

# Latest updated MB-500 Reliable Braindumps Questions and Effective Valid MB-500 Exam Pdf & First-Grade Microsoft Dynamics 365: Finance and Operations Apps Developer Useful Dumps

What's more, part of that Pass4Leader MB-500 dumps now are free: [https://drive.google.com/open?id=1DU\\_TYSnhxoHmpDDUQATKOZHhPcjOLBaR](https://drive.google.com/open?id=1DU_TYSnhxoHmpDDUQATKOZHhPcjOLBaR)

More and more people hope to enhance their professional competitiveness by obtaining MB-500 certification. However, under the premise that the pass rate is strictly controlled, fierce competition makes it more and more difficult to pass the MB-500 examination. In order to guarantee the gold content of the MB-500 Certification, the official must also do so. However, it is an indisputable fact that a large number of people fail to pass the MB-500 examination each year, some of them may choose to give it up while others may still choose to insist.

## Microsoft MB-500 Exam Overview:

|                              |                                                                                                                                           |

## Valid MB-500 Exam Pdf & MB-500 Useful Dumps

The pass rate of MB-500 study materials are 98.95%, if you buy MB-500 study material from us, we can ensure you pass the exam successfully. Besides you can get MB-500 exam dumps in ten minutes after your payment. You can use the MB-500 exam dumps freely, if you have any questions in the process of your learning, you can consult the service staff, and they have the professional knowledge about MB-500 Learning Materials, so don't hesitate to ask for help from them.

The Microsoft MB-500 Exam focuses on developers who are interested in learning how they can use Microsoft Dynamics 365 features related to Finance & Operations to improve business performance.

### Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q97-Q102):

#### NEW QUESTION # 97

You are a Dynamics 365 Finance developer. You have two tables as shown in the following exhibit:

You need to configure Table1 to ensure that records cannot be deleted from Table1 if Table2 contains related records. Which value should you use for the OnDelete property?

- A. Restricted
- B. None
- C. Cascade + Restricted
- D. Cascade

**Answer: A**

Explanation:

Example of Restricted

Suppose we have two tables (Customer & Order) and the relation is of One-To-Many i.e. Customer can have many orders.

So on a parent table i.e. (Customer) if I set a delete action property to "RESTRICTED" for Order table. Then If I go and delete the record from a Customer table. It will first check the record in the child table and if exist that warning prompt saying that first we need to delete a record from child table.

Incorrect Answers:

B: Example of Cascade:

Suppose we have two tables (Customer & Order) and the relation is of One-To-Many i.e. Customer can have many orders.

So on a parent table i.e. (Customer) if I set a delete action property to "CASCADE" for Order table. Then If I go and delete the record from a Customer table. It will also delete all the related records in Order table automatically.

C: Example of Cascade + Restricted

Suppose we have three tables (Person, Customer & Order) Now Person is a parent of Customer table, and Customer is a parent of Order table having (One-To-Many) relations. If I set a Delete action property on Person table to "CASCADE" for customer table and If I set a Delete Action property on a CUSTOMER table for Order table to "CASCADE + RESTRICTED".

So if I delete a record from Customer table then It will first check the record in the child table (order table) and if exist that warning prompt saying that first we need to delete a record from child table.

But if I delete a record from Person table it will automatically delete a record in Customer table and all records related to customer table in Order table would also be deleted.

#### NEW QUESTION # 98

An error occurs when an employee creates a new workflow using a custom approval element to track the status of a document.

You need to ensure that the workflow is created correctly.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

- Create a workflow structure.
- Configure the business process steps.
- Develop the workflow approval component.
- Enable the workflow for the business scenario.

**Answer area**

- 
- 
- 
- 

Microsoft

**Answer:**

**Explanation:**

**Actions**

- Create a workflow structure.
- Configure the business process steps.
- Develop the workflow approval component.
- Enable the workflow for the business scenario.

**Answer area**

- Create a workflow structure.
- Configure the business process steps.
- Develop the workflow approval component.
- Enable the workflow for the business scenario.

Microsoft

**Explanation**

**Actions**

- 
- 
- 
- 

**Answer area**

- Create a workflow structure.
- Configure the business process steps.
- Develop the workflow approval component.
- Enable the workflow for the business scenario.

Microsoft

### NEW QUESTION # 99

You need to develop, test, and deploy the Vendor Exclusion list solution.

What should you create? To answer, drag the appropriate objects to the correct actions. Each element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Objects to create**

- existing model
- new model
- deployable package
- package
- model file
- project

**Action**

- Create a new deployable unit.
- Object to add.
- Create, manage, and group elements.
- Distribute the solution to customers.

**Object to create**

- 
- 
- 
- 

Microsoft

**Answer:**

**Explanation:**

## Answer Area

### Objects to create

|                    |
|--------------------|
| existing model     |
| new model          |
| deployable package |
| package            |
| model file         |
| project            |

### Action

Create a new deployable unit.  
Object to add.  
Create, manage, and group elements.  
Distribute the solution to customers.

### Object to create

|                    |
|--------------------|
| package            |
| new model          |
| project            |
| deployable package |

Microsoft

Explanation:

Box 1: package

An AOT package is a deployment and compilation unit of one or more models that can be applied to an environment. It includes model metadata, binaries, reports and other associated resources. One or more AOT packages can be packaged into a deployable package, which is the vehicle used for deployment of code (and customizations) on demo, sandbox, and production environments.

Box 2: New model

Model - You configure your model to refer to two other models. This enables your model to reference metadata and code elements that are in other packages.

Box 3: project

Project - You create a project and then associate your project to your new model. You add elements to your project, which are also added to your model. Specifically, you add an extended data type (EDT). You also add a table that you populate with fields and a method.

Box 4: deployable package

Reference:

<https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/dev-tools/create-data-model-elements>

## NEW QUESTION # 100

A company uses Dynamics 365 Finance. You are customizing elements for the extended data types (EDTs) shown in the following table.

| EDT name        | Comment                 |
|-----------------|-------------------------|
| CalendarID      | root EDT                |
| CalendarName    | root EDT                |
| BasicCalendarID | derives from CalendarID |

You have a Table named WorkCalendar. The table has a column named BasicCalendarID that uses the BasicCalendarID EDT. You need to increase the length of the column by using an extension. Solution: Create a derived EDT for CalendarName. Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

## NEW QUESTION # 101

You are a Dynamics 365 Finance developer.

Users must be able to view a filtered customer list from within a workspace.

You need to add the customer form to a workspace.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them on the correct order.

### Answer Area

#### Actions

Navigate to the Workspace form and select **Find form to add**.

Select **Workspace and Presentation options**.

Select the **Options** action pane tab and then select **Add to workspace**.

Open the customer form and apply filters to the grid.

Select **Configure**.

Select the **General** menu item then select **Add to workspace**.

Answer:

Explanation:

#### Actions

Navigate to the Workspace form and select **Find form to add**.

Select **Workspace and Presentation options**.

Select the **Options** action pane tab and then select **Add to workspace**.

Open the customer form and apply filters to the grid.

Select **Configure**.

Select the **General** menu item then select **Add to workspace**.

### Answer Area

Open the customer form and apply filters to the grid.

Select the **General** menu item then select **Add to workspace**.

Select the **Options** action pane tab and then select **Add to workspace**.

Select **Configure**.

Explanation

Open the customer form and apply filters to the grid.

Select the General menu item then select **Add to workspace**.

Select the **Options** action pane tab and then select **Add to workspace**.

Select **Configure**.

Step 1: Open the customer form and apply filters to the grid.

To add a list to a workspace, first sort or filter the list on the page so that it shows the information as you want it to appear in the workspace.

Step 2: Select the General menu item then select Add to workspace

This workspace will be selected in step 3.

Step 3: Select the Options actions pane tab and then select Add to workspace.

For some pages that include lists, the Add to workspace personalization feature is available in the Personalize group on the Options tab of the Action Pane. This feature lets you push relevant information from the current list to a specific workspace.

Step 4: Select Configure

After you select Configure, a dialog box appears, where you can select the columns that should appear in the list in the workspace.
