresh the interiors of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests. Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch. The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF. The maximum length is 60 meters (200 ft).

Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN infrastructure is based on the 200/300 series indoor and outdoor APs running InstantOS (less than 300 APs). The customer has no change in WLAN requirements. The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed.

Based on the best practices and customer requirements, what is the correct WLAN approach?

- A. Aruba OS 10 AP only deployment
- B. Instant OS 6 deployment
- C. Aruba OS 6 campus deployment
- **D. Aruba OS 10 AP and gateway deployment**

**Answer: D**

Explanation:

Given the scenario where the cruise line company is refreshing its WLAN/LAN infrastructure without changing the current WLAN requirements, but needs to ensure a reliable connection with a new Internet service providing 99.8% uptime, the best approach should align with a design that supports high availability, scalability, and future-proofing with minimal changes to existing infrastructure.

Given these factors:

1. The need for redundancy and high availability (99.8% uptime for guest Wi-Fi).
2. Current WLAN setup is based on Aruba 200/300 series APs running InstantOS.
3. The requirement to maintain the existing WLAN infrastructure with no changes to cabling or AP locations.
4. The desire for a future-proof architecture.

The most appropriate choice is: Aruba OS 10 AP and gateway deployment

Aruba OS 10 is designed for large, distributed networks and can handle both campus and branch deployments effectively. AP and gateway deployment would allow the cruise line company to benefit from centralized management, security, and

redundancy, supporting the required uptime and providing a robust foundation for future expansions. It would integrate well with the ESP (Edge Services Platform) architecture, ensuring the needed high availability and performance.

**NEW QUESTION # 98**

'Don't Buy at Us' is a US-based retail company that is expanding into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands. Their US-based headquarters HQ1 was refreshed last year based on the HPE Aruba Networking ESP architecture. You have created the design for HQ2 based on the same design as HQ1, a two-tier architecture. The high level is shown below.

Switch BOM for this project based on Two Tier:

Collapsed Core: 2 x Aruba 8360-16Y2C in VSX (ISL 2x100GbE DAC)

Access Stack: 10 x Stack of 6200F 48G Class4 PoE 4SFP+ 740W (each stack has 4 members, VSF with 10GbE VSF links) (2 x 10GbE uplink per stack) During the presentation of your design to the CTO of "Don't Buy at Us" you were informed about the changes they want you to incorporate into the updated design:

1. HQ2 will include the EMEA regional distribution center (EMEA-DISTR) next to the HQ2.
2. Only two pairs of OS1 are available between HQ2 and EMEA-DISTR.
3. The uplinks from all access stacks need to increase to 2 x 25GbE, the fiber in HQ2 and EMEA-DISTR is certified for 25GbE.
4. EMEA-DISTR needs at least 7 x stack of Aruba 48 ports switches (each stack has 4 members).

Which answer based on best practice is presenting the correct Switch BOM for the updated design?

- A. 

core: 2 x Aruba 8360-12C in VSX (ISL 2x100GbE DAC)  
 aggregation: 2 x aggregation stacks, each consists of 2 Aruba 8360-32Y4C in VSX (ISL 2x100GbE DAC, 2 x 100GbE uplinks per stack)  
 access stack: 17 x stack of Aruba 6300F 48-port 1GbE Class 4 PoE and 4-port SFP56 (each stack has 4 members, VSF with 50GbE VSF links, 2 x 25GbE uplinks per stack)
- B. 

collapsed core: 2 x Aruba 8360-16Y2C in VSX (ISL 2x100GbE DAC)  
 access stack: 17 x stack of Aruba 6200F 48G Class4 PoE 4SFP+ 740W (each stack has 4 members, VSF with 10GbE VSF links, 2 x 10GbE uplinks per stack)
- C. 

core: 2 x Aruba 8360-12C in VSX (ISL 2x100GbE DAC)  
 aggregation: 2 x aggregation stacks, each consists of 2 Aruba 8360-16Y2C in VSX (ISL 2x100GbE DAC, 2 x 100GbE uplinks per stack)  
 access stack: 17 x stack of Aruba 6300F 48-port 1GbE Class 4 PoE and 4-port SFP56 (each stack has 4 members, VSF with 50GbE VSF links, 2 x 25GbE uplinks per stack)
- D. 

core: 2 x Aruba 8360-12C in VSX (ISL 2x100GbE DAC)  
 aggregation: 2 x Aggregation stacks, each consists of 2 Aruba 8360-16Y2C in VSX (ISL 2x100GbE DAC, 2 x 25GbE uplinks per stack)  
 access stack: 17 x stack of Aruba 6300F 48-port 1GbE Class 4 PoE and 4-port SFP56 (each stack has 4 members, VSF with 50GbE VSF links, 2 x 25GbE uplinks per stack)

**Answer: D**

Explanation:

Based on the requirements provided by "Don't Buy at Us," the updated design needs to accommodate 25GbE uplinks and a minimum of 7 stacks of 48-port Aruba switches for the EMEA-DISTR. Option C is the most suitable based on best practices, as it proposes:

A core configuration consisting of two Aruba 8360-12C in VSX for the collapsed core with ISL of 2x100GbE DAC, which will provide robust core networking with high-speed interconnects, suitable for the demands of a regional distribution center and headquarters. Aggregation with two stacks, each with 2 Aruba 8360-12C in VSX (ISL 2x100GbE DAC), accommodating the uplink capacity requirements.

Access stacks with a total of 17 stacks of Aruba 6300F 48-port 1GbE Class 4 PoE with 4-port SFP56 (each stack has 4 members, VSF with 50GbE VSF links, 2 x 25GbE uplinks per stack), which exceeds the minimum requirement of 7 stacks and provides the necessary uplink bandwidth. This configuration supports the 25GbE uplink speeds, satisfies the required number of switch stacks for the EMEA distribution center, and is compatible with the existing 25GbE-certified fiber infrastructure at HQ2 and

**NEW QUESTION # 99**

What is true about 1000 Base-LX single mode transceivers?

- A. 1000Base-LX doesn't need a Mode Conditioning Patch Cable to be operated with OM2 cables up to 550 m
- B. 1000Base-LX needs a Mode Conditioning Patch Cable to be operated with OM1 cables up to 550 m.
- C. 1000Base-LX needs a Mode Conditioning Patch Cable to be operated with OS1 cables up to 2 km
- D. 1000Base-LX needs a Mode Conditioning Patch Cable to be operated with OM5 cables up to 550 m

**Answer: A**

Explanation:

1000Base-LX is designed for single-mode fiber, but it can operate over OM2 multimode fiber up to 550 m without requiring a Mode Conditioning Patch Cable. MCP cables are only needed when running LX optics over older MMF such as OM1 or FDDI-grade fiber due to differential mode delay.

**NEW QUESTION # 100**

A global furniture retail company called 'No-Stair Inc.' requests you design their new WLAN infrastructure for a global footprint. Each location of 'No-Stair Inc.' has a similar layout: three small manager offices, a warehouse, and a 'retail' area. The 'retail' area and the warehouse together amount to 95% of the location. The IT department of the company is minimally engaged in their LAN refresh so the CTO of the company has shared the information below.

Current WLAN Infrastructure is based on the 802.11n "WIFI4Less" access-points series (both model 2013-INT (2.4 only internal antenna) and model 2019-EXT (dual-band external antenna only). These AP models are standalone without any centralized management. Last year 'No-Stair Inc.' ran a project called 'secure-it' ensuring that all needed network security was implemented to be fully compliant with their security standards. During this project, they also upgraded the AAA.

Infrastructure to handle the increased AAA requests. No additional Wi-Fi or security requirements are listed for this WLAN refresh, which means that 'No-Stair Inc.' will continue to use bridged SSIDs, with local breakout into different VLANs.

The CTO of 'No-Stair Inc.' understands the need for you to ask additional questions to deliver the design. The questions may be sent in written form and will be answered within two weeks.

What additional question needs to be answered in order to collect needed information for the WLAN design?

- A. Is there enough cooling in the MDF?
- B. Does the existing wired network support enough drops for an upgraded Wi-Fi Network?
- C. What type or fiber connection it used between the core and access layer switches?
- D. Who Is the campus switch vendor?

**Answer: B**

**NEW QUESTION # 101**

.....

Many candidates failed exam before. They have no confidence for next exam and they also hesitate if they have to purchase valid HPE7-A11 brain dumps materials or if dumps are actually valid. Now I advise you download our free demo before you are determined to buy. Our free demo is a little of the real test, you can see several questions answers and explanations. You will know the validity of HP HPE7-A11 Brain Dumps materials.

**Valid HPE7-A11 Test Blueprint:** <https://www.actualtestpdf.com/HP/HPE7-A11-practice-exam-dumps.html>

Besides, we will always accompany you during the HPE7-A11 exam preparation, so if you have any doubts, please contact us at any time, Secondly, as you can see we have three versions of HPE7-A11 exam questions and answers so that we can satisfy studying habits of different candidates: PDF version, software version, on-line APP version, HP HPE7-A11 Reliable Test Notes Most web browsers automatically accept cookies, but you can usually modify your browser setting to decline cookies if you prefer.

As for its shining points, the PDF version can be readily HPE7-A11 Reliable Test Notes downloaded and printed out so as to be read by you, But I think we now know better than any other time.

Besides, we will always accompany you during the HPE7-A11 Exam Preparation, so if you have any doubts, please contact us at

any time, Secondly, as you can see we have three versions of HPE7-A11 exam questions and answers so that we can satisfy studying habits of different candidates: PDF version, software version, on-line APP version.

## Stay Updated with Free HP HPE7-A11 Exam Question Updates

Most web browsers automatically accept cookies, HPE7-A11 but you can usually modify your browser setting to decline cookies if you prefer, Convenient online service, We sincerely suggest you to try these demos of our HPE7-A11 study guide and make a well-content choice.
