Difficulty in Attempting CPSM® Certified Professional in Supply Management®

While the content of the exams remains consistent from form to form, questions used in the exams are written by industry professionals and continually updated. This means that a test form taken on one occasion will contain different questions from a test form taken on another occasion. Because of this, the level of difficulty will vary slightly from form to form. To compensate for these variations, a statistical procedure known as "test equating" is used to correct for differences in test-form difficulty. You can use our **ISM CPSM Exam Dumps Pdf** to start right now.

To maintain consistency in test scoring, a second statistical procedure called “scaling” is used. Scaling on the CPSM exams converts all scores to a scale from 100-600, with the passing score set at 400. Scores received from ISM are reported as scaled scores in increments of 10. If your scaled score on any exam is from 100-390, you've failed that exam. If your scaled score is 400 or above, you've passed that exam. Scaling on the CPSD Essentials in Supplier Diversity exam converts all scores to a scale ranging from 100-400, with the passing score set at 300. For example, if your scaled score on the CPSD Essentials in Supplier Diversity Exam is from 100-290, you failed. If the scaled score is 300 or above, you passed.

It is highly recommended that candidates get hands-on experience with supply chain systems in an enterprise environment before attempting a certification exam. By enhancing the developing applications skills and data models or running administration projects, candidates will gain valuable knowledge.
