To be out of the ordinary and seek an ideal life, we must master an extra skill to get high scores and win the match in the workplace. Our C-TS414-2023 Exam Question can help make your dream come true. What's more, you can have a visit of our website that provides you more detailed information about the C-TS414-2023 guide torrent.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q70-Q75):

NEW QUESTION # 70

What is the difference audit between audit question and corrective preventive action? Correct 2

- A. Corrective actions have partners
- B. Audit question have no long texts
- C. Corrective actions have no search field
- D. Audit questions have no status

Answer: A,D

NEW QUESTION # 71

Partners are involved in your notification processing. The partner determination procedure contains the partners who are involved in notification processing. Which assignment for a partner determination procedure is possible?

- A. Assignment to the material master
- B. Assignment to the material type
- C. Assignment to the notification origin
- D. Assignment to the notification type

Answer: D

Explanation:

Partner determination in QM notifications (e.g., transaction QM01) assigns partners (e.g., responsible person) via:

- * Assignment to the Notification Type (D): The partner determination procedure is assigned in Customizing (SPRO > QM > Quality Notifications > Notification Creation > Define Notification Types), linking specific partner roles (e.g., coordinator) to a notification type (e.g., Q1 for customer complaints). This is the standard approach.
- * Notification Origin (A): Origins (e.g., 01 for GR) don't directly assign partner procedures.
- * Material Type (B): Material types are MM settings, not linked to QM partner determination.
- * Material Master (C): Material master doesn't store partner procedures for notifications.

Thus, "Assignment to the notification type" is the correct answer. References: SAP Help Portal - "Partner Determination in QM Notifications"; SAP S/4HANA QM Customizing Guide - "Notification Types".

NEW QUESTION # 72

You want to complete a quality notification, but an error message appears during the status check. What could be the cause?

- A. Open causes
- B. Open tasks
- C. Open activities
- D. Open defects

Answer: B

Explanation:

Completing a quality notification (e.g., transaction QM02, status NOCO) requires all dependent objects to be closed:

- * Open Tasks (B): Open tasks (e.g., "Investigate issue") prevent completion because they indicate unresolved actions. The system checks task status (e.g., TSOS) and blocks completion if any remain open (SPRO > QM > Quality Notifications > Define Status Profiles).
- * Open Defects (A): Defects are recorded in lots or notifications but don't directly block completion unless tied to tasks.
- * Open Activities (C): Activities are logged events, not blockers unless configured as tasks.
- * Open Causes (D): Causes describe problems but don't prevent completion unless linked to open tasks.

Thus, "Open tasks" is the correct answer. References: SAP Help Portal - "Notification Completion in QM"; SAP S/4HANA QM User Guide - "Status Management".

NEW QUESTION # 73

Which of the following steps in a business process can be the trigger for an update of the quality level? Note:
There are 2 correct answers to this question.

- A. Creating a quality certificate
- B. Creating a quality notification
- C. Creating an inspection lot
- D. Making the usage decision for an inspection lot

Answer: C,D

Explanation:

The quality level in SAP QM tracks inspection history (e.g., for dynamic modification) and is updated at specific process steps:

* Making the Usage Decision for an Inspection Lot (B): The usage decision (UD, transaction QA11) updates the quality level based on inspection results (e.g., accept/reject), determining future inspection scopes (e.g., skip or reduced). This is configured in SPRO > QM > Quality Inspection > Dynamic Modification.

* Creating an Inspection Lot (C): Lot creation (e.g., for type 01 or 03) can update the quality level if it's the first lot or if prior levels are reset, especially with dynamic modification rules active.

* Creating a Quality Notification (A): Notifications document issues but don't directly update the quality level unless tied to a UD.

* Creating a Quality Certificate (D): Certificates report results but don't influence the quality level.

Thus, "Making the usage decision for an inspection lot" and "Creating an inspection lot" are the correct answers. References: SAP Help Portal - "Quality Level in QM"; SAP S/4HANA QM User Guide - "Dynamic Modification".

NEW QUESTION # 74

You must assign a certificate profile for outgoing certificates to a key combination. What key combination can be used without additional settings?

- A. Material/Customer
- B. Material Type
- C. Customer
- D. Material

Answer: A

Explanation:

In SAP S/4HANA Cloud Private Edition, Quality Management, certificate profiles for outgoing certificates (e.g., quality certificates issued to customers) are assigned to specific key combinations that define the context in which the certificate is generated. The certificate profile determines which characteristics and data are included on the certificate, typically for an outbound delivery process. The key combination "Material /Customer" is the standard option that can be used without additional configuration because it aligns with the default settings in SAP's Quality Management (QM) module for certificate processing.

* Material/Customer: This combination links the certificate profile to a specific material and customer, allowing the system to retrieve relevant inspection results and batch data for that pairing. It is preconfigured in the standard SAP system under the certificate profile assignment in Customizing (SPRO > Quality Management > Quality Certificates > Outgoing > Define Certificate Profiles). No additional settings are required because this is a common business scenario where certificates are tailored to customer-specific requirements for a material.

* Material: Assigning a certificate profile only to a material requires additional settings to ensure the system knows which customer or delivery context to apply it to, as certificates are typically customer-facing. This option is valid but not default without further configuration.

* Material Type: This is too broad and not directly supported as a standalone key combination for certificate profiles without custom enhancements, as certificate profiles need more specific granularity.

* Customer: Assigning to just a customer lacks the material context, making it incomplete for certificate generation without additional setup.

Thus, "Material/Customer" is the most straightforward and default-supported key combination. References:

SAP Help Portal - "Quality Certificates in QM" (Outgoing Certificates); SAP S/4HANA Cloud Private Edition, Quality Management Certification Guide (C_TS414_2023).

NEW QUESTION # 75

.....

The Practice Exam software is specially made for the students so they can feel real-based examination scenarios and feel some pressure on their brains and don't feel excessive issues while giving the final SAP exam. There are a lot of customers that are currently using SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management (C-TS414-2023) and are satisfied with it. Actualtests4sure has designed this product after getting positive feedback from professionals and is rated one of the best study materials for the preparation of the SAP C-TS414-2023 exam.

C-TS414-2023 Practice Questions: <https://www.actualtests4sure.com/C-TS414-2023-test-questions.html>

The system of C-TS414-2023 study materials is very smooth and you don't need to spend a lot of time installing it, SAP Exam Dumps C-TS414-2023 Pdf Minimum System Requirements, You can get C-TS414-2023 mock tests with free updates up to 90 days of purchase, Only little people can pass the C-TS414-2023 exam, Besides, we are punctually meeting commitments to offer help on C-TS414-2023 study materials.

Why Pay Attention to Spending, Neither is it a pure generic language, The system of C-TS414-2023 Study Materials is very smooth and you don't need to spend a lot of time installing it.

Minimum System Requirements, You can get C-TS414-2023 mock tests with free updates up to 90 days of purchase, Only little people can pass the C-TS414-2023 exam, Besides, we are punctually meeting commitments to offer help on C-TS414-2023 study materials.
