## Peoplecert DevOps-Foundation通過考試，DevOps-Foundation在線題庫

你可以現在就獲得Peoplecert的DevOps-Foundation考試認證，我們VCESoft有關於Peoplecert的DevOps-Foundation考試的完整版本，你不需要到處尋找最新的Peoplecert的DevOps-Foundation培訓材料，因為你已經找到了最好的Peoplecert的DevOps-Foundation培訓材料，放心使用我們的試題及答案，你會完全準備通過Peoplecert的DevOps-Foundation考試認證。

## 最新的 PeopleCert DevOps DevOps-Foundation 免費考試真題 (Q29-Q34):

### 問題 #29

What is the ideal structure for a DevOps Team?

- A. A permanent cross-functional team led by a DevOps Engineer
- B. An expanded Scrum Team that includes members from security, QA and Ops
- C. A cross-functional 'tiger team' for short-term projects

- **D. There is no ideal structure for a DevOps Team**

答案: D

解題說明:

PeopleCert DevOps Foundation v3.6 emphasizes that there is no single "ideal" team structure for DevOps.

The optimal structure depends on organizational size, maturity, product complexity, and culture.

While cross-functional teams (as described in A and C) are common in mature DevOps environments, and temporary tiger teams (B) may be used for rapid initiatives, the key is flexibility. Some organizations integrate DevOps practices into existing teams, while others create dedicated platform teams, guilds, or enablement teams.

The focus should be on removing silos, fostering collaboration, and aligning around value streams—not adhering to a rigid structure.

### 問題 #30

Which of the following is NOT a benefit of using a Kanban board?

- A. It enables people to work collaboratively
- B. It reduces idle time and waste
- C. It reduces work in progress
- **D. It defines policies and procedures**

答案: D

解題說明:

Kanban boards are visual management tools used to track work and manage flow. They provide transparency, limit work in progress (WIP), and help teams focus on delivering value quickly.

\* A: Reducing WIP is a key Kanban principle that improves flow and delivery speed.

\* C: Visibility fosters collaboration and shared ownership.

\* D: By identifying bottlenecks and waste, Kanban helps reduce idle time.

B—defining policies and procedures—is not an inherent benefit of Kanban. While teams may display existing policies on a Kanban board, the board itself does not define them. Its role is to visualize work and flow, not to establish governance rules.

Thus, B is the correct "NOT" benefit.

Kanban by David J. Anderson - Benefits and Principles

### 問題 #31

Which of the following is NOT a characteristic of DevOps?

- A. Ensuring overall organizational success
- **B. Fast flow of unplanned work into production**
- C. World-class stability, reliability, availability and security
- D. Working towards a common goal

答案: B

解題說明:

A fast flow of unplanned work into production is not a characteristic of DevOps. In fact, DevOps practices strive to minimize unplanned work (like emergency changes or outages) through automation, testing, collaboration, and rigorous change control. The other options—ensuring organizational success, working toward a common goal, and world-class stability/reliability—are all key DevOps characteristics.

Reference: DevOps Foundation v3.6 syllabus section 1.4; State of DevOps Report.

### 問題 #32

An organization wants to use experiments to improve its ITSM processes in support of DevOps practices.

Which approach could this organization use to design and implement small, incremental improvements?

- A. All of the Above
- B. Value Stream Mapping
- **C. Improvement Kata**
- D. Agile Service Management

答案： C

解題說明：

The Improvement Kata is a structured, scientific approach to continuous improvement. It uses small, iterative steps to move from the current state toward a target condition, testing hypotheses along the way.

In the DevOps context, the Improvement Kata helps teams experiment with process changes, measure outcomes, and adapt quickly-reducing risk while fostering a learning culture. It is especially useful for improving ITSM processes incrementally.

And Bare valuable techniques but serve different purposes-Agile Service Management adapts ITSM to Agile principles, and Value Stream Mapping visualizes and analyzes workflow. While they can complement Improvement Kata, C is the direct experimental framework for small, incremental improvement.

Thus, the correct answer is C.

References:

PeopleCert DevOps Foundation v3.6 - Improvement Kata and Continuous Improvement Mike Rother -Toyota Kata

### 問題 #33

Which of the following is NOT a typical IT constraint?

- A. Security assessments
- B. Bureaucratic processes
- C. Development delays
- **D. Loosely coupled architectures**

答案： D

解題說明：

Loosely coupled architectures are not typical IT constraints; in fact, they are often a solution to constraints.

Typical IT constraints include:

- \* Security assessments (slow approvals)
- \* Bureaucratic processes (excessive paperwork or approvals)
- \* Development delays (resource or tool bottlenecks)

Extract-style reference:

"Loosely coupled architectures enable teams to work independently, reducing constraints imposed by tightly integrated systems."

-Accelerate: The Science of Lean Software and DevOps

DevOps Foundation v3.6 lists constraints as blockers to fast flow and highlights architectural decoupling as a DevOps enabler.

### 問題 #34

.....

VCESoft的DevOps-Foundation資料的命中率高達100%。它可以保證每個使用過它的人都順利通過考試。當然，這也並不是說你就完全不用努力了。你需要做的就是，認真學習這個資料裏出現的所有問題。只有這樣，在考試的時候你才可以輕鬆應對。怎麼樣？VCESoft的資料可以讓你在準備考試時節省很多的時間。它是你通過DevOps-Foundation考試的保障。想要這個資料嗎？那就快點擊VCESoft的網站來購買吧。另外，你也可以在購買之前先試用一下資料的樣本。這樣你就可以親自確定資料的質量如何了。
